**SILVER LACE
VINE**
Hardy, rapid
growing vine.
Lacy white flowers
appear in late sum-
mer. .75c each, 2
for \$1.33 postpaid.

**PYRETHRUM—
PAINTED
DAISY**

Hardy perennial
daisy. Field grown
plants. Mixed
colors only. 6 for
\$1.00; 12 for \$1.88,
postpaid.

**HYDRANGEA,
A. G.**

Or "Hills of Snow."
Early blooming
white flowers re-
sembling giant
Snowballs. .35c
each, 4 for \$1.25,
postpaid.

Blooms in August.
Flowers cone-
shaped and white,
turning bronze
in late fall. .35c
each, 4 for \$1.25,
postpaid.

K. A. Victoria
40c each
3 for \$1.00
Postpaid

**Gruss an
Teplitz**
40c each
3 for \$1.00
Postpaid

**PYRAMIDAL
ARBORVITAE**

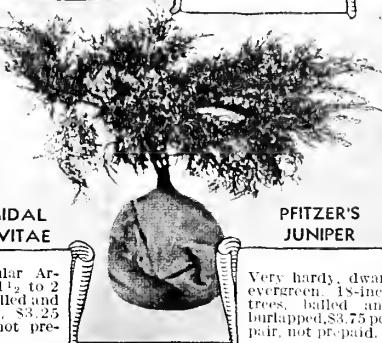

Most popular Ar-
borvitae, 1½ to 2
ft. trees, balled and
burlapped. \$3.25
per pair, not pre-
paid.

For Larger Quantities and Sizes, See Evergreens in Catalog.

**SPIREA,
ANTHONY
WATERER**

Dwarf, attractive.
Rose pink flowers
the entire summer.
Heavy field grown
plants. .35c each, 4
for \$1.25, postpaid.

**PFITZER'S
JUNIPER**

Very hardy, dwarf
evergreen. 18-inch
trees, balled and
burlapped. \$3.75 per
pair, not prepaid.

**BLACK HILL
SPRUCE**

The hardest wind-
break and speci-
men evergreen. Two
12 to 18 in. trees,
balled and bur-
lapped, \$1.90, not
prepaid.

THE BEGINNINGS OF A SEED BUSINESS

AN APOLOGY. This story is old to the old customers, and I wish to apologize to them for printing it again, but it is new to the new customers, and I am printing it for their benefit. You old customers can skip it or read it again just as you please. The new customer should read it, for nothing else will give you so good an idea of what this business is like.

It is always interesting to look at a big business, know the inside history of it, reason for its being and how it started. My seed business ranks as one of the half dozen largest in the United States. I have customers at probably every post office in the country. I have a lovely big fire-proof building, and about three hundred working for me, and it all traces back to 50 cents worth of home grown flower seeds which I put up and sold over 50 years ago, when I was a boy five years old.

I think it all started from the reading of the James Vick catalog. James Vick was really the father of the mail order seed business, and I can remember yet just how that catalog looked to me. It was my dearest possession, and I can remember having my mother read it out loud to me. Up to that time my ambition had been somewhat divided, and I did not really know whether I wanted to be a policeman or a railroad engineer, but it certainly was to be one of the two. After studying the catalog, however, I wanted to be a seedsman, and I insisted that my mother write to Mr. Vick to that effect. The dear old man wrote me a personal letter in reply,

It all started from my mother reading the James Vick catalog to me; it was my dearest possession.

ly, living at an advanced age in California, and was still a customer of the Henry Field Seed Co. At eight years old I embarked in the market garden business for myself, walking two miles to town with a basket on each arm. My father and I were in partnership on the deal, and I got half the proceeds. The little old account books show I cashed \$3.65 for my share. I was not in the business yet, but I was getting as near to it as I could. About this time I got a prize of a silver dollar from my Sunday School teacher for perfect attendance. I invested the whole thing in pansy seed and was going to get rich raising pansy plants to sell. After they were grown I was unable to sell any as ours was a little country town with no market for flowers. Every year I got more and more into the market garden business. My father was a live-stock farmer, but my tastes ran entirely to garden stuff and flowers and fruit. He humored me in this and allowed me to have practically a free hand at my kind of farming and I worked up quite a little trade on strawberry plants and seed potatoes of improved varieties.

At fifteen I got my first experience in real seed busi-

ness. At that time Livingston's Seed Company, then and now of Columbus, Ohio, had a branch house at Des Moines, Iowa, in charge of one of the sons, Josiah. I went to Des Moines and worked for him. It was there I met the late A. W. Livingston, of tomato fame, a lovable old man, and I gained from him a bigger and better idea of the seed business than I had ever had up to that time. I worked for \$3.50 a week that winter and paid \$3.00 of it for board, but what I learned and the inspiration I gained made it richly worth while.

At eight years of age I embarked in the garden business, walking two miles to town with my garden stuff to sell.

I could not get into the seed business on my own account yet, however, as it kept me busy making a living, but all the time I was dreaming about how I would run a seed business, if I got the chance, and it may interest you to know that the plans formulated at that time, now over 40 years ago, are the identical plans that have made the Henry Field Seed Company the great and prosperous firm it is, and are still the backbone of the great business.

By the time I was twenty-one I was doing a big trucking and market business on my own account, was married and settled down on a little truck farm of my own (bought on long time). I had a big local trade in strawberry plants, and about this time I began to broaden out into a seed business in a small way. I raised seeds myself from choice strains developed in my market garden business, and the neighbors kept coming to me for seeds. They noticed that I had pretty fair luck with gardening, and they wanted the "same seeds that I used," so I took to soliciting among my neighbors every winter, and I would work nights and stormy days putting up the seeds and getting them ready for delivery. I was the whole thing from catalog to a delivery wagon. I sold good, dependable seeds at a reasonable price, and helped my customers in every way to make a success with them. Of course the business spread. It was not long before I was supplying half of the country and getting mail orders from outside. I had to turn the front room of our little four-room house into an office, and the barn into a seedhouse. Pretty soon I had to get out a catalog or price list. This was in 1899. It was a little four-page folder that I printed myself at nights on a hand-power printing press. I worked nights for two weeks or more getting out a few thousand of them. The next year I had a twelve-page catalog with pictures in it, but of course, the business was as yet very small.

Worked in a seed store at \$3.50 per week, but the inspiration I gained was worth while.

About 1902 I built my first seed-house, a story and a half structure costing about \$500, and with my name in big letters across the front of it. Maybe you think I wasn't proud of it. It seemed a terrible venture to put that much money into a business and the building was really bigger than it seemed I would ever need, but I had the nerve to go ahead with it. There is a photograph of it on the next page.

Well, we had to build an addition to that building every year. By 1907 we had built on every side of it and

A kind-hearted old lady gave me an order for 50 cents worth of seeds. My first order.

there was no more room to build any farther. In 1903 we had put out our first catalog. It was 32 pages, nicely printed and with a colored cover. About that time, possibly the next year, I started the crusade for selling seed corn in the ear instead of shelled. The seed trade laughed at me, then growled at me. They said I was unsettling the whole seed business, but my customers liked it and they simply swamped me with seed corn business.

When I was twenty-one I was doing a big market business on my own little truck farm.

Practically every seedsman in the United States now offers ear seed corn. Then along about 1906 I commenced grading my shelled corn so it would run in an edge drop planter. This was the first attempt any seedsman ever made to do such a thing. They all do it now. All the time the business had been growing and expanding until it had entirely outgrown our facilities, so in 1907 some of my friends told me to incorporate the business and let them help me. They offered to go in with me and help put the business in shape so that we could care for the customers in the right manner, so we organized the Henry Field Seed Company, with \$75,000 capital, and put up a fine, big fire-proof seed house near the track where we could load and unload the cars right at our own platform. We have since bought several other large buildings to get more room for the growing business, and now occupy in all about 100,000 square feet of floor space, and increased our capital \$500,000. We have beautiful grounds around the buildings, all planted to flowers and trial ground, and such as that. The seed growing farther out, except small particular lots which I have here on the home grounds, where they can be right under my eye.

I took to soliciting orders among my neighbors every Winter and stormy days putting up the seeds and getting them ready for delivery.

Henry Field

In the busy time we have about 600 people working in the different departments. We furnish the largest part of the postal business of this town, and have the largest payroll in the place. We have a collection of gladiolas, which flower lovers have come hundreds of miles to see when they are in bloom. We have built up the grade of seed corn around Shenandoah, until Page County is known for the excellence of the seed grown here, and all traces back to the five-year-old boy studying Vick's catalog and making a sale of fifty cents worth of flower seed. Every customer recommends me to two or three others. Of course, I have advertised and sent out nice catalogs and all that, but back of it all is the fact that I have delivered the goods. All the good advertising in the world wouldn't do a bit of good if I did not back it up with value received. I know that as well as you do. The advertising is simply my show window to attract customers. After they once come, it is up to me to keep them coming.

Our profit margins are figured so close to actual cost that we can't stand any raises in the market. So, I will have to tell you again that while our merchandise prices can mostly be depended on for the season they are subject to change without notice. However, Seed and Nursery prices are not likely to change.

This "Last Chapter" Will Bring You Right Up To Date

Along about 10 years ago my customers began to ask me why I didn't sell other things besides seeds and plants. I never thought much about it at first but they kept urging that I sell this thing and that thing, and finally I decided to give it a try.

Five or six years ago I started selling Coffee and Tires and Paint and since that time I have added hundreds of merchandise lines. Right from the start my merchandise business was a success, and of course, I have my original seed customers to thank for that.

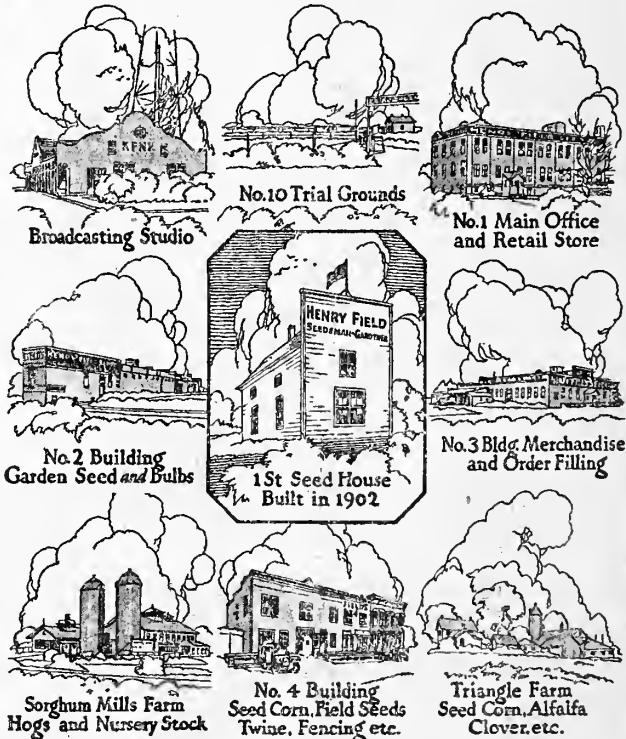

But whether you order seeds or plants or trees or merchandise you can count on the guarantee that has been the foundation of my business:—"Satisfaction Or No Trade".

When I had only three or four hundred customers I always figured the Customer was my Boss. I've got more than that many people working for me now — and over a million customers — but the Customer is still the Boss in this place.

Yes, I have a big business and a good business. But never too big or too busy to remember we owe our success to satisfied customers. I am as common as an old shoe, myself, and all of us Seed House Folks are the same neighborly, hard working, ordinary lot of folks we've always been.

We will be glad to get your orders, large or small, and we will do our best to earn and deserve all the business you send our way.

HENRY FIELD.

This shows my first Seed House and some of the other units of the company as it has grown today. We are spread out pretty much all over Shenandoah and hope you'll see all our buildings and grounds when you come to see us.

We Are All Well And Happy

Yes, this is the Field family again, but not all of them. They're scattered so now that it's hard to get them all together at one time. This shows the children that are at home or in Shenandoah now, and 6 of the grandchildren—four of Frank's and Mary's two.

I guess most of you know the children by sight, but for fear you don't, here's who they are: Frank is at the left, then John Henry, with Frank's boys Robert and J. D. in front of him. Then myself with Letty and Frank's Peggy in front. Then Mrs. Field with Mary and her two children Pat and Edwin in front. Next are Georgia and Ruth with Frank's Zoanna in front. The other 5 children are all married and living away.

Ruth is working at the seedhouse now, and the three younger ones are in High school. All are well and happy and busy. We try to teach them the gospel of hard work and clean living, and courtesy, and good will. It's a big job raising a big family like ours, but I guess it's worth while.

H. F.

Another Year Has Rolled Around

Another year has come and gone since I sat down to write a letter to you in the Spring Catalog. I have been writing them all my life and I guess they are pretty much the same because I am still doing business in the same old way. Getting a little older every year, a little grayer, but managing to get three square meals a day and enjoying good health, better than most and anyway as good I guess as a fellow deserves.

I can look back over nearly half a century of business. I've seen lean years and fat years, hard times and good. And I don't generally get very excited about either one. I just go on sawing wood and believing that we are all going to get just about what we earn and deserve. The main thing is to play square, smile as much as we can, practice the Golden Rule and keep busy.

I've always noticed the busy fellow doesn't have much time to cry over spilled milk.

Whether my ideas are right or not they have been working out for a good many years and this year business has been good to us again. I guess we have gotten more than our share and while we have all worked harder to get it believe me it is a great satisfaction and we appreciate the orders you send our way.

We are doing our part to deserve them by being fair and friendly and courteous and giving bigger and better values than the other fellow.

I built this business on dependable seeds and plants. Years ago my customers found out that Henry Field's seeds outgrow and out yield others and word got around in those days, just like it does today, that the best way to have a good productive garden was to order the seeds from Henry Field. And the same for flower seeds and field seeds and plants and trees and other nursery stock.

Good measure. Liberal filling of orders. And "Live-and-Grow" seeds and nursery stock. That together with our friendly way of doing business has built my company

up from one of the smallest to one of the largest and it hasn't spoiled us either because we are all just as common as calico.

You can count on the same good seeds and good treatment this year and every year from me. Every order, little or big, is carefully and promptly filled. Of course we like the big orders best. Goodness yes. No use denying that. But your order is going to get our best attention whether it calls for one package of seed or for a hundred.

We want your business and we will do all we can to earn it and keep it coming. Send your orders along. Send them as early as you can. They will be filled with good, healthy, plump seed that are sure to grow and yield the kind of a bumper crop you like to raise—and the plants and nursery stock will be healthy, thrifty growing, well rooted and well grown.

WRITE ME A LETTER, TOO

I always get a great lot of pleasure from the letters from my customers and I would be lost unless I had a big bunch of them to read and enjoy each year. I like them all—long or short—from old customers and new customers. So don't forget to write me a letter this year. I'm interested in how you are and what you're doing and how things have been for you and I hope you are interested in me and my business, too.

Henry Field.

JANUARY 1, 1932

I have planned 3 Contests for you folks this year and will be giving away 198 Cash Prizes to the Winners. You can all enter and you all have a chance to be one of the 198 winners. The complete details are on Page 29. Don't miss them.

There Is A Complete Index on Page 60

HENRY FIELD CO.

A Lesson To All Of Us

and a reminder, too!

This past year ought to be a lesson to all of us and that lesson is sure made plain by lots of letters I am getting from our Garden Seed Customers. One woman wrote that she didn't know what she would be doing this winter if she didn't have a world of things she canned off of her big vegetable garden this last summer.

And another old friend of mine wrote to say she was going to have a big garden all right this year. I wouldn't want to mention her name but here is part of her letter, "We didn't raise as big a garden these last two or three years and I wish you had made us do it, especially this last year. It would mean a lot to my family now if we had a cellar full of canned goods. But it won't happen again. You will soon be getting my garden seed order and I can tell you now it will be the biggest I have sent you for many years. We will have a real grocery store garden and I only wish we had taken your advice to do this last year. We all would be better off."

That is pretty straight talk but I guess we all need it. When times are slow and money scarce there isn't any better thing to do than dig right in and get back to old times by raising every bit of food you can.

Plant a good big, old-fashioned garden—plant enough to give you a lot of surplus to can for next winter. Of course, I want to sell you the seed and my seeds are good, reliable, healthy seed that will live and grow and yield heavy. But I am serious about this and want you to have a good garden and a big garden whether you order your seed from me or the other fellow.

HENRY FIELD

\$1.00 to \$2.00 An Hour For Your Time

An average garden should produce \$100.00 worth of vegetables. Most gardeners say more. 50 to 75 hours work during the growing season should produce them. That would mean between \$1.00 and \$2.00 an hour for the time you put in. It would mean a 10% increase in your income if it is around a thousand dollars a year. And not many of us would kick on a salary increase just now.

A Collection of the Very Best Varieties

Illustrated at the left are some of our choicest varieties. Best in quality and yield. They are a good selection for home use and nearby markets. They are pictured in color on the front page. See regular vegetable pages in the catalog for full description.

Price	Per Pkt.
Watermelon, Stone Mountain	.10
Celery, Golden Plume	.15
Cabbage, Norseman	.10
Parsnip, Hollow Crown	.10
Peas, Little Marvel	1/4 lb. .15
Lettuce, Prizewinner	.10
Egg Plant, Black Beauty	.10
Tomato, Red Bird	.15
Tomato, Golden Beauty	.10
Beet, Detroit Dark Red	.10
Pepper, World Beater	.10
Onion, Riverside Sweet Spanish	.10
Muskmelon, Field's Daisy	.10
Turnip, Purple Top Globe	.10
Cauliflower, Snowball	.15
Carrots, New Coreless Chantenay	.15
Radish, Sparkler	.10
Sweet Corn, Early Sunshine	1/4 lb. .15
Cucumber, Dark Green Slicer	.10
Pepper, Long Red Cayenne	.05
Beans, New Stringless Yellow Pod, 1/4 lb.	.15

1937—SPECIAL OFFER. One packet each of all the vegetables as listed above, 21 packets in all, a \$2.40 value for only \$1.75, Postpaid.

NEW STRINGLESS YELLOW POD
Early, tender, stringless.

We test all our Seed
for Germination before selling.

Beans

Yellow or Wax Podded

One pound of beans will plant about two 50 foot rows. Space 2 feet apart. Some gardeners plant beans quite early and have good luck but it is safer to wait until the ground is warm. Plant every now and then until well into July.

117—NEW STRINGLESS YELLOW POD. A beautiful round pencil pod. Thick tender flesh and stringless. A most delicious bean for table use especially, when flavored with a small strip of Henry Field's bacon. One of the earliest varieties.

114—CHALLENGE BLACK WAX. A black seeded, yellow podded bean, tender and good. Early and round podded and practically stringless. A dandy bean. Don't let snap beans stand around until they are wilty and tough or they will be no better than beans from the store.

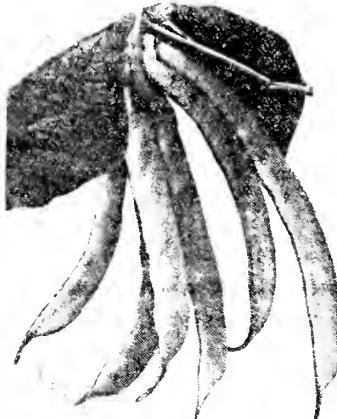

115—DAVIS WHITE KIDNEY WAX. Handsome, long straight, flat pods. Stringy unless gathered early. A good market variety.

121—EARLY WONDER WAX. One of our earliest varieties. Yields a fine crop of pods, tender flesh and of fine flavor. Not a string until too old to use for snaps. Flat pods.

113—ROUND PODDED KIDNEY WAX. Long slender pods, and stringless. Not as productive under our corn-belt conditions as the earlier varieties.

116—GOLDEN WAX. A medium early flat podded bean. Somewhat stringy. Fairly productive.

120—SURE CROP WAX. Long, slender pods, very tender. Somewhat late.

CHALLENGE BLACK WAX

Green Podded

144—BOUNTIFUL. Long broad pods, flat, thick and meaty. Stringless unless full grown. Productive.

167—STRINGLESS GREEN POD. One of the best beans ever introduced; very early and productive. Pods round and stringless even when beans are full size. Delicious flavor, tender and meaty. Several pickings can be made as it continues to bear longer than many varieties.

112—ROUND POD VALENTINE. An old standby. Best in the Valentine class. Somewhat stringy.

FIELD'S FIRST EARLY
Honest to goodness quality.

It is mutually agreed and understood that any seeds or other goods ordered of us may be returned at any time within ten days after receipt if not satisfactory, and money paid for them will be refunded, but we do not and cannot, in any way warrant the crop, as it is depending on many conditions beyond our control.

109—FIELD'S FIRST EARLY. The big, broad, irregular shaped pods make a most delicious snap bean. A real quality bean for home use. On a test for quality made at Le Roy, New York, this variety stood at the head of the bush beans. However, I don't believe that New Stringless Yellow Pod, Stringless Green Pod, or Black Wax and some of the others would be very far behind for they are hard to beat.

Pole Beans

Pole Beans for Green Shell Beans and Snap Shorts.

Plant in hills 4 feet apart each way. Set a bean pole at each hill and draw the tops of 4 of them together wigwam fashion and tie them. Train the beans to these poles. One pound of beans will plant about 25 of these bean wigwams.

130—CUTSHORT OR CORNHILL. An old-time cornfield bean. Late, small pods and used mostly for snaps.

131—DUTCH CASEKNIFE. One of the best as a green shell bean and fairly good as a snap bean. Early and prolific. White seed. This bean is not only good for snaps but especially fine for shell beans. In fact most all the pole beans make good green shell beans.

134—KENTUCKY WONDER. The tender fleshy pods make it one of the best as snap shorts and good shelled unless you object to the brown beans. The pods are tender and brittle and it is claimed by some to be the best flavored bean in existence. The pods hang in clusters. Early and follows the bush varieties in season.

132—HORTICULTURAL OR CRANBERRY. Late, yields first-rate and is good for both snaps and shell beans. They are good in succotash and don't neglect to grow a few of this variety or some other Pole Bean for that old-fashioned New England dish of sweet corn and shell beans.

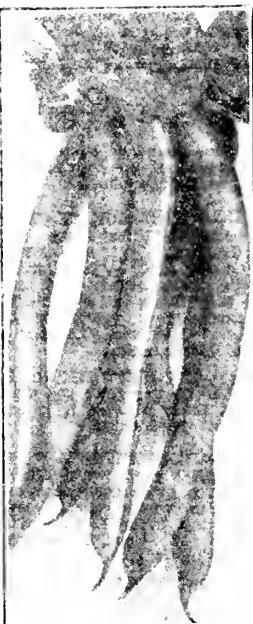

133—IMPROVED MISSOURI WONDER. I don't know of any pole bean that would suit me better than this one. It is early, fine for snaps or as a green shell bean. Stowell's Evergreen sweet corn and this bean make splendid succotash. Store the dry bean for winter use. Good in soups and stews. Yields heavy, the long pods hanging in clusters.

139—KENTUCKY WONDER WAX. Produces a very large, handsome yellow pod, brittle, meaty, and of good quality.

137—WHITE SEEDED KENTUCKY WONDER. An early tender little bean preferred by some because of its white seed.

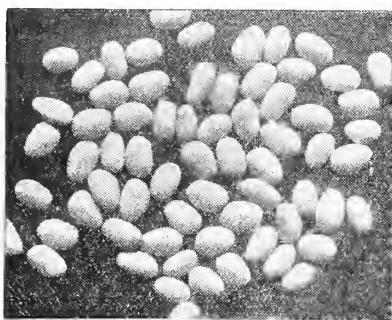

STRINGLESS GREEN POD
Very tender. Plant some for canning

IMPROVED MISSOURI WONDER

**GROW
YOUR
OWN
BOSTON
BAKED
BEANS**

WHITE WONDER

They are fine boiled, baked or in soups.

128—RED KIDNEY. Why buy Canned Beans when you can "grow your own" and also "can your own" cooking with a National Pressure Cooker and seal the cans with a National Sealer, and if you will add a little of Field's bacon you have a superior article flavored to suit your own taste. Or you can carry the Red Kidney through the winter dry.

104—GREAT NORTHERN. A white bean for winter use. Larger than the navy and rather flat in shape. There is a lot of good food in dry beans, and cheap food, too.

102—WHITE WONDER. The little white navy bean. Sticks to the ribs during cold winter weather. For your winter's supply plant the Navy beans in June and don't forget them. They are mighty fine with pork or baked or in soups. Be sure and have plenty at corn husking time and all through the winter for that matter.

Lima Beans

One pound of bush limas should easily plant 100 feet of row and one pound of the pole limas 100 hills or more. Wait until the ground is warm, then plant.

126—FORDHOOK BUSH LIMA. Big plump, well filled pods. Seed thick and meaty. It is as early or earlier than any other large Lima and yields well. Bush sturdy and erect. Just as they reach full size shell and can a few of this variety, or some other Lima. They are fine and especially good in succotash.

145—BURPEE'S IMPROVED BUSH LIMA. Better than the old Burpee's Bush Lima because it is earlier and larger. Seed thick.

127—HENDERSON'S BUSH LIMA. A small seeded white Lima, fine to use as a green shell bean or to store dry for winter use. Bears earlier than any other Lima and continues until frost. Good in succotash, or in vegetable soup.

140—EXTRA EARLY LIMA. A small white Pole Lima fine either as a green shell bean or for winter use. The beans hang in clusters and are easily gathered. Continues to bear until quite late.

142—EARLY JERSEY. The best large seeded Pole Lima for the Middle West. Most Pole Limas are too late. This one is early and productive. Occasionally use this or some other large Lima as a substitute for meat. They are rich in protein.

HENDERSON'S BUSH LIMA
Very prolific.

**Washington Customer Has Great Success
With My Melon Seed**

"Our melons were the best last year they have ever been and the best I've ever seen in this county. We have exhibited them at County Fair and last year our 4 H Garden Club put an exhibit in J. C. Penney Store, Vancouver, Washington, on main street and your melons were the center of attraction. We have found Kleckley Sweet the best for our conditions."—BEALL BROTHERS, RIDGEFIELD, WASHINGTON.

Nebraska Customer Grows Her Own Groceries

"Okra grows very well (beautiful as a background in the flower border with Castor beans), and is a very good dish when rolled in egg and cracker crumbs and fried. Also can be used in soup with celery."—MRS. GEORGE MORTEN, RT. 2, Box 35, HARTINGTON, NEBR.

GROW YOUR GROCERIES.

Supply Your Own
Needs With My
Reliable Seeds

**Tender Half Grown
Beets Are Best**

Make your first planting early using about one ounce of seed to 100 feet of row.

602—CRIMSON GLOBE. A handsome appearing beet and of good quality and will suit you all right if you do not object to some white zoning.

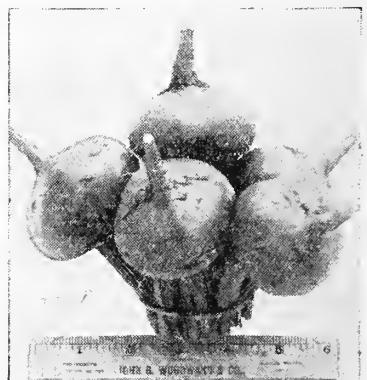

DETROIT DARK RED

604—DETROIT DARK RED. Flesh a deep, rich red with no light zoning. Medium sized, globe shape, crisp and sweet. They make the most beautiful dark red sweet pickles and are just about ideal for canning whole.

607—EARLY WONDER. I think this is the best real early variety to be found. A bright red with some zoning. It is rounding flat in shape, smooth, tender and sweet. When about half grown are splendid to use for creamed or buttered beets.

603—CROSBY'S EGYPTIAN. An early well-known variety. Turnip shape, bright red flesh with some zoning. Begin using them when quite small, thinning out to make room for those that are left.

605—EXTRA EARLY ECLIPSE. Bright red, globe shape and grows to good size. Planted late a good variety for winter use.

EARLY WONDER
Use them while they are small and tender.

Stock Beets

Feed Mangels to the Chickens and Increase Egg Production

Use at least 10 to 12 pounds of Seed to the Acre. Plant Early.

They make cheap feed.

They increase the value of other feeds when fed with them.

They are a valuable crop, especially for dairy-men and poultrymen.

They can be fed with profit to any stock that will eat them.

They keep your stock in better condition and increase the milk flow and egg production.

In feeding poultry "green feed makes green-backs" and in winter the mangels furnish the "green feed."

A tremendous amount of feed can be grown from an acre of mangels. Records of yields are almost unbelievable.

620—GIANT SLUDSTRUP. Very large, oblong and easily pulled. The Danish Department of Agricultural reports this variety the best. Mangels are an important crop over there. They are fed mostly to dairy cows.

619—MAMMOTH LONG RED. Called by some "Gate Post" because of its large size. Grows well out of the ground and is easily harvested.

616—GIANT FEEDING SUGAR. Is a true stock beet. It grows half or two-thirds out of the ground which makes it easy to harvest.

617—GOLDEN TANKARD. A squared oval in shape, and sets entirely on top of the ground.

MAMMOTH LONG RED

Cut in half length-wise and feed to the chickens.

616—GIANT FEEDING SUGAR. Is a true stock beet. It grows half or two-thirds out of the ground which makes it easy to harvest.

617—GOLDEN TANKARD. A squared oval in shape, and sets entirely on top of the ground.

A little work,
A package of seed,
Supplies your family
The cabbage you need.

Plant the seed in the house hot-bed or cold frame six weeks or more before you expect to transplant to the garden.

Seed for your winter cabbage should go in the ground the latter part of May in this latitude. Plant the seed right where it is to grow and save transplanting.

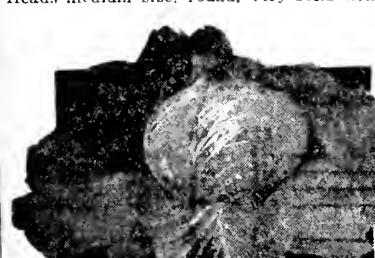

522—EARLY JERSEY WAKEFIELD. My strongest recommendation for this variety is its earliness. Comes ahead of anything else. Small, solid, pointed heads just the right size for one meal. Plants can stand close together which is quite an advantage in a small garden.

518—CHARLESTON OR LATE WAKEFIELD. Not as early as Early Jersey Wakefield but larger.

516—ALL-HEAD EARLY. Fine as a midseason or summer variety. Heads firm, rounding-flat; flesh crisp and tender. We suggest you use this variety for midseason, Norseman for early, and Surehead for kraut and winter use.

527—NORSEMAN. Valuable as an early variety and will also keep well for winter use when planted late. Crisp and sweet flavored. If I could plant only one variety I would be perfectly happy with this one. Almost if not quite as early as Early Jersey Wakefield. Heads medium size, round, very solid with leaves closely overlapping.

ALL HEAD EARLY

523—MARION MARKET. Some gardeners lose their cabbage through a disease known as Yellows. No treatment will kill the disease. The disease does not trouble Marion Market. It is very similar to Norseman, Golden Acre or Copenhagen. Early, hard round heads.

My Seeds Are Field Tested

The reason my customers have such success with my Garden Seed year after year is that I have stuck to the best quality seed. I know it is good before it ever gets into a package. Right here at Shenandoah we plant acres of trial plots of seed. We watch them and check them and only the best gets into our packets. That kind of seed is the only kind you can afford to have on the place.

CABBAGE NORSEMAN
A very hard head, sweet and crisp.

Late Cabbage for Storage and Kraut

532—HOLLANDER OR DANISH BALLHEAD. The heads are round, medium to large size, solid and heavy. The flesh is fine grained, tender and mild flavored. Ours is the famous "Short Stem" strain of this variety. During the winter shipped and sold in all parts of the country. Sell your surplus.

539—CHINESE CABBAGE. It can be used any way that cabbage or cauliflower can, or as lettuce is used. Plant same time as late turnips.

533—SUREHEAD. A medium to large winter variety. With average conditions every plant should make a head. Flesh firm, good quality. Fine for kraut. And don't fail to make up plenty of kraut.

535—PREMIUM FLAT DUTCH. A well known reliable winter variety. Heads firm, of good quality.

SUREHEAD—A good late variety

"Full of Vitality," says Missouri Customer

"My mother bought seeds from Henry when I was a small girl in dry Oklahoma, and she always raised a garden and flowers. I have bought seeds from our home stores and Henry also, and find your seeds come 100% and true to name and full of vitality, and best for our state!"—MRS. G. C. JACKSON, CLAY STREET, CHILLICOTHE, MISSOURI.

Frost Proof Cabbage Plants Good Roots, Fresh Plants, Carefully Packed

Hardy outdoor grown, wintered over plants. They will stand our spring frosts and bad weather without serious setback. We can furnish them long before most home grown plants are ready. Set them out about the time or very soon after you make your earliest garden and grow some real early cabbage. Sold in even one hundred lots of a variety. Wakefield, Norseman, Allhead, and Early Flat Dutch. Postpaid price. 45¢ for 100; 85¢ for 200; \$1.50 for 500; \$2.50 for 1000.

CAULIFLOWER, DRY-WEATHER

558—**EARLY SNOWBALL.** Beautiful snowy white heads, very early, compact, tender and of good quality.

222—**BROCCOLI, ITALIAN SPROUTING.** Something like cauliflower but stands hot weather better. Do not confuse it with Brussels Sprouts. Brussels Sprouts is no good under Cornish weather conditions and Sprouting Broccoli is. Has a very mild agreeable flavor. Plant a package this spring and try it.

Celery

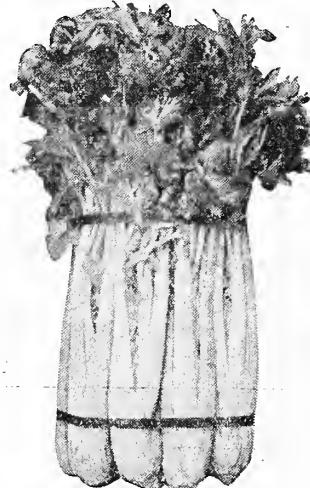

Good Varieties for the Home Garden.

It is not hard to grow. Detailed instructions on the back of each package of seed.

661—**GIANT PASCAL** is the best for Winter use. It is a rank grower, hardy, disease resistant, but is not ready for use until stored, then it will bleach out and produce celery of the finest quality.

662—**GOLDEN SELF BLEACHING.** Stalks are tender and of fine quality. Hearts are firm, crisp and delicious. A golden yellow easily bleaching to a creamy white.

660—**GOLDEN PLUME.** This variety will produce, in your own garden, crisp, tender celery with that good flavor that you very, very seldom find in shipped in celery. With ordinary care and good soil Golden Plume will produce large, handsome bunches, a golden yellow when bleached. Stalks crisp and tender and a good celery flavor. Not to be compared with store or shipped in celery.

GOLDEN PLUME
Celery from your own garden is tender and good.

Nebraska Customer Gives Spinach Recipe

"My boy likes the spinach either cut up with lettuce and a few slices of bananas added as a special treat or boiled without much water, in a waterless cooker, drained, and seasoned with pepper, salt and butter and covered with slices of hard-boiled egg. The egg appeals to most children and I find the less I mention the spinach the better it goes down. I use beet and dandelion greens the same way."—MRS. RAY ASH, 618 SOUTH 3RD STREET, BEATRICE, NEBRASKA.

Supply Your Own
Needs With My
Reliable Seeds

Make a Late Planting For Winter Use

Make the first planting early. Begin using when about an inch thick while they are tender and mild flavored.

626—**CHANTENAY.** A medium sized stump root, deep orange red, smooth and deep and wavy, and store for winter use.

handsome. Tender and well flavored.

627—**DANVER'S HALF LONG.** Medium large, rather pointed and makes tremendous yields. Grow a good supply of this variety for winter storage to be used in soups, stews and in other ways.

628—**LONG ORANGE.** Long slender root, tender and good quality. These carrots eaten raw like a stick of candy clears the complexion. Try it.

630—**NEW CORELESS CHANTENAY.** This variety has a small heart or core which will cook up as tender and sweet as the outside meaty part does. Being tender and crisp it is fine for dicing for salads and soups. The roots are medium size, smooth with a blunt or stump end. Color a deep rich orange.

629—**OXHEART.** Very thick, short, medium sized carrot. Plant this variety for early use, pulling the tender half-grown roots which you will find very sweet and mild.

SEVERAL SWEET CORN PLANTINGS

"We make several plantings of sweet corn so we can have fresh roasting ears over a longer period of time."—Mrs. Carrie Ross, Livonia, Missouri.

NEW COLORLESS CHANTENAY
Use them while young and mild and tender.

Winter Squash Lasts Long Time

"I saved one of the winter squash until July 21st which did not have a speck of decay on it, and made pies for my harvest hands."—ALEX FINNEY, BROOKFIELD, MISSOURI.

Egg Plant

Egg Plant as Good or Better Than Mushrooms

START IN HOUSE OR HOT BED

656—**BLACK BEAUTY.** Produces five or six "eggs" to the plant which will average almost as large as a quart cup when ready to use. They have a rich meaty flavor. Color a purplish black.

Cool and Crisp if You Grow Your Own.

Plant when the ground is warm. Figure about three dozen hills to a packet of seed or 100 hills to the ounce. For late pickles plant some in June.

Pickling Varieties

351—CHICAGO PICKLE. Very productive. It is also early and will resist disease to some extent. Small and well shaped fruits, suitable for small sweet pickles.

357 — EVERGREEN. Dark green in color and fine for dill pickles.

358 — EVERBEARING. A short early sort used for pickles. Fairly prolific.

356—HEINZ'S PICKLE. This variety of cucumber is used by pickle factories. It sets on thick and can be cut for small pickles or will make dill pickle size. It has been carefully selected for size, quality and production, until it is just about perfect as a pickle variety.

EVERGREEN CUCUMBER

HEINZ'S PICKLE

Make your own dill and sweet pickles

352—NATIONAL PICKLE. The national organization of pickle growers have been working on this variety for a number of years and at great expense. It has all the characteristics of a good pickle cucumber, that is, productivity, size, shape, color, and vigor of plant.

Slicing Varieties

364—DARK GREEN SLICER. Handsome, smooth, straight fruits of a deep green color and "stays Green" a long time. Flesh firm and crisp and pure white. A mighty good slicing variety. Spongy, shipped in slicers will never equal this one grown in your own garden.

354—EARLY CLUSTER. Like most earlies it turns yellow quickly and should be used while comparatively small.

361—IMPROVED LONG GREEN. A long slender dark green slicer. A wonderful slicing variety and fairly prolific. The improved strain, which we offer, produces few seeds, which makes it all the more desirable. The small fruits make a nice slender pickle but it is hardly prolific enough to make a real good pickler.

353—EARLY FORTUNE. A good appearing cucumber, skin smooth and an intense dark green color. Fruits are uniform, crisp and tender. Remains edible longer than most varieties. Very prolific.

363—WHITE SPINE. This is the Arlington strain of this variety. It is medium early, medium size, with very good color. It is an old variety and still sells fairly well. However, there are several varieties showing the white spines instead of black that are an improvement.

Use cucumbers while they are fresh and after they have been thoroughly cooled. They should not be eaten with the sun heat in them.

DARK GREEN SLICER

360 — HENDERSON'S PERFECTED WHITE SPINE. A medium early slicer, dark green shading to lighter green at blossom end. Flesh is firm, crisp and of good quality. Much darker and longer than the White Spine.

EARLY FORTUNE

The secret of growing head lettuce:

Plant early,
Plant on rich soil,
Do not allow plants to crowd.

One packet of seed will plant about 50 feet of row.
Plant early.

Head Varieties

504—HANSON. Leaves curly and form a loose head.

505—ICEBERG. Forms a large compact head, bleached to a creamy white on inside and very sweet and tender. A dandy head variety for home use.

506—MAY KING. A small variety forming a compact cluster of leaves.

507—NEW YORK OR WONDERFUL. Used almost altogether by the commercial growers out west. Forms a compact head of good quality. It likes cool weather and rich soil. Makes a nice head.

LETTUCE, NEW YORK OR WONDERFUL

512 — CABBAGE HEAD. A round, firm, well bleached head. Trial ground reports say, "Quality excellent, delicate, sweet, buttery in flavor." Leaves are thin and tender and are crumpled and wrinkled and form a tight head. Season early to intermediate and surer to head under mid-west conditions than other varieties.

Plant both Loose Leaf and Head Lettuce. See next page for best Loose Leaf Varieties.

LETTUCE CABBAGE HEAD

Forms a long tight cluster of leaves. Should be bleached.				

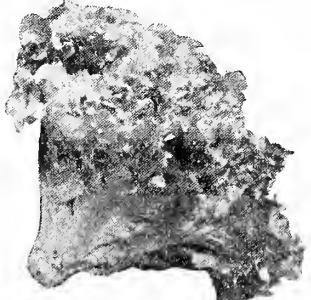

Loose Leaf Lettuce

Both the Simpson varieties are fine loose leaf lettuces

513—EARLY CURLLED SIMPSON. A quick growing hardy variety. Crisp, light green crumpled leaves of good quality. While it is not a head variety it forms a tight bunch of leaves at the center, which are very tender and sweet. Plant a little of this as soon as the snow is off and have a few messes of real early lettuce.

511—PRIZEHEAD. The heart forms a tight cluster of leaves which are very crisp and tender. Leaves tinged with brown, curled and crumpled. It is sweet and mild flavored after hot weather begins, which is unusual in a lettuce.

LETTUCE, PRIZEHEAD

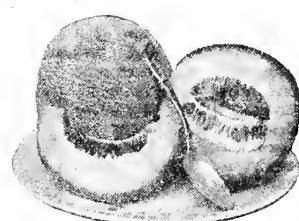

534—GREELEY WONDER. I well remember the first one I ever sampled and I thought at the time that certainly a person could not ask for anything much better. Rich orange colored flesh, fine grained, fairly early, large, well-netted and almost round in shape.

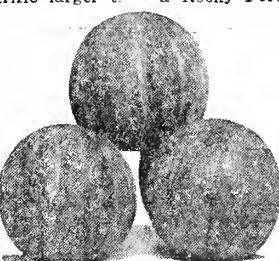

For a large melon Greeley Wonder is especially fine. The flesh fine grained, which is not always true in a large melon. The flesh thick and a deep orange color. If you want a large melon of real quality, plant on rich soil or enrich the soil by spadling in two or three shovels of well rotted manure in each hill and you will grow melons fit for a king.

340—WHITE SEEDED DELICIOUS. One customer said "none in our family and we all like it." Another "Eat one and the appetite calls for another." It is a medium sized well-netted melon; flesh firm, fine grained and a rich salmon color.

330—EARLY HANOVER. A new melon said to be the earliest yet. Has been known to ripen in sixty days. Green meated and a trifle larger than a Rocky Ford.

GREELEY WONDER

FIELD'S DAISY

Rocky Ford type, medium large seed cavity, rather uneven in size and shape. Vigorous, productive and almost always good to eat. We recommend it principally because of its earliness and productive ness. Orange yellow flesh.

345—HEARTS OF GOLD. Gets its name from the golden-yellow flesh, which is very sweet and fine flavored. Almost round, fairly well netted, medium early and productive. Very popular with the fancy trade in Michigan. Let them ripen on the vine for best quality. I guess we will all agree that any vine ripened melon is better than shipped in melons.

337—HONEY DEW. Very highly flavored with a different flavor from that of an ordinary muskmelon. In size 6 to 8 inches in diameter. No ribs or net but quite smooth. Not a sure crop in the corn-belt. Does well in the west.

341—OSAGE. A medium sized melon of fine quality. Slightly ribbed and netted. Flesh a rich orange and very fine grained. The flavor unusually good. Very popular in the middle west.

342—PERFECTION. An old-time melon that still has many friends. Yellow skin and orange flesh. Well netted for so large a melon. Size 6 to 8 inches in diameter. The quality of the melon nearly always good. Occasionally a melon is a little coarse or lacking flavor.

343—POLLOCK TEN TWENTY-FIVE. The small Rocky Ford type. Orange flesh, well netted and a good shipping melon as well as high quality. Grow them on rich soil and you will produce a wonderful crop of little melons.

345—GREEN MEATED NUTMEG. Rather small but very early. This is the old-fashioned nutmeg melon of a generation ago. One of the first to ripen. Quality fair to good. You should not depend on this variety alone but grow a later variety for main crop.

336—HONEY ROCK. One of the new varieties that is quite promising. A deep orange flesh, tender and sweet. Not as heavy a net as the Rocky Ford melons and considerable larger. A trifle oblong in shape, 4 to 6 inches in diameter. Yields very well. Quite popular in Ohio, Indiana and Michigan.

329—EDWARD'S PERFECTO. Heavily netted, which is important in a shipping melon. The flesh of salmon color and good quality. A small slightly oblong melon, small seed cavity if grown on good soil.

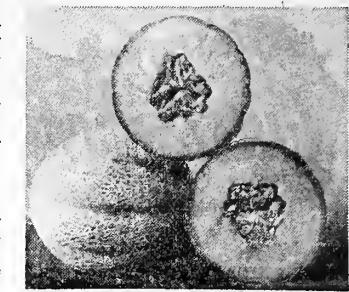

326—BANANA. It looks something like a huge banana but doesn't taste like one. From 15 to 24 inches long; quality fair.

344—STANDARD ROCKY FORD. One of the varieties upon which the melon shipping industry was built. Green flesh, well netted and very good quality.

327—BURRELL'S GEM. Larger than the Rocky Ford, oblong and inclined to crack at the end during a rainy spell. Flesh a deep pink and usually thick. Quality fine.

328—CALIFORNIA CREAM CANTALOUP. Early, quite large heavily ribbed. Quality fair.

331—EXTRA EARLY HACKENSACK. Large round in shape, heavily ribbed, quality fair. Green flesh.

**Buy Your Seed of a
Seedman Because
He "Knows His
Onions"**

Plant early. One ounce
of seed to 100 feet
of row

303—RIVERSIDE SWEET SPANISH. The biggest yield of onions we ever had here at Shenandoah was some Riverside Sweet Spanish. They made us at the rate of more than 679 bushels per acre. They were mighty nice onions, all large, even size, ripening uniformly. It is a wonderful onion. It is a mild onion, a splendid keeper and shipper and a vigorous grower that is not affected by thrip as much as other varieties.

RIVERSIDE SWEET SPANISH

Something wrong here. The onions are very large or the basket quite small. Maybe a little of each, for this variety grows large.

PRIZETAKER

304—GIANT PRIZETAKER. Probably the largest onion grown. Good quality, keeps fairly well, globe shape and color a straw yellow. Fairly mild.

308—OHIO YELLOW GLOBE. A good market sort. Keeps and ships well. It is all right for home use too. Medium size and a deep yellow. Nice looker.

305—LARGE RED GLOBE. This has been a leader among the red onions for years. A fine keeper and sells well on a market calling for a red onion. Medium size.

LARGE RED GLOBE

306—MOUNTAIN DANVERS. A mighty good variety where you need an early onion. It is a good bronzy yellow, a splendid shipper and keeper, medium to good size and almost a globe shape. Seed grown in Colorado.

316—MOUNTAIN RED GLOBE. The seed of this variety is grown in Colorado at an altitude of over seven thousand feet. The strain was developed in that section and consequently is much earlier than the Large Red Globe. It has the same good color, size, shape and keeping quality, and is earlier.

309—RED WETHERSFIELD. A good old standby. Sometimes almost as large as a saucer. Flat and keeps well but not a good market sort and doesn't yield like the globes.

312—SOUTHPORT WHITE GLOBE. One of the best among the white onions. Keeps well.

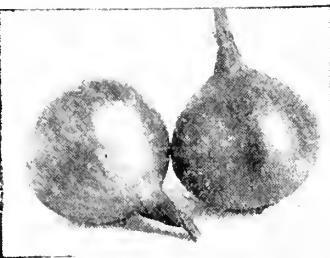

Earliest — Best — Heaviest Bearing

"Your Early Sweet Pimentoos are the earliest and best and heaviest bearer I have ever tried. Thanks. Your English variety of peas are fine, too."—ROBERT WILLERTON, ARLFNGTON, IOWA.

**311—SILVERSKIN OR
WHITE PORTUGAL.** Another good white onion earlier than Southport White Globe, somewhat flattened. Keeps well.

**314—YELLOW GLOBE
DANVERS.** A very popular variety. Medium size, round, solid and a good keeper.

Don't forget to send me some pictures of the things you raise from my seeds. You may win a Cash Prize.

YELLOW GLOBE DANVERS

Early Bunch Onions Grown
From Sets

**Bermuda Onion Plants
A Very Mild Sweet Onion**

This is the big, mild, sweet onion that is grown in Texas and sold on the northern markets at high prices. We have found that by growing them from plants we can grow them just as large and mild and sweet as they do in Texas.

Order the plants early. We turn down orders every spring that reach us after we are sold out. Set them out when you make your first garden. They will stand a little frost without injury. They must be ordered in even amounts as specified below. Crate orders for the far west will be shipped direct from growing station. Prices 300 for 40¢; 500 for 75¢; 1,000 for \$1.25; 3,000 for \$3.00 postpaid. Crate of 6,000 for \$4.00 not prepaid.

Onion Sets

While you are especially hungry for green stuff you will want a few messes of early green bunch onions when green vegetables are scarce. A tender young onion with bread and butter is mighty good, and healthful, too. You can grow these from sets, either yellow or white. Take your choice. 1 lb., 25¢; 3 lbs., 65¢.

Illinois Customer Plants 3 Varieties of Peas

"My crop of peas are always a wonder to my neighbors because I get so many pickings from them. I plant Alaska and Improved Extra Early for early peas and Little Marvel for the later crop."—MRS. IRA CALE, 519 S. McARTHUR STREET, MACOMB, ILLINOIS.

Wins 1st Prize With My Onions

"I got one thousand plants from the Henry Field Company. After a family of eight used out of them all summer, and sold to the neighbors, we pulled eight bushels. They were so nice we took a peck to the County Fair. (It took sixteen to make a peck), and they took first prize."—MRS. MARTHA HOPKINS, UNIONVILLE, IOWA.

Parsnips

S. J. Knox of Blackfoot, Idaho, says: "We have parsnips this year that weigh 3 and 4 pounds." Plant them early on good soil and you can do the same thing.

Some people say they don't like parsnips. If they have been eating a poor grade of "store" parsnips I can't blame them. A small woody parsnip is not much good. However, a well grown parsnip after it has been made tender and sweet by freezing is mighty fine. Store them in a shallow pit so they will freeze. Plant the seed early and they will come up better.

HOLLOW CROWN
A large parsnip is tender and freezing makes it sweet

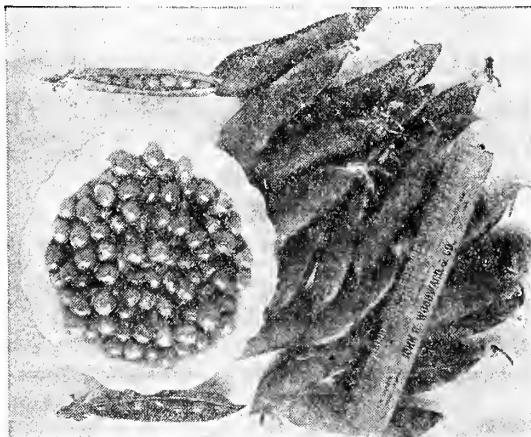

Plan for New Potatoes and Creamed Peas.

Plant smooth seeded varieties very early and others when ground is warm. Use about one pound of seed to 100 feet of row.

Early Varieties

146—EXTRA EARLY ALASKA. One of the earliest varieties grown. They grow about knee high and get very full of rather small dark green pods. This is a hardy variety, the seed is smooth and can be planted just as early in the spring as you can make garden. And a real early mess of these peas will taste much sweeter and better than store peas because they are fresh and tender.

EXTRA EARLY ALASKA

148—IMPROVED EXTRA EARLY. Another dandy smooth seeded early variety that has made sensational records both as to earliness and yield. Dwarf vines and medium sized well-filled pods. Try planting this variety very early when you make your first garden and follow later with Little Marvel. And you might finish the season with Stratagem or Alderman. And then don't wait another whole year before you have another mess of home grown peas. Can a few.

151—LAXTONIAN. The shortest vine of any with a pod as large as the largest. Very early for a wrinkled variety. Yield fair and quality very sweet and good.

152—LITTLE MARVEL. It is an early dwarf wrinkled pea. Its strong points are yield and quality. The vines are simply loaded. The pods are medium size and crowded full of peas. They are

Supply Your Own
Needs With My
Reliable Seeds

Plant early, figuring an ounce to 200 feet of row.

tender and sweet. Use this variety when you have new potatoes and creamed peas. The value of your crop of these peas ought to be mighty close to 10 times what the seed cost you. And quality! You will have quality that simply can't be beat by anyone.

161—ENGLISH EARLY. We have three large podded, dwarf varieties of which this is the earliest. They are all the wrinkled or sweet peas. Plant all three at the same time, when the ground is warm and one will follow the other, making very good succession.

147—FILLBASKET. It "fills the basket" quickly because the pods are large and there are lots of them. One of the smooth-seeded sorts that should be planted very early. It is not necessary to support the vines.

150—GRADUS. Grows a tall, slender vine which is sensitive to dry weather and heat. For this reason the yield is not certain but the quality is good.

LITTLE MARVEL

Midseason Varieties

159—DWARF CHAMPION. Plant these for your main crop and to follow a variety such as Fillbasket. A good one for home canning as it yields well. The pods are medium sized, well filled and of good quality.

160—DWARF GRAY SUGAR. The pods have a tender hull and can be broken up and cooked, pods, peas and all, just like string beans. Properly seasoned they make a good dish.

162—ENGLISH SECOND EARLY. Much the same as the English Early but later.

154—PREMIUM GEM OR LITTLE GEM. Is a good dwarf variety. Little Marvel is something like it but better.

DWARF CHAMPION

149—AMERICAN WONDER. An old standard variety, very dwarf and medium early.

Late Varieties

167—ALDERMAN. The best among the "stick peas" or tall late varieties. It should be "brushed" or trellised. Very large dark green pods. Bears continuously for a longer time than other varieties. Quality fine.

163—ENGLISH MAIN CROP. Late, large pod peas. Dwarf.

165—STRATAGEM. Is an old reliable, large-podded variety of very high quality. It has a dwarf vine and this is the principal difference between it and Alderman.

157—EVERBEARING. If season is favorable it will continue to bear longer than most varieties. Medium sized well filled pods and quality very good.

Start the Plants in the House or Hot-Bed

They are all mild and sweet except the Cayenne, which is supposed to be hot and the Bullnose which is just a little peppery and fine for pickles.

639—EARLY SWEET PIMENTO. Very sweet and mild, round flat in shape, medium size, thick meat, bright red color when ripe and never hot or biting. Can be used in many ways and just the variety for sandwiches and cheese salads. It is very early and will produce a big crop before frost. It yields well. The picture on the left does not show all the fruit on the bush. They hang quite thick. The flesh is crisp and sweet and has a very agreeable flavor when eaten raw.

642—GOLDEN QUEEN. An old time variety that turns yellow when ripe. It is no better than others although a very good sweet pepper.

641—WORLD BEATER. A medium large mango pepper, thick flesh, sweet and crisp. May be used for any purpose but especially fine for stuffing. Somewhat larger than the old Ruby King.

646—EARLY SWEET NEAPOLITAN. Flesh not as thick as that of the later varieties but is sweet and mild. Early and prolific.

649—CALIFORNIA WONDER. Something new in a mango pepper. A very sweet, thick fleshed variety, red when ripe. One of the largest, if not the largest variety grown, running around 4½ inches long by about 4 inches through. Midseason to late, and prolific.

640—CHINESE GIANT. The largest of all mango peppers but late and does not set on heavy except farther south.

645—RUBY KING. It is a medium sized pepper, sweet and tender and medium early. An old well known variety. The bush hangs full and you can pick a lot in no time.

644—PERFECTION PIMENTO. Formerly listed as Spanish pimento. The well known heart-shaped or pointed variety. Not as prolific in the North as farther south where the seasons are longer.

643—BULLNOSE. It is sometimes used for mangoes, but some are a little hot for that and not quite large enough. It is best used in pickles.

636—LONG RED CAYENNE. This is a real red-hot kind; grows 3 or 4 inches long, and bush loaded with peppers. Pull just before frost and hang up on the rafters of the barn to dry.

HARRIS EARLY GIANT

A LETTER FROM WAY DOWN IN NEW MEXICO
"My dad in Missouri always buys from you so I decided to, also. Last year our "drug store" seed hardly came up after watering them good."—MRS. H. W. HURD, ALBUQUERQUE, NEW MEXICO.

SURELY LIKE MY "PRIZE-HEAD" LETTUCE SEED
"Hurrah for 'Prizehead' lettuce. We always plant it. Most of the old-time neighbors are dead and gone, but I can remember when they came here in spring to get a little of Uncle Billy's brown lettuce seed. No one knew the name of it then but of late years we buy the same kind from Henry Field Company under name of Prizehead."—MRS. D. E. WITMER, ANKENY, IOWA.

2222 2222 2222 2222

POP CORN

For the
Boys
and
Girls
and
Everybody

The upper two grains of popped corn, JAPANESE HULLESS. The lower two grains, SOUTH AMERICAN. The quality of both fine.

197—SOUTH AMERICAN. Something new and extra good. Our popcorn stands located at our branch stores and here at Shenandoah prefer this corn to any other because of its good quality and attractive appearance after being popped. It pops out a very large fluffy grain, a creamy yellow. It tastes just as good or better than it looks and that is extra good. It is very fragrant, has a good flavor and fairly melts in your mouth.

It is a yellow corn, large ear, smooth grain and yields heavy. Very seldom a stalk but what has two or more ears and some as many as four good ears.

195—JAPANESE HULLESS. Pops out snowy white, very tender and without the annoying hulls. Has a sharp pointed, deep grain, and a short chunky ear.

"SPENDING MONEY" FOR BOYS

Here is a chance for some enterprising boy to make a little money. A piece of ground the size of a town lot should produce around 500 pounds of South American popcorn. The main thing in producing a good crop is good soil and keeping the weeds down. Don't undertake more than you can do well. Sell from house to house. It keeps better in the ear than shelled and for this reason sell it in the ear if possible.

DON'T BACKSLIDE AT GARDENING TIME

Times are about what we make them and I want you to make them better this year by digging in and planting a good, big garden. For only a few dollars you can have a great, big grocery store and everything will be twice as good when you get it fresh from the garden.

Probably it won't be considered nice to see any silver lining in the hard times we've all been going through but if they teach us all to get back to good, old-fashioned gardens it will help some.

I guess we were all spoiled a little when we were having flush times. Got out of the habit of raising our own food and were satisfied to buy it from some one else or even wait and get several cases of canned goods.

Well, I'll be glad to sell you canned goods. We have them for sale and like to sell them. But you and I and the whole country will be better off if we get back to old times and put in the kind of gardens we used to plant.

You can live off the garden with fresh stuff three or four months of the year and, if you're a mind to do it, you can put up enough of the surplus to just about feed you the year 'round.

There's only one caution and that's to get good, reliable seed whether you get it from me or not. You can be sure of good seed if it comes from me and of course I will be glad to have your order, the bigger the better.

The Seed That Yield
Are Sold By Field

HENRY FIELD CO.

11

Pumpkins

If you are a little crowded you can plant them along the edge of the corn. They will do fine there. Grow your own "pie timber" and plenty for your stock as well.

762—BIG TOM. Yields a heavy tonnage of mighty good stock food. Round to oblong in shape, skin a reddish-yellow; flesh a deep orange.

766—SMALL OR RED SUGAR. One of the best Pie Pumpkins. Early, small, prolific, fine grained, cooks quickly and of good quality. One grower of this variety reports 62 pumpkins from one vine, none less than two pounds in weight. Can you beat that?

761—BUFF PIE. Fine grained, flesh thick and of good quality. Rather flat in shape, grows to a good size, yields heavy and is used for stock as well as the table.

765—WINTER LUXURY. Small to medium size, fine for table use; a good keeper.

763—LARGE CHEESE. The flat, cream colored, well-known "Sweet Pumpkin." Suitable for stock or table. Used extensively for canning.

764—YANKEE FIELD OR COW PUMPKIN. An old standby used for feeding stock. Large and productive. Color a deep yellow.

769—MAMMOTH WHALE. Probably the largest pumpkin grown.

It takes just as much work to plant and hoe and raise a half stand of seed as it does a good stand. So, of course, it pays to plant good, fresh, reliable seed that will live and grow and yield heavy. That's the kind I've built this business on.

Fresh From the Garden They Are Tender and Crisp

Plant early using about one ounce of seed to 100 feet of row.

Make several plantings, say a week or ten days apart, and use them before they are pithy and tasteless. If you like the little early sweet varieties, have them on the table often, during radish season, while they are good.

453—ALL-SEASON MIXTURE. Just about everything in radish varieties in this mixture. You can begin pulling early and use them as they get ready. There will be little round ones, long ones, short ones and all radish colors.

Early Round Varieties

437—CRIMSON GIANT. This is one that most everybody likes. An early round red that will usually stand until it is almost as large as a ball and not get pithy, and that is more than most of the round red varieties will do. Snowy white flesh, crisp and sweet.

444—SCARLET TURNIP WHITE TIP. A very pretty little early radish, and is just as good as it looks. Color a bright scarlet with white tip, tender and sweet.

CRIMSON GIANT

440—EARLY SCARLET GLOBE. This is one you will like for it not only looks good but is very sweet and tender. A round bright red that is among the first ready to use. Rather oval in shape.

441—EARLY BIRD. An early, round bright red, the same as Early Scarlet Globe.

442—FRENCH BREAKFAST. Oblong in shape, tipped white; small, early, very quickly becomes pithy after reaching full growth, but while it is young it can't be beat.

439—EARLY ROUND DARK RED. Most everybody likes it for we sell lots of seed. The name is a very good description of it except that no idea of quality is given and the quality is extra good.

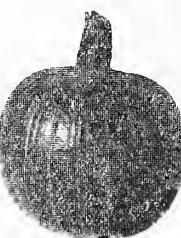

446—SAXA. If you want an extra early variety here it is. A small round crisp radish, just large enough for a nice mouthful. Brilliant scarlet, perfectly round, small top. Crisp, mild, flesh a snowy white.

SPARKLER RADISH

SPARKLER RADISH

When the Frost is on the Pumpkin"

SMALL RED SUGAR

I am taking this space to remind you of all the things you wish you had planted last year. Might as well do a good job while you're at it. Plant lots of different vegetables for variety. Plant enough for table use. Plant the varieties that keep coming in straight through the season. Last but not least, plant enough so you have a surplus for canning.

And if you are ambitious you can make good wages raising vegetables to sell. I got my start that way years ago and there is "pocket money" in it for anyone willing to try.

SCARLET GLOBE

Long Varieties

449—LADY FINGER. A long, slender, white radish, will stand longer than early varieties and not become pithy. Agreeable snappy flavor, liked by many.

WHITE ICICLE
Very sweet and crisp

448—WHITE ICICLE. An early medium long radish, pure white and very tender. It is mild and sweet, in fact, in every way an ideal radish unless you prefer a colored radish to the pure white. We have sold it for years and years and it is more popular now than ever.

451—LONG SCARLET. One of the earliest and most popular of the long radishes. Mild and sweet early in the season, later becoming somewhat pungent which is not objectionable to many people.

454—CHINESE ROSE WINTER. Do not do well planted in the spring but should be planted when late turnips are, during late July. Store them for use later on. Good either cooked or raw.

This Customer Sets a Good Example and She Likes My Seeds

"I ordered some of your Stringless Green Pod. These were the most delicious flavored and so tender and not a string on them. They surely did bear a long time and there are so terribly many beans on each bush. We ate green beans, it seemed everyday for a month, and then I canned twenty quarts and pickled several quarts and put some in with the vegetable soup."—MRS. H. O. FERGUSON, RADCLIFFE, IOWA.

SALSIFY OR VEGETABLE OYSTER—Grow your own oysters.

Salsify or Vegetable Oyster

After the roots have frozen and when properly prepared for the table it has a distinct oyster flavor. Instead of using milk, or milk and cream, use cream diluted with water and the flavor will be vastly improved.

It is one of the best vegetables for soups but there are a number of other ways of preparing it. Try escalloping it as you do oysters, using diluted cream as above. There is nothing finer. Store outdoors in a shallow pit right along with your parsnips.

208—MAMMOTH SANDWICH ISLAND. This is by far the best variety. Long slender roots, flesh white.

Good News From Illinois

"My Kentucky Wonder and Improved Missouri Wonder were a wonder to my neighbors. When they were wishing for green beans in the fall I was picking as many as two good messes a week from mine."—MRS. IRA CALE, 519 S. MCARTHUR STREET, MACOMB, ILLINOIS.

Use Squash Baked and Buttered or in Pies

Plant when the ground is warm in hills 10 to 15 feet each way. For the large seeded varieties figure about 25 hills to the ounce of seed and for the small seeded varieties about 50 hills to the ounce.

736—BANANA. Two feet long or more and 5 or 6 inches in diameter. Skin a grayish green and orange colored flesh of good quality. Has a tough shell but not hard like Hubbard. Keeps well.

740—DELICIOUS. Well suited to its name. Flesh a deep orange, very thick and of good quality. Keeps well through the winter. Very early.

745—GENUINE HUBBARD. Big, warty, hard shelled, dark green Winter Squash; prolific, and a fine keeper. Keeps all winter. A dry, mealy Hubbard, baked and properly seasoned and buttered is certainly good eating.

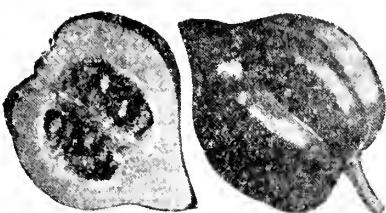

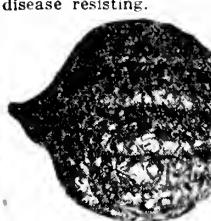

TABLE QUEEN—A good baking squash. When used before half grown, can be used when not more than a couple of inches in diameter. Delicious prepared something like you do Egg Plant. It is very prolific and disease resisting.

KITCHENETTE

753—KITCHENETTE HUBBARD. Has all the good qualities of the large Hubbard and as a rule is small enough for the average family to use at one meal with none to go to waste. A good keeper, flesh fine grained and of splendid quality. One of the best baking squashes. Really yields better than the old Hubbard, both in number of squash and tonnage.

752—TABLE QUEEN OR DES MOINES. One of the finest little baking squashes grown. Also one of the earliest. However, it is not a baking squash alone. It will make splendid pumpkin pies. It is about the size of a quart cup, shaped like an acorn and will keep well for winter use. Said to resist insect attacks.

743—FORDHOOK. For a small squash to cut in halves and bake, it is fine. It is about the size and shape of a big ripe cucumber. Bears enormously! Ripens early and keeps well.

751—SUMMER BUSH CROOKNECK. One of the popular summer squashes. Grows a crooked neck, color a deep yellow. Covered with warts and small bumps.

750—SIBLEY OR PIKE'S PEAK. Looks very much like a Hubbard in shape and color but has a soft shell. Good quality and keeps well.

Here's The Way It Ought To Be Done

"Somehow I am happy in my garden and even happy after a busy day of canning when I look at beans, peas, and so many good things in rows and rows on my basement shelves. I feel safe against hard times for I know my boys are going to have the needed things to make them big strong men."—MRS. G. S. JACKSON, CLAY STREET, CHILLCOTHE, MISSOURI.

For Early Spring Greens

Plant early. Use about one ounce of seed to 100 feet of row.

229—BLOOMSDALE SAVOY. Very early with dark green crumpled leaves. When planted early this soon produces a crop of tender dark green leaves. It is a quick crop and can be followed by other vegetables.

230—GIANT THICK LEAF. Follows Bloomsdale and stands longer without going to seed. Serve it with ham, spare ribs or corned beef.

231—KING OF DENMARK. A large variety, standing until quite late without seeding. Dark green crinkly leaves.

261—BIG GREEN LEAF. Large dark green leaves, tender and of good quality. One of the best varieties for the back-yard gardener. Spinach is good for growing boys and girls and older folks, too. Season it a little and cook it according to some of the newer recipes and you will all like it.

212—NEW ZEALAND. Does not resemble the above varieties, but makes good summer greens. Pull the tender green leaves and more will grow out. Makes a rank growth.

PEANUTS

Fresh roasted peanuts are so far superior to stale warmed-over peanuts that there is no comparison. To be sure of a liberal supply of fresh ones better grow a few. Roast in the oven with a slow fire.

259—EARLY NORTHERN. Earliest and best for the North. The pods are small, well filled and prolific. They will produce a crop in any ordinary season in any country where corn will ripen.

A very large variety.

Fresh Pulled Corn
Has the Best
Flavor

Early Varieties

EARLY SUNSHINE
Very early and
very sweet.

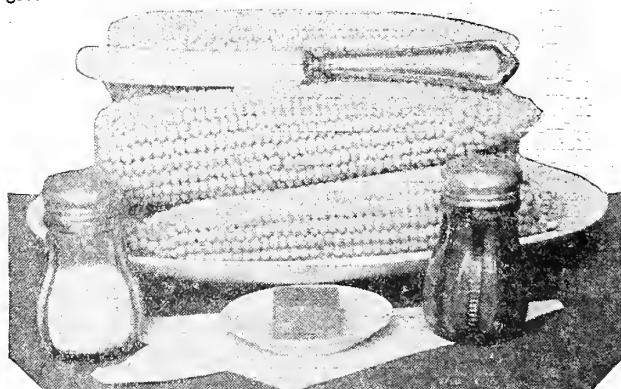

"Proof of the Pudding"

"We have used your seed for several years now and it's reliable, I'm glad to say. One year we bought our seed at a local store in bulk and such a garden! My long row of peas was early and late, whichever you chose. This year we want real seed again."—MRS. PAUL V SNYDER, KALONA, IOWA.

Mid-Season Varieties

180—EARLY CHAMPION. A good sweet corn to follow the very early varieties. Ear medium sized with not a very deep grain but real good quality. This or any other variety will lose its flavor and sweetness if let stand a day or so after being pulled. That is why corn from the store can never equal corn from your own garden.

181—EARLY EVERGREEN. Some earlier than Stowell's Evergreen and should be classed as Midseason.

STOWELL'S EVERGREEN—A splendid variety for home canning.

Supply Your Own
Needs With My
Reliable Seeds

Late Varieties

189—COUNTRY GENTLEMAN. Zig Zag rows, long slender grains, tender and juicy. Medium sized ears, not too large for serving on the cob. Hard to beat for quality. Grow your own and can some for winter use. Fresh corn is so much better to eat than stale corn.

188—STOWELL'S EVERGREEN. We have an extra good strain of this variety this year. Deep pearl white grains that are sweet and juicy. It makes a better canning variety because more good corn can be cut from a deep grained ear. It is just the variety for Succotash, that old New England dish of fresh corn and shelled beans. One of the best varieties for roasting ears. A good all-purpose sweet corn.

187—WHITE EVERGREEN. Resembles very much Stowell's Evergreen. Sweet, deep grained, heavy yielding and stays tender a long time. Gather when "in the milk" and it is very tender, sweet and juicy. You will like it as a canning variety. Ears medium to large. Plan on canning 50 to 100 quarts and cut living expenses and have better quality than you can possibly buy canned.

The Vegetable Garden is the
Most Profitable Ground
on Your Place

This Customer Proves It

"I have three boys, they eat everything that grows in the garden. I canned 300 to 400 quarts, and stored potatoes, onions, celery, cabbage, carrots, squash, etc. If I have any extra canned green beans or vegetables I sell for 25¢ a quart."—MRS. G. C. JACKSON, CLAY STREET, CHILLICOTHE, MISSOURI.

COUNTRY GENTLEMEN

Fodder Sweet Corn
For Livestock

A vigorous growing Sweet Corn that will furnish more and better fodder and ensilage corn than field corn. Also just the variety for the Canning Factory as it will make heavy yields. It is fine for early "hogging-down" and our price is right. Use a peck to the acre for this purpose. Good strong germination. Will be glad to furnish samples and quote prices.

A Good Suggestion

"I plant navy and kidney beans between my early potatoes. When potatoes are dug for early use, it gives the weeds no chance to grow."—MRS. GEORGE MORTON, ROUTE 2, BOX 35, HARTINGTON, NEBRASKA.

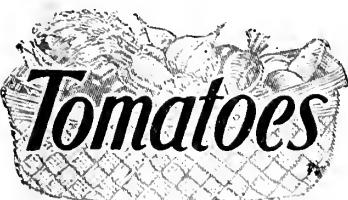

Goes To Her Cellar For A Meal

"I boarded a lot of men and their meals all came out of the cellar and we can still live out of it all winter. I am sure thankful I can go to the cellar for a meal of fruits and vegetables for all the hands I have to cook for. My seeds came from Henry Field."—MRS. J. R. BLANKINSHIP, MAYETTA, KANSAS.

Use Them the Year Round

Plant early in the house or hot-bed and transplant to the field when the ground is warm.

A New Early Tomato

421—Field's Red Bird

This is in my opinion, the best of all the tomatoes we have introduced, and we have brought out some good ones.

It is best described as like the Field's Redhead only more so.

RED BIRD

You can see that they are prolific

It is even earlier than Redhead, an even deeper blood red color, very round and smooth, solid, meaty, a good slicer, and a good looker.

One important point is that it is a uniformly heavy early bearer of all even sized, well colored, and all marketable tomatoes. The originator made a crop of 15 tons per acre last year, and sold \$5,500.00 worth from four acres. That tells the story.

He made big money on them because they yielded heavily on the first set, and came on the market early in July with a big crop of smooth even sized high colored tomatoes. Just what the market wanted, and just when they wanted it.

This Red Bird (so called because of its brilliant red color) originated with a big successful market gardener customer of ours, who was

working for the best early market tomato. He tried all the best earlies he could find, blended them, and selected for a type which he finally fixed.

He wanted extreme earliness, big yield early, high color, smooth even shape and size, solid meaty quality, no cracks or splits, extreme vigor and health of plant, and a tomato that would hold up well in size.

Other Early Varieties

401—RED HEAD. This variety has made us a lot of friends. It is not like so many earlies, bears a crop of rough unevenly ripened tomatoes and then is through. The first of the crop is smooth, well ripened and the last a little smaller but just as good. It is a deep rich red, a little flattened, never rough or wrinkled. It does not crack easily; is very solid and slices beautifully. It bears heavy and can be used for your early canning.

404—BREAK O' DAY. A new wilt resisting tomato introduced by the United States Department of Agriculture. It is very early, smooth scarlet tomato, free from cracking around the stem. Good size and good quality.

408—BONNY BEST. A second early scarlet fruited variety. Tomatoes round and medium size. Something like John Baer. A good tomato.

403—PINK EARLY JUNE. Same season as Field's Early June but pink instead of red.

PONDEROSA—Extra fine quality and large.

402—FIELD'S EARLY JUNE. It looks like Earliana and has the same kind of vine, fruit redder, and much more solid. Very mild and sweet flavor, like the Stone for shape and color. Flesh is solid and few seeds.

RED HEAD

For home use and canning as well as for local markets. One of the best earlies.

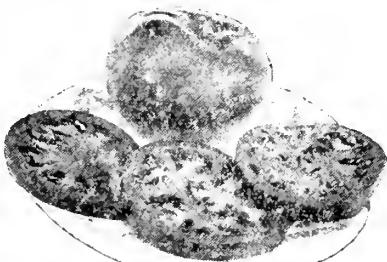

411—LANGDON'S EARLIANA. This is our earliest tomato. A bright red, smooth medium size and a good slicer. With this variety in your garden you can have vine ripened early tomatoes that are so much better than southern tomatoes pulled green and ripened on the way to market. Green tomatoes are colored a beautiful red with Ethlyn gas but according to the United States Department these pre-ripened tomatoes do not contain the vitamins a vine ripened tomato does.

Late Varieties

405—MARGLOBE. Another wilt-resisting variety. Scarlet fruit medium size, smooth, solid and globe shape. This variety is growing in popularity and is suitable for canning as well as slicing.

415—NEW STONE. An old friend of most every gardener. A mighty good canning or main crop variety. Medium to large, smooth, solid, ripens close to the stem, and yields well. Meaty and good flavor. And, by the way, don't neglect to can plenty of tomatoes and cut down on living expenses.

414—MISSISSIPPI GIRL. It is named in honor of the Canning Club girls in Mississippi who made a great success with it. Of the New Stone style, big, smooth, red, solid and sweet.

418—PONDEROSA. Here is a tomato you just can't beat for quality, and that is a pretty strong statement. It is a little harder to grow than others but it is surely worth the extra trouble. It is very tender, meaty and sweet. It

Vine ripened tomatoes are rich in vitamins. Southern grown, artificially ripened are not.

Does exceptionally well trained to a trellis of some kind. It is a good canning variety and best of all served fresh.

412—GOLDEN BEAUTY. We are featuring this tomato in color this year just because it deserves it and has been neglected. It is a pretty tomato, smooth, solid and a flavor a little different from others. It is fine in preserves or any way you care to use them.

416—Matchless.	.05	.35	1.00	3.50	
Medium to large red. Late.					

Use Them Raw and Cooked

Plant some early and some for late crop. The latter part of July and first part of August is the time for late planting.

Try dicing a mild turnip to be used in a salad.

803—EXTRA EARLY MILAN. For spring planting this is good. If used before hot, dry weather it is tender and sweet. Very early, medium size and flat.

804—EARLY WHITE MILAN. No difference in this and Extra Early Milan except in color.

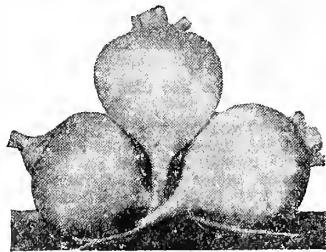

807—PURPLE TOP GLOBE. One of the finest, sweetest turnips we list. Fine grained, tender and flesh a snowy white. In the Central West it is used mostly for late planting but can be planted in the spring. Is satisfactory to grow for stock as it yields big. See that the family is well supplied with good turnips. They are healthful. Try dicing a mild turnip to be used in a salad.

806—PURPLE TOP STRAP LEAF. Something like Purple Top Globe except flat in shape. It is used mostly for late planting. Turnips make good feed for stock, especially milk cows. This variety and Purple Top Globe yield heavily.

805—SNOWBALL. A fine globe-shaped white turnip, and of good quality. Good for early or late.

810—WHITE GLOBE. A late white variety. Store turnips for winter use. They keep well in a cool, damp storage.

808—RUTABAGA, AMERICAN PURPLE TOP. Has smooth leaves like cabbage. Purple top with yellow flesh. Not much of a success here in southern Iowa, but in the northern states they are quite valuable.

PURPLE TOP GLOBE

A Vine Ripened Melon is Best

Plant when the ground is warm and on rich soil. Figure about 50 hills to the ounce of seed.

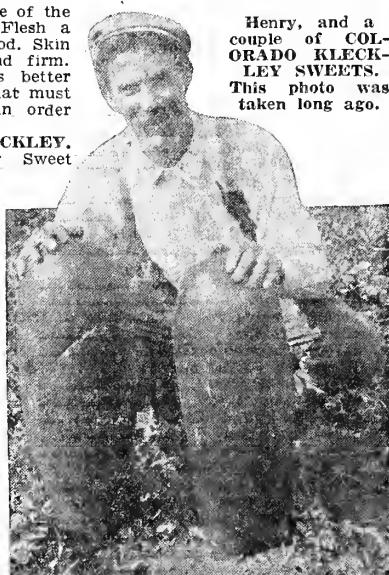

704—COLORADO KLECKLEY SWEET. This is a real quality melon. The flesh is fine grained, tender and sweet. In fact, it is so tender quite often it will pop open as soon as you stick a knife in it. If you want a better melon than this one you are hard to suit. Medium long to oblong in shape and skin dark green. Pull when fully ripe and early in the morning while they are cool.

718—IRISH GREY. One of the best shipping varieties. Flesh a bright red and quality good. Skin light gray; rind hard and firm. A vine ripened melon is better than shipped in melons that must be pulled partly green in order to carry to market.

721—Giant Kleckley. Something like Kleckley Sweet but is much larger, has a tougher rind and carries well. Bright red flesh, crisp and sweet. A big, handsome melon that will sell well and is good to eat.

705—KLECKLEY SWEET. Skin a dark green and flesh bright red, tender and sweet. A very popular melon because of its quality. Rather long or oblong and ranges in size from 20 to 40 pounds. Not always as early as the Colorado Kleckley, but the real thing in a Kleckley. Grow your own and have an abundance, not a tantalizing bite now and then, but plenty for your family and visitors.

Supply Your Own Needs With My Reliable Seeds

724—FIELD'S JUMBO. A very large melon, almost round, flesh red, of good quality. We exhibited three of these melons during our Jubilee week last fall. Two of them weighed 116 pounds each and the third 110 pounds.

717—PRINCESS. I don't know of a medium early melon that is any better or as good as this one. Perfectly round, small individual size, very thin rind, red flesh, sweet and tender.

702—GOLDEN HONEY. Flesh a sparkling golden-yellow. Considered the best of the yellow varieties. Medium size, oblong, dark green striped.

723—VOLGA OR WINTER WATERMELON. Is a distinct novelty in the melon line. It will keep until Christmas or later with ordinary care. Perfectly round in shape; very sweet; small seeds.

707—CHILIAN. Last summer Sam Harris from down in Arkansas sent me one of the finest watermelons I ever tasted in my life. It was a small round melon, deep red flesh, not pink; crisp and fine flavored and tender.

They are medium early and just about the right size to satisfy two people with average melon appetite. I should think they would average 8 or 10 inches in diameter and weigh 15 to 20 pounds. And they are good clean to the rind, solid and sweet.

They have a green rind striped with a darker green. They will carry well to a nearby market. Mr. Harris had such a demand for his melons that he did not get to save me very much seed.

The variety originally came from Chili on the West coast of South America and that is how it gets its name "Chilian."

716—KANSAS SWEETS. A big round melon that looks like the old Kolbs Gem but with the quality and flavor of a Kleckley and brown seed like the Tom Watson. We found it down in Kansas and during the past season shipped in several car loads and sold them to our visitors here at Shenandoah.

Any of you people who visited KFNF last summer and sampled one of those big grayish-green striped melons know what the quality is. It is very tender and crisp with a deep red flesh.

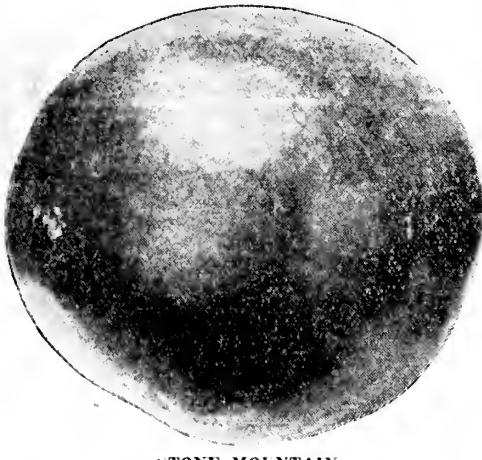

We have only a small quantity of the seed so will sell packets only as long as it lasts.

And From Oklahoma, Too

"I have five seed catalogues before me, they all seem good to look at, but when I think of my lovely garden last year from Field's seed, I just could not send for garden seed elsewhere."—MRS. W. F. GRAGERT, FAIRMONT, OKLAHOMA.

STONE MOUNTAIN

714—STONE MOUNTAIN. One of the finest, sweetest melons grown. Flesh a deep red and very tender. Very large running 35 to 45 pounds or more on good melon soil. Almost round in shape, green, medium thick rind. Some claim the quality is even better than the Kleckley.

HOTCAPS—A Plant Protector

A cone-shaped paper plant cover, a little larger than a man's hat, that is set over the young plant to protect it from frosts and cold weather in the spring. The paper is translucent, allowing the sunlight to reach the plant.

Sold in unbroken packages as follows:

100 Hotcaps, without Setter, \$1.50 postpaid.

200 Hotcaps and Waterproof Hotcap Setter, \$3.00 postpaid.

Watch 'Em Grow Plant Food

Watch-'Em-Grow is a well balanced high-grade fertilizer that will produce a strong vigorous plant, healthy dark green foliage and plenty of flowers, other things being right. It is a clean odorless powder that dissolves quickly in water and can be easily applied to plants as you water them.

Big 8-Ounce Can, 50c, Postpaid

Bug Duster

This "Bug Duster" is inexpensive and handy. It is equipped with a long nozzle so that you will not have to stoop over when you dust your melon or cucumber vines.

Price, \$1.00 each, Postpaid

Henry Field's Plant Spray

NON-POISONOUS TO HUMAN BEINGS, BIRDS, ANIMALS OR PLANTS

Use on vegetables, flowers, small fruits, shrubs, vines and house plants.

This is a contact spray. Will kill and control both sucking and chewing insects. Is easily mixed. Complete directions on each bottle.

Price includes postage and packing

8 Ounce bottle makes 16 gallons of spray solution.....\$.75
16 Ounce bottle makes 32 gallons of spray solution.....1.25
1 Quart can makes 64 gallons of spray solution.....2.00

Kalite

A SAFE QUICK KILLING DUST FOR MOST CHEWING INSECTS

Use Kalite for chewing insects or those that eat the foliage.

Safe to use because it contains no arsenic, lead or copper.

It is claimed to be five times as effective for many insects as arsenate of lead dust.

Use for vegetables, fruits and flowers. Always ready. Use regularly as a protective dust.

"The cabbage worms were so bad this year on our cabbage and I so disliked to use Arsenic, so I sent for Kalite and sifted it over my cabbage and it certainly made away with the cabbage worms and my cabbage is doing fine since."

C. W. Fogarty, Fonda, Iowa

3 1/4 pound can, \$1.00 Postpaid

"We use Norseman cabbage, Golden Acre, Copenhagen Market, Danish Ballhead and Flat Dutch. We always raise all the cabbage we can use for kraut and table use, also put some in cellar for chickens and some years have plenty to sell."—MRS. CARRIE ROSS, LIVONIA, MISSOURI.

ODDS AND ENDS

201—ASPARAGUS, WASHINGTON RUST RESISTANT. Big tender stalks, extremely hardy, prolific and disease resistant. Pkt., 5c; oz., 15c; 1 lb., 45c; 1 lb., \$1.50.

206—BRUSSELS SPROUTS. Pkt., 5c; oz., 20c.

211—CHICORY. Large Rooted. A good substitute for coffee. Pkt., 5c; oz., 20c.

210—CITRON. Red Seeded. Small, striped preserving melon. Pkt., 5c; oz., 15c.

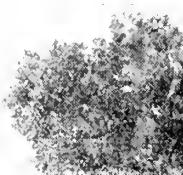

207—COLLARDS. Cabbage leaves without heads. Pkt., 5c; oz., 15c.

218—ENDIVE. Broad-leaved Batavian. Pkt., 5c; oz., 25c.

243—GARDEN LEMON OR VINE PEACH. For preserves. Pkt., 5c; oz., 15c.

298—GARLIC. Tastes like onion, only more so. 5c per bulb; 25c per lb.

214—GROUND CHERRY. Yellow. Used for preserves. Pkt., 5c; oz., 10c.

PARSLEY, MOSS CURLED

216—KALE. Half Dwarf Curled. Pkt., 5c; oz., 15c.

225—KOHL RABBI. White Vienna. Looks like a cross between cabbage and turnips, and is better than either one. Grown like cabbage. Pkt., 5c; oz., 20c.

215—LEEK. Large Flag. Used in soups and for flavoring. Not as sharp or strong a flavor as an onion. Pkt., 5c; oz., 15c.

299—MUSHROOM SPAWN. Per brick, 3c; 3 for 90c, postpaid.

219—MUSTARD. Black. Very early. Goes to seed soon. Pkt., 5c; oz., 15c.

221—MUSTARD. Chinese Curled. Leaves curled and crumpled. This one and the Ostrich Plume make fine greens. Mix them with spinach. Pkt., 5c; oz., 15c.

224—MUSTARD. White. Grown for the seed. Pkt., 5c; oz., 15c.

223—MUSTARD. Ostrich Plume. Well named. Pkt., 5c; oz., 15c.

226—OKRA. Mixed. Very popular in the South. Pkt., 5c; oz., 15c.

227—PARSLEY. Moss Curled. Used for garnishing and seasoning. Helps to remove the odor of onion from your breath. Pkt., 5c; oz., 15c.

SWISS CHARD

228—RHUBARB OR PIETPLANT. Pkt., 5c; oz., 15c.

262—SUNFLOWER, MAMMOTH RUSSIAN. Grown for chicken food. Pint equals one-half pound. 1/2 lb., 10c; 1lb., 25c.

263—SWISS CHARD, LUCULLUS. Large, fleshy, crumpled leaf. Fine for greens during summer. Pkt., 5c; oz., 15c.

232—TOBACCO, WHITE BURLEY. Fine all purpose variety. Pkt., 5c; oz., 35c.

HERBS

A bed of three or four herbs, or more, is mighty nice to have. They can be used in so many foods in place of high-priced flavoring extracts. Their fragrance is pleasing and will be appreciated.

235—ANISE. Annual. Pkt., 5c.

239—BALM. Perennial. Pkt., 5c.

236—BORAGE. Annual. Pkt., 5c.

240—CARAWAY. Biennial. Pkt., 5c.

241—CORIANDER. Annual. Pkt., 5c.

233—DILL. Annual. Pkt., 5c; oz., 15c.

237—HOREHOUND. Perennial. Pkt., 5c.

242—LAVENDER. Perennial. Pkt., 5c.

243—ROSEMARY. Perennial. Pkt., 5c.

234—SAGE. Mammoth Broad Leaf, Perennial. Pkt., 5c; oz., 35c.

244—SUMMER SAVORY. Annual. Pkt., 5c.

238—SWEET MARJORAM. Annual. Pkt., 5c.

245—SWEET BASIL. Annual. Pkt., 5c.

246—THYME. Perennial. Pkt., 5c.

247—WORMWOOD. Perennial. Pkt., 5c.

Seeds of Annual Flowers

If you have friends and a family and a home you just can't get along without flowers. They are not a luxury but a necessity. Share them with your friends. Teach your family the love of flowers. Beautify your home so that in years to come when the family is scattered they will look back in fond memory to that old-fashioned flower garden and a home made beautiful with flowers.

NOVELTIES AND NEW ADDITIONS

We are introducing to our customers this season a number of flowers that are of special value and should be in your garden. Some of them are new and some have been grown a number of years, but are not as well known as they should be.

Look for new additions elsewhere in the flower seed pages. A number have been added this year.

1031—ASTERS, Golden Queen. A deep golden yellow except the outer petals which are a creamy white. Pkt., 10c.

1033—Aurora. A very unusual flower, blue with a yellow center. This is a rare color combination for an aster and quite pretty. Pkt., 10c.

1358—ANNUAL GAILLARDIA, Double Mixed. The annuals are profuse bloomers, beginning early and continuing until frost. Long stems, very double. Colors run to red, orange, brown and yellow in many shades. Pkt., 5c.

CASTOR BEAN, RED SPIRE
Very ornamental

1380—GYPSOPHILA, Double White Perennial. This will come about 60% double and is far superior to the old single. Pkt., 15c.

1359—HOLLYHOCK, Exquisite. Very large flowers curled and fringed. Various shades of red with petals white margined. Pkt., 10c.

1292—HOLLYHOCK, Imperator. Flowers 5 to 7 inches in diameter, frilled and fringed with a double rosette in the center about 3 inches across. Mixed colors. Pkt., 15c.

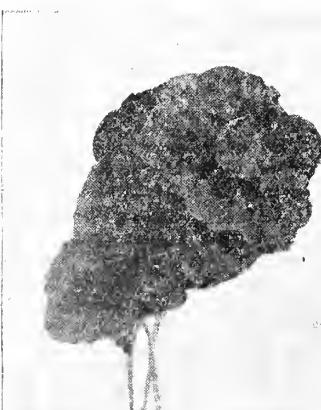

1360—LARKSPUR, Empress Rose. A double, everblooming, super-branching Larkspur. Mammoth size both flowers and plant. Flores well placed on the stem. A rich deep pink. Pkt., 15c.

1342—MARIGOLD, Little Brownie or Legion of Honor. A compact bush 9 or 10 inches high. Blooms early and continuously until frost. Flowers single, a golden yellow with a velvety brown spot in the center. Pkt., 5c.

1150—DWARF NASTURTIUM, Double Sweet Scented. New this year. Semi-double and fragrant, a combination unknown in Nasturtiums until now. The fragrance is very pleasing and quite noticeable. The bloom very large with 6 to 8 inch stems and the color a clear golden yellow. The most remarkable introduction ever made in Nasturtiums. Pkt., 25c.

1182—PANSY, Roggeli's Giants. This strain was developed by a noted grower in Italy. The flowers of mammoth size, and beautiful striking colors. Long stems and a thrifty plant. Mixed colors. Pkt., 15c.

1183—PANSY, Winterblooming. Extremely early flowering and hardy. These are in bloom when others are in bud. The flowers are not large but abundant and fragrant. Very good for cutting and fine for bedding. Mixed colors. Pkt., 10c.

The new **DOUBLE SWEET SCENTED NASTURTIUM.** Not a very good photograph but you can see that it is a semi-double. You can't see the fragrance but it is there just the same

Needs With My
Reliable Seeds

1345—PETUNIA, Giant Fluffy Ruffles. A large flower, beautifully fringed and ruffled. Bright showy colors mottled and blotched with an occasional flower showing a solid color. Makes a wonderful house plant. Mixed colors. Pkt., 20c.

1181—PETUNIA, Ramona. A very large flower beautifully ruffled and fringed. Wide open with well marked throat. Rather dwarf, which makes it an ideal house plant. A free bloomer and we offer a good mixture of colors. Pkt., 25c.

1344—PETUNIA, Rose of Heaven. A brilliant rose with white throat. Darker than Rosy Morn. A small compact bush. Pkt., 10c.

1087—MARIGOLD, Eldorado. Very large flowers, quite double with flat overlapping petals. Golden yellow color. Pkt., 10c.

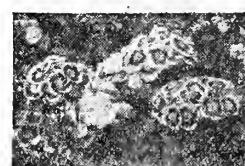

1310—REGAL LILY SEED. You can grow bulbs of this famous lily from seed. Sow in early April and shade for about 6 weeks. Pkt., 15c.

1347—SALVIA, Farinacea. Stands 20 to 30 inches high and produces an abundance of tall spikes of silvery blue flowers. Fine for cutting. Pkt., 10c.

1052—SANVITALIA PROCUMBENS. Creeping Zinnia is the common name. Has tiny flowers resembling Zinnias. Golden yellow with a purple center. Pkt., 10c.

1324—SUNFLOWER, Branching Double. Brighten up your garden with this variety. Long stems, very branching and quite double. A deep saffron yellow. Pkt., 5c.

1334—SWEET PEA, Glengarry. Flowers of mammoth size and very ruffled. Long stout stems carrying 4 or 5 blooms. A deep velvety crimson. Pkt., 15c.

SWEET WILLIAM, SELECTED GIANT FLOWERING HYBRIDS

1361—ZINNIA, Giant Mammoth. These new giants will stand from 3 to 4 feet tall in good soil and the

bush two to three feet in diameter. Flowers of enormous size, twice the size of the ordinary Giant Zinnias. Flowers attractive from the time they open until full grown. A splendid cut flower as well as for bedding. Mixed colors. Pkt., 10c.

1400—ZINNIA, Gold Medal Dahlia Flowered. This is the famous Dahlia Flowered type and grown by the originator. It is very large, very double, long stems and a vigorous grower standing 3 to 4 feet tall. Mixed colors. Pkt., 15c.

ZINNIA, GIANT MAMMOTH

Our Flower Lady

Mrs. Helen Field Fischer, my sister, is our flower lady. She gives a talk every day, taking up problems of the season and reading interesting letters telling of garden experiences of others. She has personally experimented with every plant hardy in the middle west and has taken technical training at Cornell University.

Dutch Bulbs for Early Spring Bloom

No, we can't furnish them now but if you would like our Dutch bulb catalog with colored illustrations send us your name now and we will mail it next fall when the bulbs are ready. The Dutch bulbs include Tulips, Hyacinths, Narcissi, Crocus, Snowdrops and others.

Asters, Queen of the Annuals

American Branching. The colors are bright and attractive; the flowers very double; stands a long time and keeps well as a cut flower. Give them plenty of space, as they have long stems and gorgeous big blooms.

1011—**Azure Blue.** 1012 **Crimson.**
1013 **Lavender.** 1014 **Peerless, pink.**
1015 **Perfection, white.** 1016 **Purple.**
1017 **Mixed Colors.** Pkt., 10c.
1942—**SPECIAL ASTER OFFER.**
One packet each of the 6 colors of
American Branching, 50c.

American Beauty. A well rounded bush, branching close to the ground, with long side branches. Large flowers. Colors: 1352 **Azure Blue.** 1353 **Black-blue.** 1354 **Crimson.** 1355 **Rose.** 1356 **White.** 1357 **Mixed Colors.** Pkt., 10c each.

1351—**California Sunshine.** It is a double flower, although the outer petals extend out much longer than the center quilled shaped petals and you are reminded of a single flowered aster. The crested or cushioned center shows contrasting color Mixed colors. Pkt., 15c.

1019—**Chrysanthemum-Flowered.** All the feathery, shaggy varieties including Mikado, Giant Comet, Ostrich Feather and Giant Poodle. Mixed colors. Pkt., 5c.

1020—**Florists' Mixture.** Assorted varieties in mixed colors. Mixed colors. Pkt., 5c.

1018—**Giant Branching Comet.** Large bloom, long broad petals making a very attractive flower. Long stems Mixed colors. Pkt., 10c.

1024—**Heart of France.** A pure red Aster, red as the ruby and strikingly beautiful. Pkt., 10c.

1341—**New California Giants.** They are the giants among the Asters, the flowers reaching a size 4 to 5 inches in diameter and with long stems. The petals are gracefully curled and twisted somewhat resembling a Chrysanthemum. Mixed colors. Pkt., 15c.

1020—**Queen of the Market.** Blooms during July and August. Plant plenty of it. Mixed colors. Pkt., 5c.

1001—**ALYSSUM.** Sweet White. The best white border plant in existence. Lacy and fragrant. Pkt., 10c.

1002—**ACROCLINIUM,** Everlasting. Pkt., 5c.

1003—**AGERATUM,** Blue Perfection. A charming annual, entirely covered with a solid fluff of bloom until very late fall. 10 to 12 inches tall. Pkt., 5c.

1004—**AMARANTHUS,** Sunrise or Molten Fire. Pkt., 10c.

1005—**TRICOLOR** or **JOSEPH'S COAT.** Gorgeous foliage. Pkt., 5c.

1006—**LOVE-LIES-BLEEDING.** Pkt., 5c.

NEW CALIFORNIA GIANTS

1036—**BALLOON VINE** (Love-in-a-Puff). A rapid growing vine with pods like little green balloons. Pkt., 5c.

1046—**BLUE LACE FLOWER.** Long stemmed flowers and a constant bloomer. Height about 2 feet. Pkt., 5c.

1049—**CALENDULA.** Pot marigold. Very double. Colors pure golden yellow, lemon and sulphur. Blooms freely. A splendid cut flower or for flower bed or house culture. Will bloom until frost if the fading flowers are removed. Mixed colors. Pkt., 10c.

1205—**CLARKIA ELEGANS.** Rocky Mountain Garland Flower. Covered with buds and flowers. Brilliant shades of red, white and pink, double and single. Mixed colors. Pkt., 5c.

CALIFORNIA POPPIES. A beautiful low growing flower, all shades of yellow, orange and crimson, with finely cut silvery foliage. A good border plant. 1055—**California Poppy Mixed.** Pkt., 5c.

CALIFORNIA POPPIES

Snapdragon (Antirrhinum Maximum)

We list the newer and better strains of this flower. Blooms a long time, is fragrant and fine for vases. They also make good bedding plants. However, you all know how to use them for it is an old favorite.

1007—**Apple Blossom,** rosy pink, yellow lip.

1008—**Ceberus,** carmine rose, yellow lip.

1009—**Purple King,** blood red.

1021—**Golden Queen,** deep yellow.

1010—**Superior Mixed,** delicate shades. Your Choice. Pkt., 10c.

1358—**ANNUAL GAILLARDIA,** Double Mixed. Long stems, very double. Colors run to reds, orange, brown and yellow in many shades. Pkt., 5c.

BALSAM OR TOUCH-ME-NOT. An old favorite. The many colored flowers grow along the stem, intermingled with the foliage, making a most attractive plant. Cut off some of the outer leaves to show the flowers better. Fine for planting around the foundation of the house.

SNAPDRAGON, 1010 SUPERIOR MIXED

1037—**Prize Double Mixed.** The finest to be had. Pkt., 10c.

1038—**Camelia Flowered.** Double. Flowers all colors. Covered with white polka dots. Pkt., 5c.

1045—**BALSAM APPLE.** An interesting climber. Pkt., 5c.

1056—**CALIOPSIS, Semi Plena.** Another annual that scatters its dancing flowers of orange, henna and yellow into every waste corner of your garden, and is ever welcome. Plant on the tulip bed to follow them. Mixed colors. Pkt., 5c.

1057—**Drummondii, Golden Wave.** An interesting new dwarf form of the above. Fine for cutting. Height about 10 or 12 inches.

1058—**CANARY BIRD VINE.** Named from the airy yellow flowers with feather-like petals. Pkt., 5c.

104—**CHINESE FORGET-ME-NOT** (*Cynoglossum Amabile*). Produces sprays of bright blue Forget-me-not like flowers which bloom throughout the summer. Plants grow about 18 inches high. Pkt., 5c.

1065—**CARDINAL CLIMBER.** You will love it. The flowers are little scarlet Morning Glories. Pkt., 10c.

1063—**CANDYTUFT.** An old annual that has been vastly improved in its color range. This is the Umbellata type and has a cluster of flowers somewhat resembling annual phlox. Mixed colors. Pkt., 5c.

1062—**Giant Hyacinth-Flowered.** White. One foot spikes actually resembles single white Hyacinths. Pkt., 5c.

1066—**CACALIA or FLORA'S PAINT BRUSH.** Each flower a miniature scarlet paint brush on long wiry stems. Pkt., 5c.

1064—**CANNA SEED.** Try your luck. You may experience the delight of producing a most beautiful new variety from seed. They always bloom the first year. Pkt., 5c.

1039—**CARNATIONS.** Dwarf Marguerite. A half hardy plant, blooming late in the season. Fragrant double; colors white and various shades of pink. Sometimes called "Carnation Pinks." Pkt., 10c.

1048—**Chabaud's Giant Double.** A very large double, suitable for pot culture as well as growing in the open. Plants can be lifted late in the season and potted for winter bloom in the house. Mixed colors. Pkt., 15c.

1044—**CASTOR BEAN** (*Ricinus*) *Palma Christi.* The large ornamental kind. Pkt., 5c.

1346—**CASTOR BEAN, Red Spire.** (See Novelty Page.)

1072—**CHINESE WOOLFLOWER.** Like a ball of crimson yarn. Pkt., 10c.

1078—**CHRYSANTHEMUM.** Annual. Large daisy-shaped blooms with odd and beautiful arrangement of colored rings surrounding the center. Plant them early. Mixed colors. Pkt., 5c.

1079—**COBEA SCANDENS.** A beautiful vine with bell-like flowers. If planted in your window, it will climb the screen where desired and will make a dainty lace curtain of greenery. Pkt., 5c.

**DOUBLE CORNFLOWER**

Notice how double

1088—CYPRESS VINE. A medium tall growing vine with fine green foliage; pretty red and white flowers. Pkt., 5c.

COSMOS. The glory of the fall garden. On tall, feathery, green stalks it bears daisy-like flowers in all shades of lavender, pink and red. Ours is the early-blooming strain that blooms from mid-summer on. 1089 Crimson. 1081 Pink. 1082 White. 1083 Early Single Mixed. Per pkt., 10c.

FOUR O'CLOCK OR MARVEL OF PERU. An old favorite of renewed popularity. Use it for hedges, for foundation planting and large beds for public places.

1093—Mixed Colors. Pkt., 5c; oz., 20c.

1073—Striped. Flowers striped and variegated. Includes all the four o'clock colors. Very attractive. Pkt., 5c.

1074—Variegated. Leaves varying shades of green and yellow. Flowers mixed colors making a striking contrast with the variegated foliage. Pkt., 5c.

1075—Tom Thumb. Very dwarf and compact standing about 18 inches high. Fine for borders and bedding. Pkt., 5c.

DAHLIA SEED. As a rule blooms first year from seed. Each plant different. Save the bulbs of the worth while plants.

1089—Single Mixed. Pkt., 10c.

1090—Double Mixed. Pkt., 15c.

1091—DATURA (Ghost Flower). Large trumpet-shaped flowers. Pkt., 5c.

1092—DUSTY MILLER (Centaurea gymnocarpa). The soft gray foliage plant used to edge beds. Pkt., 5c.

1094—GERANIUM SEED. No two plants from seed are just alike. Pkt., 10c.

1095—GILIA, Capitata. Almost everlasting. White and blue mixed. Wonderful for blue cut flowers. Pkt., 5c.

1096—GLADIOLUS SEED. Pkt., 5c.

1097—GLOBE AMARANTH (Bachelor's Button). Everlasting. Reminds you of clover blossoms. Mixed colors. Pkt., 5c.

ORNAMENTAL GOURDS. Will climb surprisingly well. Are useful, ornamental and a great curiosity.

1098—Bottle. Used as a drinking cup or water jug. Pkt., 5c.

1099—Dipper. The old-fashioned Missouri sort. Pkt., 5c.

1100—Hercules Club. About three feet long. Pkt., 5c.

1101—Nest Egg. Guaranteed to fool the old hen. Pkt., 5c.

1102—Sugar Trough. Large as a peck measure. Often larger. Pkt., 5c.

1103—Fancy Mixed. All kinds, shapes and sizes. Pkt., 5c.; oz., 20c.

HELICHRYSUM OR EVERLASTINGS. The rose-shaped strawflower that is the foundation and glory of all winter bouquets. When gathering, remove the stem and substitute a slender wire.

1106 Canary Yellow. 1107 Crimson. 1108 Rose. 1111 Violet. 1109 Fliry Red. 1110 Golden Yellow. Your choice of colors. Per pkt., 5c.

1112—Mixed Colors. Pkt., 10c.

1113 **HELIOTROPE.** A tender purple plant with a sweetly haunting perfume. Pkt., 10c.

1114 **HYACINTH BEAN.** Rapid growing vine. Both blooms and pods are very ornamental. Mixed colors. Pkt., 5c.

1115—ICE PLANT (Mesembryanthemum). Foliage covered with ice-like globules. Pkt., 5c.

1116—JAPANESE HOP (Humulus Japonicus). Beautiful insect-proof vine. This and Moonflower are our most rapid climbers. Pkt., 5c.

Supply Your Own
Needs With My
Reliable Seeds

DOUBLE CORNFLOWER (Centaurea cyanus). Much superior to the old-fashioned single Cornflower. We list these in separate colors. Fine for church or house decoration, and best of all, it self-sows.

1067 Blue. 1068 Pink. 1069 White. 1070 Lavender. 1071 Mixed colors. Your choice, per pkt., 5c.

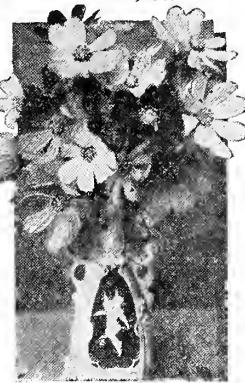

1323—COSMIDUM, Mixed. It grows from 12 to 18 inches in height and produces an abundance of single orange yellow flowers. Blooms all summer. Pkt., 5c.

1085—COXCOMB. One of the old-fashioned flowers that is coming back into popularity. Pkt., 5c.

1086—COLEUS. A beautiful foliage plant. Pkt., 10c.

1022—CONVOLVULUS MINOR. A dwarf or bush Morning Glory. Mixed colors. Pkt., 5c.

1325—SCARLET FLAX (Linum rubrum). Can be used in Clumps along the border where it will be greatly admired because of its bright glowing color. Height about one foot. Pkt., 5c.

**COSMOS, EARLY SINGLE MIXED**

1117—JOB'S TEARS. The gray seeds, shaped like a giant tear drop, are the joy of childhood for using as beads. Pkt., 5c; oz., 25c.

1118—KOCHIA or Annual Evergreen. For hedges, or for backgrounds. Have you tried trimming it in fancy shapes, or using the individual plants in the place of dwarf evergreens? Pkt., 5c; oz., 25c.

1119—LANTANA. Should be used more. Fine for beds or baskets, and can be carried over to bloom in winter. Pkt., 5c.

LARKSPUR (ANNUAL DELPHINIUM). Tall branching Double Stock Flowered. The new double annual Delphiniums are a close rival to their sister who reigns queen of the hardy garden. They are nearly as tall and they self-sow. Do not fail to try them. What we offer is the tall branching double stock flowered.

1120—Ageratum Blue

1117—Lustrous Carmine

1138—Bright Rose

1118—Rose Scarlet

1146—Dark Blue

1122—Pure White

1121—Lilac

Your choice of colors listed above, pkt., 5c.

1123—ANNUAL LARKSPUR. Mixed colors. Pkt., 10c.

1360—Empress Rose. (See Novelty page).

1124—LAVATERA TRIMESTRIS. A dainty pink dwarf of the Hollyhock family. Pkt., 5c.

1126—LOBELIA. A marvelous shade of blue for your borders and boxes. Pkt., 10c.

1125—LOVE-IN-A-MIST (Nigella). A flower of tender blue, half hidden by a mist of green. Pkt., 5c.

1127—LUPINE. Long graceful spikes with pea-shaped flowers. Annual and suitable for cutting. Mixed colors. Pkt., 5c.

MARIGOLD. A splendid cut flower whose fragrance reminds you of an old-fashioned garden. Blooms in this strain average about two inches in diameter and very double. Colors, Lemon and Orange.

1127 Lemon Queen. 1128 Orange

Pine. 1129 Mixed colors. Your choice

Pkt., 10c.

1342—Little Brownie or Legion of

Honor. A compact bush 9 or 10 inches

high. Blooms early and continuously until frost. Flowers single a golden

yellow with a velvety brown spot in the center. Pkt., 10c.

1343—Gold Striped. About the same

height as Little Brownie. Very double

a velvety dark brown striped with gold. A little beauty. Pkt., 10c.

1130—French Dwarf Double Lilliput.

Very dwarf and compact. Mixed colors. Pkt., 5c.

1331—DOUBLE FEVERFEW (Matricaria).

The good old standby, furnishing white flowers for cutting all

summer. Pkt., 5c.

1332—MIGNONETTE (Roseda Odorata). Pkt., 5c.

MOONFLOWER. Only the white form, Noctiflora, is night blooming. The Heavenly Blue, Early Skyone and Giant Pink add a Japanese touch to gardens most of the day unless the sun is shining. If you wish them to begin blooming early, start the seed indoors, as they have tropical habits.

1333—Giant White, Noctiflora. One of the largest and finest.

Pkt., 10c.

1334—Mammoth Pink. Very much like the big white Moonflower.

but pink in color. Pkt., 10c.

1335—Heavenly Blue. Immense flowers, in clusters and produced

in abundance. Pkt., 10c.

1336—Early Skyblue. A clear, deep sky blue, large and early.

A strong climber, healthy foliage and at times almost covered with flowers.

Pkt., 15c.

MORNING GLORIES. This is one of the most reliable

climbers I know of. It does well anywhere. The flowers

are so bright and cheerful that it is a comfort to grow them. They can, with good effect, be mixed with other

climbers.

1336—Common Mixed (Convolvulus Major). Fresh bright

looking flowers and a healthy, dark green foliage. Colors,

white, various shades of blue and red. Pkt., 5c; oz., 25c.

1337—Imperial Japanese Mixed. This one has a wider

range of color than the common kind. Our seed is imported.

Pkt., 10c; oz., 35c.

1338—RODANTHE. Swan River Everlasting. Small starlike

flowers, pink, red and white. Pkt., 5c.

MORNING GLORY, IMPERIAL JAPANESE

1339—Early Skyblue. A clear, deep sky blue, large and early.

A strong climber, healthy foliage and at times almost covered with flowers.

Pkt., 15c.

DWARF NASTURTIUMS

They do just as well on poor soil as on rich soil; in fact, they prefer a thin, rocky, clay soil. The climbing varieties are just the thing to cover a fence, stump or trellis. The dwarf varieties make a good border plant. All varieties are fine for cut flowers.

1150—Double Sweet Scented. (See Novelty page).

1153—Dwarf or Tom Thumb. A mixture of the choicest sorts in all colors. All make a rounded, compact bush literally covered with bright flowers. Pkt., 5c; oz., 25c.

1151—Chameleon. Choice mixture of rare colors.

1152—Empress or India. Dark scarlet, dark leaved.

1153—Golden Queen. Bright yellow, golden leaved.

1154—Pearl of Moonlight. Amber white.

1141—King of Tom Thumbs. Scarlet flowers, dark foliage.

1142—Queen of Tom Thumbs. Variegated-leaved and mixed. Extra good.

Your choice. Pkt., 5c.

1155—TALL OR CLIMBING. California Giants. This strain climbs well and is suitable for a trellis or any situation not requiring a tall climber. Mixed colors. Pkt., 5c; oz., 35c.

1158—Lebianum Mixed. Our State college at Ames, Iowa, recommends this strain for sunny window boxes. Do not grow as tall as the climbing. Are covered with brilliant flowers. Pkt., 10c.

1165—Variegated, Lobb's Queen Type. Leaves marbled and blotched with white. Flowers in mixed colors. Pkt., 10c.

1159—NICOTIANA. Queen of night bloomers. Very fragrant. Pkt., 10c.

NASTURTIUM, DWARF OR
TOM THUMB

PANSIES

No other flower seems so human as the Pansy. The more you pick them the better they thrive. They do best in rich soil. There are two times of the year to sow the seed. First, in August for early sturdy young plants to live over winter. Second, in early spring in the house or not-bed.

MILE HIGH MIXTURE—Very large blooms

Pansy Mixtures

1182—Roggli's Giants. (See Novelty page).

1167—Trimardeaux or Giant Mixture. Plenty of color and good sized flowers. Blooms freely. Pkt., 5c.

1161—Seed House Mixture. A mixture our visitors have admired very much. The blooms not so large but lots of them and lots of color. The more you pick the more the plants will bloom. Fine for borders or bedding. Pkt., 5c; 1/8 oz., 75c.

1130—Mile High Mixture. These are the great big fellows with the mountain vigor in their blood. Beautiful colors with long stems fine for cutting. Pkt., 15c; 1/8 oz., \$1.25.

1183—Winterblooming Mixture. (See Novelty page).

1206—Compact Bedding Mixture. A new type of pansy. Most people like pansies best in the flower bed and this strain has been developed specially for that purpose instead of for cutting. It is a very compact, low growing plant and a profuse bloomer. With reasonable care the early plants will show a solid mass of color, and pretty colors, too. Pkt., 10c.

1934—Special Pansy Offer. The 6 mixtures listed will make a grand and glorious mixture, so we offer one packet each, 6 in all, 40c.

Named Pansies

1169—Andromeda. A beautiful rosy lavender. Flowers large ruffle and long stems. Pkt., 10c.

1165—Eros. A deep velvety brown with a broad gold margin which makes a pretty contrast. Pkt., 10c.

1168—Aurora. Brilliant purplish crimson with a white margin. Pkt., 5c.

1170—Prince Henry. Flowers large intense dark blue with three black blotches. Pkt., 5c.

1162—Canary Bird. A good clear yellow. Pkt., 5c.

1163—King of the Blacks. Black as night. Pkt., 5c.

1165—Violet Blue. Splendid bedding variety. Pkt., 5c.

1928—Special Pansy Offer. One packet each of the seven varieties listed, 35c.

PETUNIAS

Fine for massing in beds or along walks or driveways. Will reseed themselves from year to year. All of them make good window box and house plants. For bedding use these dwarf and profuse bloomers. Fine to plant in the Tulip bed.

1130—Hybrid Mixed. The best mixture we have ever sold. Pkt., 10c.

BALCONY TYPE. They are profuse blooming trailers, with large flowers vividly colored. Use for porch and window boxes.

1186—Balcony Blue. 1187—Balcony Rose. 1188—Balcony White. 1189—Balcony Mixed. Your choice. Pkt., 10c.

1190—Giants of California. Flowers of enormous size, beautifully ruffled and fringed edges. Makes splendid pot plants. Plant the seed carefully, as it is very small. Pkt., 20c.

1181—Ramona. A very large flower beautifully ruffled and fringed. Wide open with well marked throat. Rather dwarf which makes it an ideal house plant. A free bloomer and we offer a good mixture of colors. Pkt., 25c.

1344—Rose of Heaven. (See Novelty page).

1345—Giant Fluffy Ruffles. (See Novelty page).

1174—Rosy Morn. Apple blossom pink. Pkt., 10c.

1175—General Dodds. Blazing crimson. Pkt., 10c.

1176—Violacea. Nearly blue. Pkt., 10c.

1177—Snowball. Pure white. Pkt., 5c.

1178—Howard's Star. Velvety purple with white star in center. Pkt., 10c.

1179—Lord Courtenay. Brilliant rose. Pkt., 10c.

PHILON DRUMMONDI GRANDIFLORA. They begin blooming early and increase in number as they grow. Their broad, flat tops clustered in contrasting colors make them very desirable for bedding. Low growing.

1194—Mixed colors. Pkt., 10c.

OLD-FASHIONED PINKS. One of the most satisfactory and easily grown of the old-fashioned flowers. They make a beautiful show in the flower bed or bouquet. Bloom all summer long.

1204—Double China. Very showy. Variegated colors, double and fragrant. Pkt., 5c.

1192—Fireball. Brilliant red, free bloomer from midsummer on. Very double. Pkt., 5c.

1193—Snowball. Very double, pure white, free blooming. Pkt., 5c.

1191—Single and Double Mixed. Beautiful colors. Pkt., 5c.

PORTULACA OR ROSE MOSS. One of the best hot, dry weather bloomers. Very low growing; a free bloomer; suitable for borders and flower beds.

1195—Double Mixed. Pkt., 10c.

1196—Single Mixed. Pkt., 5c.

PORTULACA OR ROSE MOSS, SINGLE

SCABIOSA OR PINCUSHION FLOWER

SCABIOSA OR MOURNING BRIDE. Also known as Pincushion Flower. Long slender stems making a fine cutflower. The sweet nectar of this flower attracts butterflies.

1211—Azure Fairy, delicate blue.

1213—Fire King, very attractive.

1219—Shasta, large white.

1212—Peach Blossom, a pretty pink.

1230—King of the Blacks, a real black.

1213—Mixed Colors.

Your choice, Pkt., 5c.

Our flower seed guarantee is just as strong as our vegetable seed guarantee. We will replace free of charge seed not satisfactory or we will refund the price you paid.

POPPIES

Will grow and bloom in any kind of soil and in any kind of weather. The colors are so brilliant and showy that they attract more attention than anything on the place. Even in the heat of July, when nothing else wants to bloom, the poppies are on hand fresh and beautiful.

POPPY, SLEEPY HOLLOW MIXTURE

1929—**SPECIAL POPPY OFFER.** One packet each of the above six varieties, for 30c.

ZINNIA—YOUTH AND OLD AGE

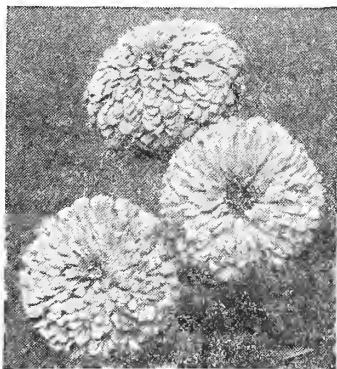

New and Better Strains

Zinnias have been greatly improved the last few years. They are much larger, more double and many new shades of color. You will find the best in this list of ours.

No wonder they are popular, for you can easily and quickly make a fine showing even if the weather is hot and dry. Plant a row across the garden or along the fence. A big bed of them makes a fine show. Use them in bouquets. Give each plant plenty of room to develop.

Shenandoah Giants

This is the longest list of colors we have ever offered in a Zinnia collection and beautiful colors, too. They are the new Giant Double type, large flowers and full double. You can have an abundance of bloom from early summer until frost.

ZINNIA, SHENANDOAH GIANTS

- 1399—Shenandoah Giants Mixed. Pkts., 10c.
- 1400—Gold Medal Dahlia Flowered. (See Novelty page).
- Lilliput. Small double flowers useful for borders, bedding, or for bouquets. They have the daintiest, prettiest flowers, and look well in the garden or in a bouquet.
- 1330—Canary Yellow. 1331 Salmon Rose. 1332 Scarlet Gem. 1333 Purple. 1350 Mixed Colors. Your choice, Pkt., 10c.
- 1933—Special Zinnia Offer. Lilliput. All 5 colors, 35c.
- 1361—Giant Mammoth. (See Novelty page).
- 1262—Black Knight or Warrior. Very double, medium size. Dark maroon. Pkt., 5c.
- 1263—Zebra Flowered Mixed. Very prettily striped and variegated showing a good range of color. Pkt., 5c.

1935 — Special Zinnia Offer. 1 packet each of the above 10 varieties, 45c. Single Pkts., 5c.

Reliable Seeds

SALVIA OR SCARLET SAGE.

Plant liberal quantities in boxes, for you will want to edge Canna beds, to set in front of foundation shrubs, and to slip into bare spaces in your perennial borders in late summer. No autumn garden is complete without its blazing glory.

1214—Splendens. Stands erect, blooms freely. Pkt., 10c.

1207—Bonfire. Earlier than Splendens, and not as tall. Flowers stand well above the foliage. Eighteen to twenty-four inches high. Pkt., 10c.

1347—Farinacea. Blue Salvia. (See Novelty page).

ZINNIA, LILLIPUT

SALPIGLOSSIS OR VELVET TRUMPET

1052—**SANVITALIA PROCUMBENS.** Creeping Zinnia is the common name. Has tiny flowers resembling Zinnias. Golden yellow with a purple center. Pkt., 10c.

1215—**SCHIZANTHUS.** Bright little blossoms, blotched and speckled like butterfly wings. Fernlike foliage. Pkt., 5c.

1216—**SNOW-ON-THE-MOUNTAIN.** A beautiful annual foliage plant with variegated green and white leaves. 24 to 30 inches high. Pkt., 5c.

1208—**SALPIGLOSSIS (Velvet Trumpet).** As easy to raise as Petunias. Flowers of deep purple and henna, overlaid with gold lace. A splendid cut flower. Mixed colors. Pkt., 10c.

1173—**SAPONARIA VACCARIA.** Satiny pink flowers somewhat like an enlarged Gypsophila, valuable for cutting and largely used for mixing with other flowers. Pkt., 5c.

1217—**STATICE SINUATA.** The new annual everlasting which bears dainty pink, lavender and yellow ruffles along its flower stem. Fine for winter bouquets. Mixed colors. Pkt., 10c.

1219—**SUNFLOWER, Dwarf Double.** Pkt., 5c.

1324—**SUNFLOWER, Branching Double.** (See Novelty page).

1076—**CATCHFLY, Silene Armenia.** Early blooming colors red and white. Pkt., 5c.

1239—**SWEET ENGLISH VIOLET.** Pkt., 10c.

1265—**WILD FLOWER GARDEN.** A big packet of annual flower seed containing many varieties. A gorgeous riot of color, selected to bloom over a long season. Pkt., 10c.

SWEET PEAS

Early Flowering Spencers

This is something new. They are ten days to two weeks earlier. They should not displace the late flowering type but should be grown in connection with them, then you will have Sweet Peas early and late.

1236—**Early Harmony.**
Clear lavender.

1237—**Rose Pink.**
Bright rose pink.

1238—**Vulcan.** The most vivid scarlet color ever seen in Sweet Peas.

1327—**Early Blue Bird.**
An attractive shade of blue.

1328—**Early Snow-storm Improved.** Pure white.

Your choice of above pkts., 10c.

1264—**Early Spencer Mixed.** Pkt., 10c; oz., 50c.

1944—**SPECIAL SWEET PEA OFFER.**
One packet each of the above five varieties, special price, 45c.

Spencer Sweet Peas

The flowers of the Spencer type are more open, have longer stems, produce more flowers and for a longer period of time than the old Eckford's type. They are of enormous size and have a wide range of color.

EARLY SPENCER MIXED

SWEET PEAS—(Continued)

Both standards and wings waved and frilled. The word "Standards" refers to the top petals and "wings" to the lower ones.
 1220—Austin Fredrick Improved. This is a large, pink lavender.
 1228—Campfire. Bright scarlet.
 1221—Crimson King. A distinctly new shade of crimson. Very bright.
 1224—King White. A giant white.
 1222—Carmelita. A light rose pink on white ground.
 1224—Blue Bird. A true blue; beautifully waved and frilled.
 A strong grower, with long stems that you like to pick.
 1238—Miss California. Orange and salmon-pink are rare colors for Sweet Peas. A vigorous variety with three or four blooms to the stem.
 1225—Hawmark Scarlet. A rich scarlet.
 1226—King Manoel. Deep maroon.
 1235—Royal Scott. Glowing scarlet.

The famous SPENCER MIXED

1240—**SWEET SULTAN** (*Centaurea Imperialis*). Soft shades of lavender, purple and rose, in artistic thistle-shaped blooms. Pkt., 5¢.

1242—**TEN WEEKS STOCKS**. Mixed colors. Pkt., 5¢.

1251—**VINCA**. A very free-blooming pink and white bedding plant with dark, laurel-like foliage. Mixed colors. Pkt., 5¢.

1241—**TORENIA**. A marvelous little annual with purple pansy-like flowers. Loves shade, and heat, and moisture. Height about one foot. Pkt., 10¢.

1054—**THUNBERGIA** or Black Eyed Susan. (See Novelty page).

SEEDS OF PERENNIAL FLOWERS

Varieties marked "R", suitable for Rock Garden. The figures refer to height.

1367—**ADLUMIA CIRRHOSEA** (*Allegheny Vine*). A biennial. Fine feathery fernlike foliage and tiny pink and white blooms. Pkt., 10¢.

1293—**AGROSTEMMA**, *Coronaria*. 2 ft. (Hardy Rose Champion). Crimson and white with rosy eye, foliage is silvery white. Pkt., 10¢.

1270—**ALYSSUM** *Saxatile*. 1 ft. R. Yellow flowers in early April. Pkt., 5¢.

1271—**ANCHUSA**. 3 to 4 ft. A pretty blue flower. Pkt., 5¢.

1274—**AQUILEGIA OR COLUMbine**, *Long Spurred Hybrids*. 2 ft. An unusual good strain of this popular perennial. Very large, long-spurred flowers, and a wide range of color. Pkt., 10¢.

1280—**Rocky Mountain or Colerado**. R. Beautiful blue and white. Pkt., 10¢.

1275—**Mixed Varieties**. Seed of our own saving from all varieties. Pkt., 5¢.

1276—**BABY'S BREATH or GYPSOPHILA**. 2 ft. The fine cut white blossoms are beautiful while fresh, or when dried to use in winter bouquets. Pkt., 5¢.

1368—**CALLIRHOE INVOLUCRATA** (*Poppies Mallow*). R. Long trailing stems, poppy-shaped flowers, rose-crimson to cherry-red and rose. Pkt., 10¢.

1278—**CAMPANULA MEDIUM** (*Canterbury Bells*). 2 to 3 ft. The well-known "Cup and Saucer" plant. Pink, blue and lavender bells, half as large as a teacup. Mixed colors. Pkt., 5¢.

1366—**CASSIA MARYLANDICA** (*Indian Senna*). 3 to 4 ft. Showy yellow plume-like flowers. August blooming. Pkt., 10¢.

1281—**CHINESE LANTERN PLANT** (*Physalis*). The large, orange-red pods are ornamental in winter bouquets; easily grown. Pkt., 10¢.

1282—**COREOPSIS Lanceolata**. 2 ft. A yellow daisy-shaped flower. Will stand hot, sunny locations. Pkt., 10¢.

COLUMBINE, LONG SPURRED HYBRIDS

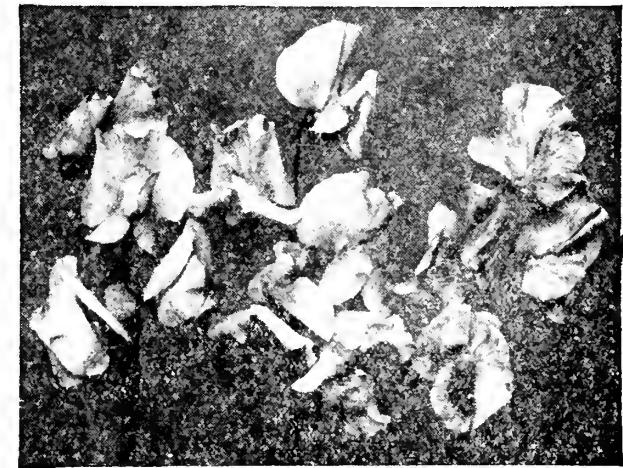

1320—**Double Gypsophila**. (See Novelty page).

1289—**English Hybrids**. Blossoms are arranged along the spikes instead of being in loose sprays like Belladonna. Pkt., 15¢.

1291—**Wrexham Hybrids**. Often called the Hollyhock strain because of the tall strong spikes with large single and semi-double flowers. Shows a good wide range of Delphinium colors. Pkt., 15¢.

1284—**DIANTHUS DELTOIDES**, (*Maiden Pinks*). 8 in. R. A bright little flower that blooms in June and July. Mixed colors. Pkt., 10¢.

A good Sweet Pea Mixture is 1941
SPENCER COLOR MIXTURE—Price 35c

Sweet Pea Novelties

1232—**Mary Pickford**. This blossom especially suggests "America's Sweetheart" by copying the pink of her cheeks and a touch of the gold of her hair, and wearing the dainty ruffles of her party gowns. Pkt., 10¢.

1329—**Pinkie**. The largest of all in the deep pink section. A most vigorous grower, producing on long stout stems well waved, nicely placed flowers of a beautiful rose pink shade. Pkt., 10¢.

1326—**Cherry Red**. This is a special blend of the bright red colors in Sweet Peas. The flowers are produced on long stems and both standards and wings waved and frilled. Pkt., 10¢.

1334—**Glenarry**. (See Novelty page).

VERBENAS. These are the magic weavers that mingle their glorious colors into Oriental rugs of bloom in your garden. Do not forget them this year. They are often used for undergrowth for lilies.

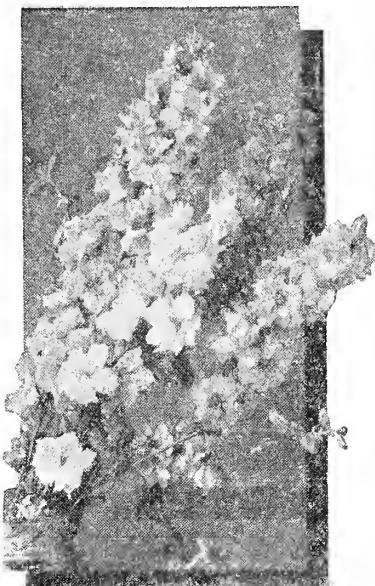

1243—**Purplish Dark Blue**. 1246—**White**.
 1244—**Lucifer**. Scarlet. 1247—**Mixed colors**.
 1245—**Pink**. Your choice of colors. Pkt., 10¢.

Verbena Hybrida Grandiflora or **Mammoth Verbena**. My sister Jessie Field Shambaugh, asked me to list this special strain. The individual measure an inch and over.

1248—**Rosea**. A pure pink with large white eye. Pkt., 10¢.
 1249—**Bluc**. White eye. Pkt., 10¢.
 1250—**Mayflower**. Pink. Pkt., 10¢.
 1261—**Mixed Colors**. Pkt., 15¢.

Ruth Field kneeling in a bed of SHASTA DAISIES

DELPHINIUM, ENGLISH HYBRIDS

1374—**HARDY CANDYTUFT** (*Iberis Sempervirens*). 1 ft. R. A low spreading plant in the early spring covered with pure white bloom. Pkt., 5c.

1298—**HARDY FLAX** (*Linum*). 1 ft. R. Fine cut, gray foliage, and blue blossoms about half an inch across. Pkt., 5c.

1267—**HEARTSEASE OR TUFTED PANSY** (*Viola Cornuta*). 8 in. This is the Fancy with small blossoms that self-sows. Pkt., 10c.

1371—**HELIANTHEMUM MUTABLE** (Rock Rose or Sun Rose). R. Dwarf creeping perennial blooming in May and June. Pkt., 5c.

1372—**HESPERIS MATRONALIS** (Sweet Rocket). 2 ft. Very fragrant lavender colored flowers in large clusters. Pkt., 5c.

1299—**HIBISCUS** (Mallow Marvel). 3 to 4 ft. Has immense white, pink or red Hollyhock-shaped blossoms. Mixed colors. Pkt., 5c.

1373—**IRIS KAEMPFERI** (Japanese Iris). 3 ft. tall, large bloom often variegated. Easily grown. Pkt., 10c.

1304—**LATHYRUS LATIFOLIUS** (Perennial Sweet Pea). A sturdy and rapid growing vine, which is covered all through the late summer with masses of flowers in white, pink or rose. Mixed colors. Pkt., 10c.

GAILLARDIA OR
BLANKET FLOWER

Fresh Lawn Grass Seed

We are offering you bright, clean, new crop seed free from weeds and trash. When you buy "cheap" seed containing trash and dead seed you pay for something that will not grow. The seed may grow but it will crowd out your grass. The money wasted in poor seed makes the "cheap" seed expensive.

It is economy to use plenty of seed. On a new lawn, one pound for two to three hundred square feet; for re-seeding, almost that much, depending of course on the condition of the lawn.

Re-seed whenever or wherever the lawn is bare or the grass thin. A good stand of grass on good rich soil will help as much as anything to keep the weeds down. In fact, the weeds are bound to grow if the grass is thin.

Prices are very reasonable this year so now is a good time to thicken up the stand of grass on your lawn. We can furnish a carefully blended mixture of good, clean, fresh Lawn Grass seed or the Kentucky Blue Grass.

Lawn Grass..... .35c Per Lb. \$3.00 for 10 Lbs.
Kentucky Blue Grass..... .35c Per Lb. \$3.00 for 10 Lbs.

The Dozen Price on Flower Seed Packets

12 five cent packets, your choice.....	.35c	Per Lb.	\$3.00 for 10 Lbs.

1365—**LINARIA MACEDONIA**. (Toad Flax). R. For borders, window boxes and Rock Gardens. Pkt., 20c.

Cannas for the center of the bed and Scarlet Sage or Zinnias for the outside rows make a wonderful flower bed

CANNAS

Circular Canna Beds

Most of you no doubt have often wished for a pretty circular flower bed on your lawn, but could not decide just what flowers to use, or how to go about it to make one. These beds are not hard to make when you use the right varieties.

Cannas are just the flower for this purpose, and are easily grown. In fact, you can hardly keep them from growing. No other flower furnishes the tropical-like foliage and bright showy flowers that look so well in a circular bed.

All our varieties are the large flowered kind and are attractive and bloom freely. We have discarded the small flowering varieties. The bloom stands well above the foliage so that they make a good showing.

We will send you a list of the varieties for these beds and just how you are to place them. We will select varieties that will match up well as to foliage, bloom and height.

1961—FIVE-FOOT BED. 13 plants. 4 tall for center, and 9 medium height for outside of a formal bed. \$1.25.

1962—SEVEN-FOOT BED. 19 plants. 1 tall for center, 6 medium for second circle, and 12 for outside of bed. \$1.75.

1963—TEN-FOOT BED. 37 plants. 1 extra tall for center, 6 medium height for second circle, 12 for next circle, 18 shorter for outside circle. \$3.50.

1957—Canna Border Collection

24 Bulbs \$2.25; 12 Bulbs \$1.25

Use as a background for lower growing flowers, or as a screen to hide some unsightly place, a chicken yard, old fence, or set at the side or back side of the lawn. Colors well blended. Six each of four named varieties, 24 bulbs, postpaid, \$2.25. Three each of the same list, or 12 bulbs, \$1.25.

1841—Grand Mixture of Cannas

This mixture is bound to suit you if you like plenty of color. Not only a variety of color in the flower but both the green and bronze foliage varieties. Good healthy roots sure to grow. Price, 6 for 55c; 12 for 95c; 25 for \$1.80, postpaid.

Named Cannas

All varieties except as noted, 15c each; 6 for 65c; \$1.25 per dozen.

1828—CITY OF PORTLAND. 3 to 4 feet. Green foliage. A beautiful large truss of rose-pink flowers.

1826—EUREKA. About 4 feet. Green foliage. Large white flowers which first appear cream. The best white.

1819—HUNGARIA. 3 feet. Green foliage. A delicate pink, closely resembling La France.

1833—KING HUMBERT. 4 feet. Bronze foliage. Very large orange-red flowers.

1830—OLYMPIC. 4 feet. Green foliage. Has a distinctive color, a rich oriental red and a large flower.

1825—PENNSYLVANIA. 5 feet. Green foliage. Bright red flower.

1836—PRESIDENT. 4 feet. Green foliage. Color a rich glowing scarlet. Large truss of flowers on strong erect stalks well above foliage. 20c each; \$2.00 per doz.

1822—RICHARD WALLACE. 4 feet. Green foliage. Large canary yellow flowers. A popular variety.

1813—WYOMING. 5 to 6 feet. Bronze foliage. Large orange-colored flowers.

1840—YELLOW KING HUMBERT. 5 feet. Green foliage. Large golden yellow flowers dotted with bright red. Some plants will occasionally give a scarlet or scarlet-striped flower.

1986—SPECIAL OFFER. One bulb each of the 10 Canna varieties listed on this page, \$1.10.

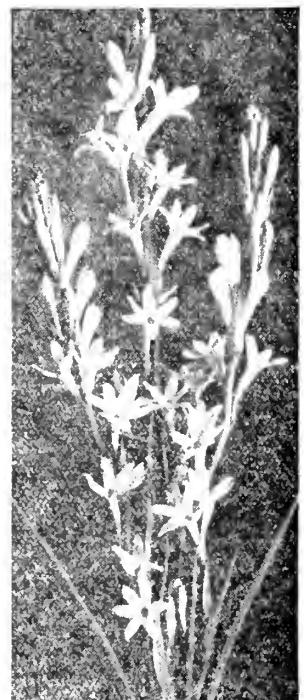

Our CANNAS are the large flowered varieties

117

The Seed That Yield Are Sold By Field

1844—Mexican Tuberous

This variety grows a strong, sturdy spike, pure white and very fragrant flowers. It can be used as a cut flower or can be allowed to stand in the garden where its pleasing fragrance will be quite noticeable, especially in the evening. We have a big crop of these tubers this year and are making the lowest price we ever made on tuberous bulbs. It is not at all likely that we will ever be able to sell as cheap again. It is a wonderful chance to get a start. A clump of a couple of dozen will make a nice show. You can use some for cut flowers. 6 bulbs for 20c; 35c per dozen; 25 for 65c.

MEXICAN TUBEROSES

1847—Calla, Golden Yellow (Elliottiana)

A beautiful new Calla for outdoor culture and for pot culture, for early spring bloom. The flowers are large and a clear golden yellow. Leaves a dark green spotted a creamy white, making a very striking and pretty plant. It is a good strong grower and we are furnishing large bulbs so you will have no trouble in growing a nice plant.

Large size, 35c each;
3 for \$1.00

CALADIUM OR ELEPHANT'S EAR

1848—Caladium or Elephant's Ear

These plants do not bloom, but they are valued for the appearance of their enormous leaves. They often grow 3 feet in length, and make a fine background for small plants and flowers. Give rich soil and plenty of moisture. 20c each; 2 for 35c; \$1.95 per dozen.

GIANT HYBRID AMARYLLIS

1901—Giant Flowering Amaryllis 75c each or 3 for \$2.00, postpaid

Mammoth bulbs sure to bloom. The flowers show variegated colors including delicate pinks and all shades of red in stripes and bands and on a light to pure white ground. Some show more variation than others. A surprise in every bulb. No two alike. Price, mammoth bulbs, 75c each or 3 for \$2.00, postpaid.

1845—Maderia Vine

A quick grower. Sometimes called Mignonette vine. It makes a dense branching growth, has glossy green leaves with small feathery white blossoms, quite fragrant. Fine for porches, arbors, etc. 6 bulbs 20c; 12 for 35c; 25 for 65c. All postpaid.

DAHLIAS

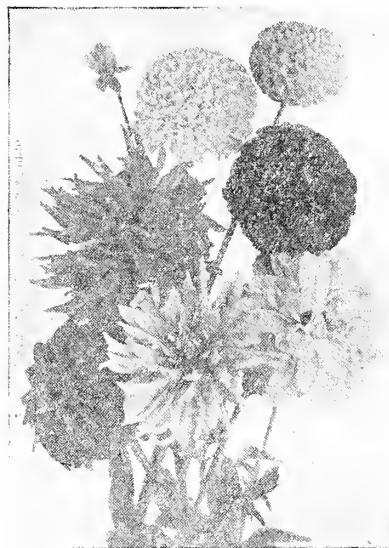

Our Dahlia Guarantee

If they do not bloom we will refund the price paid or replace them free of charge. Every Dahlia bulb we sell carries this guarantee.

Plant the latter part of May or first of June and you will have an abundance of bloom. Folks living where the summers are not so hot can plant them any time. There are four general types; the "Show", a very formal flower; the "Decorative", or less formal and large; the "Cactus" with slender pointed petals; and the "Pompon", or a diminutive Show.

1902—Field's Mixed Dahlias

12 Bulbs \$1.50

Showing the types of Dahlias found in our 1902 FIELD'S MIXED DAHLIA Collection. Price, 12 Bulbs, \$1.50, postpaid.

Show Type

1889—BONNIE BLUE. A lovely unique color of bluish-lavender. Long stemmed and free blooming. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1852—PENELOPE. White center tinted lilac. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1863—QUEEN VICTORIA. A clear, bright yellow. Very early and blooms freely. One of the most satisfactory show Dahlias we have. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1890—O. B. STEVENS. Very similar to Queen Victoria. A fine yellow. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1859—A. D. LIVONI. A delicate pink, long stems. Quilled petals; medium size. An old variety but very popular yet. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1861—BETTY LOU. A golden yellow tipped crimson. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1885—VIVIAN. White, very prettily edged rose violet. A perfect shaped flower. Each 25c; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1900—Type Collection of Dahlias

12 Bulbs \$2.50—Assorted Colors

4 Decorative, 4 Show, 4 Cactus

This collection represents the principle types and we will see that you get a full color assortment. The bulbs will be labeled and carefully packed ready for mailing. They will be taken from our regular stock and will be sound and in good condition. This will give you a good start of all types and colors. \$2.50, postpaid.

Pompon Dahlias

1854—SNOWCLAD. Perfectly formed little blossoms of pure white. Free bloomer. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

Supply Your Own
Needs With My
Reliable Seeds

1965—Color Collection of Dahlias

6 Bulbs \$1.25; 12 Bulbs \$2.00

For those who are not familiar with varieties but would like to have the bulbs under name we will be glad to select for you a half dozen varieties, assorted colors, all carefully labeled. Price, postpaid, 6 for \$1.25; 12 for \$2.25.

Decorative Type

1873—DARLENE. Very early. Blooms freely. A beautiful shade of shell pink, with a dainty blending of white at center. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1871—ELDORADO. Full double blossoms of pure gold on long drooping stems. Plants loaded with bloom. Seems to stand hot dry weather better than the average. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1893—JACK ROSE. A brilliant shade of crimson red just like General Jack rose. A free bloomer and fine for yard decoration. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1896—PINK JACK ROSE. Something like the Red Jack Rose only a lavender-pink in color. Blooms freely. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1887—PRIDE OF CALIFORNIA. Fine large flowers of brilliant red. Extra good. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1849—MADAM VAN LOON. Orange red with long stems. A free bloomer. Semi-double. Each, 25c; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1870—JERSEY BEAUTY. One of the finest pink dahlias in existence. Tall vigorous grower and a free bloomer. Very large bloom. Each 50c; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

1874—JERSEY BEACON. Color a bright scarlet with good stems and a thrifty plant. A very large flower. Each 50c; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

1876—MRS. I. DE VER WARDNER. A most wonderful flower. Very large, blooming when others are barren. Color a beautiful lavender pink. Each 50c; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

1873—COPPER BRONZE. This beautiful autumn shade is one of the best colors in dahlias. A free bloomer and a large flower. Each 50c; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

1884—MARION. Large flowers of bright red. The outer petals reflex toward the stem, giving it great depth. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

Cactus Type

1866—GOLDEN GATE. Large flowers of rich gold, overlaid pale bronze. A free bloomer. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1879—INDOMITABLE. An early variety with rosy-mauve flowers. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1881—LIBELLE. Purplish rose. Long pointed petals. Each 25c;

3 for 70c; 6 for \$1.35; 12 for \$2.50.

1882—JEAN CHAZOT. A golden bronze with a faint suffusion of red. Long slender petals and a large flower. Blooms early. Each 50c; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

GLADIOLUS MIXTURES

FIELD'S FINEST MIXED

1960—SPECIAL OFFER. 6 large bulbs each of Giant Nymph, Alice Tiplady, Fairlawn Yellow, Butterboy and Ulrica. 30 bulbs in all, 90c, postpaid.

We can sell Gladiolus at a low price because we grow lots of them, cultivate and harvest them by the use of machinery.
The above is one of our fields.

HOME GROWN GLADIOLUS BULBS

All prices postpaid

The prices are for vigorous blooming sized bulbs, 1 inch and up in diameter. Some varieties grow large bulbs and some, small ones. They will average about $1\frac{1}{4}$ inch to $1\frac{1}{2}$ inch in diameter. Fifty bulbs of one variety will be furnished at the hundred rate. Write for special prices on thousand lots.

1401—FIELD'S FINEST MIXED, Large Bulbs. Mixed colors in Gladiolus are just as pretty as mixed colors in any other flower and a great many people prefer them to the named varieties.

This mixture shows just about everything in Gladiolus colors. We grow them as a mixture in the field and then add others to give them still more color. I don't believe you will find a better mixture anywhere. Large blooming sized bulbs. Price, 12 for 35c; 25 for 60c; 100 for \$2.00.

Unnamed Glad. Collection No. 1997

24 Bulbs, 65c

You can buy your gladiolus bulbs much cheaper if you do not require the name. Most people soon forget variety names anyway.

The flowers are just as pretty as those that are sold under name.

All bulbs in these collections are large blooming size.

Wide open flowers, long spikes and wonderful color.

If you want gladiolus under name turn to the list of named varieties where you will find a large assortment to select from.

All of the following will be found in the collection. It cannot be broken or the bulbs sold singly.

3 bulbs salmon pink flecked with rose.

3 " light pink. Very early.

3 " clear yellow. Early.

3 " a glorious deep scarlet.

3 " tall graceful red.

3 " cream white with dainty pink markings.

3 " dark clear purple.

3 " bright red. Tall spikes. Large blooms.

Orange and Yellow Colors

Postpaid price on single varieties except where noted; 3 for 12c; 6 for 20c; 12 for 35c; 25 for 65c; 100 for \$2.50.

1430—ALICE TIPLADY. Beautiful orange-saffron.

1460—FAIRLAWN YELLOW. Clear yellow and very early.

1584—GOLD. Pure golden-yellow; throat a shade deeper. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1690—JACK LONDON. Light orange with vermillion stripes.

1507—PRIDE OF LANCASTER. A ruffled orange-salmon.

Color Collection No. 1990. 1 bulb each of the Orange and Yellow varieties, each bulb labeled, 25c.

White and Cream White

Postpaid price on single varieties except where noted; 3 for 12c; 6 for 20c; 12 for 35c; 25 for 65c; 100 for \$2.50.

1563—ALBANIA. Pure white. Large open flowers. Late.

1451—AUTUMN QUEEN. Creamy-pink.

1438—ELORA. White with dark red blotches.

1441—HELEN FRANKLIN. A ruffled white tinged lavender.

1444—LILY WHITE. Dainty creamy-white.

1445—LUCETTA. Ivory white with lines of faint pink.

1446—MARY PICKFORD. A delicate creamy-white, throat soft sulphur-yellow.

1497—MINNESOTA. Amber white with markings in throat.

1658—VESTA TILLEY. White with crimson throat.

Color Collection No. 1991. 9 bulbs, 1 each of the white varieties each bulb labeled, 40c.

1967—FIELD'S FINEST MIXED, Small Blooming Size. This is the same mixture as above but smaller younger bulbs. Price, 100 for \$1.00.

1970—FIELD'S FINEST MIXED, Bulblets. We offer the same mixture in bulblets. These are about as large as a pea and will not bloom this year but will grow a bulb to bloom next year. It is a good way to get a lot of Gladiolus bulbs at a small cost. Price, 200 for 25c; 1000 for \$1.00.

Pink Colors

Postpaid prices on single varieties except as noted; 3 for 12c; 6 for 20c; 12 for 35c; 25 for 65c; 100 for \$2.50.

1420—AMERICA. Soft rose pink.

1421—E. J. SHAYLOR. Deep rose-pink. Ruffled. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1422—EVELYN KIRTLAND. Rose-pink, darker at edges, with scarlet blotches on lower petals.

"You may have your cake and eat it, too." Plant a bulb and it will grow a beautiful flower and a bulb to plant the next year. But don't stop at one bulb. Plant them by the dozens or by the hundreds.

1483 — GIANT NYMPH. Large delicate salmon-pink, with creamy-yellow throat. Long spikes.

1410 — GRETCHEN ZANG. Large pink; scarlet blotches on lower petals.

1424 — HALLEY. Large salmon-pink. Very early.

1425 — LE MARE-CHAL FOCH. Light silvery cameo-pink. Very early.

1795 — LOS ANGELES. Beautiful shrimp-pink. Called the "cut-and-come again" Glad.

1499 — MONA LISA. Very soft pale rose-pink. Ruffled.

1812 — MR. W. H. HIPPS. Salmon-pink with lower petals faintly striped with ruby. Very large flowers with many open at once. 3 for 30c; 6 for 55c; 12

for \$1.00.

A cluster of GIANT NYMPH

1429—MRS. DR. NORTON. Large pale pink; yellow throat. A fine flower with tall stems.

HELEN
FRANKLIN

Purple, Blue and Lavender Colors

Postpaid prices on single varieties except as noted; 3 for 12c; 6 for 20c; 12 for 35c; 25 for 65c; 100 for \$2.50.

1451—ANNA EBERIUS. Short crop. Use Henry Ford.

1452—BARON J. HULOT. Deep violet-blue. Small flowers. 3 for 25c; 6 for 45c; 75c per doz.

1682—CAPT. BOYNTON. Lavender with deeper blotch on lower petals. Large, wide open flowers. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c.

1486—HENRY FORD. Dark clear purple shading into deeper tones near the center. Large blooms and many open at once. Extra good.

1423—HERADA. Very large blooms of pure lavender-purple.

1692—LOUISE. Clear lavender with blotch of velvet red towards center. 3 for 18c; 6 for 30c; 50c per doz.

1426—MARY FENNELL. Deep lilac shading to primrose yellow throat. 3 for 18c; 6 for 30c; 50c per doz.

1698—MRS. F. C. PETERS. Very fine rosy-lavender, with purplish blotch in throat. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c.

Color Collection No. 1992. 7 bulbs, 1 each of the Purple, Blue and Lavender, each bulb labeled, 40c.

Red and Scarlet Colors

Postpaid prices on single varieties except as noted; 3 for 12c; 6 for 20c; 12 for 35c; 25 for 65c; 100 for \$2.50.

1411—JOE COLEMAN. A rich red with throat markings.

1412—MRS. FRANCIS KING. Large flame-red.

1461—CRACKERJACK. Velvety dark red.

1408—CRIMSON GLOW. Glistening crimson. Very large flowers.

1478—DR. F. E. BENNETT. Peach-red, overlaid with flame-scarlet. 3 for 25c; 6 for 45c; 12 for 75c; 25 for \$1.25.

1503—EDNA PELLA. Beautiful rosy red. Very early. Long sturdy stems. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1805—GLENDALE. A tall graceful rose-red.

1462—RED BIRD. A fine, big, wide open red. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1416—RED CANNA. Tall spike, deep red.

1515—SCARLET GLORY. Beautifully ruffled scarlet. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1418—WAR. Deep blood red. Late. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c; 100 for \$3.00.

1680—WINE KING. A fine wine red.

Color Collection No. 1989. 12 bulbs, 1 bulb each of the red and scarlet colors, each bulb labeled, 50c.

RED BIRD

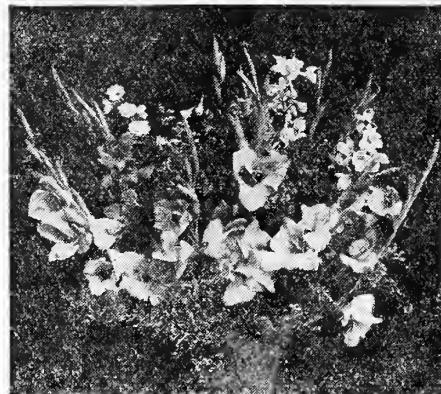

Other Colors

1513—ROMANCE. A mixture of orange, salmon and rose, with bluish border on petals. An odd but lovely combination. 3 for 18c; 6 for 30c; 12 for 50c; 25 for 85c.

1450—ROSE ASH. Called "Ashes of Roses." Large flower and very popular. 3 for 18c; 6 for 30c; 50c per doz.

1405—GOODRICH MIXED. An extra fine mixture. 6 for 30c; 50c per doz.

Butterfly Varieties

BUTTERFLY OR PRIMULINUS

Postpaid price on single varieties; 3 for 12c; 6 for 15c; 12 for 25c; 25 for 45c; 100 for \$1.65.

1430—ALICE TIPLADY. Beautiful orange-saffron. Many flowers open at one time. Very choice and winner of many awards.

1523—ARDEN. Orange-red.

1522—ARLON. Salmon color.

1470—BUTTERBOY. Large golden-yellow. Tall, strong plant.

1685—CANARY YELLOW. True to its name.

1551—CAPELLA. Orange-red.

1808—FLOSSIE COOPER. A large peach pink.

1583—GLADNESS. Lavender.

1553—MAIDEN BLUSH. Dainty flesh-pink flaked with old-rose.

1491—MING TOY. Showy deep buff; yellow throat. Tall plant.

1800—MISHAWAKA. Canary yellow.

1500—MYRA. A large salmon-pink.

1508—BRONZE BEAUTY. Buff-yellow. Strong grower.

1458—SHELL PINK. Apple blossom pink.

1514—SOUVENIR. Large pure-yellow.

1526—ULRICA. Large rich yellowish-orange.

1434—ROANOKE. Pale yellow. Strong grower.

Color Collection No. 1996. 17 bulbs, 1 bulb each of the Butterfly varieties, each bulb labeled, 45c.

ALICE TIPLADY

1404—BUTTERFLY or PRIMULINUS MIXED. Contains most of above varieties which gives a good range of color. A rich mixture of this wonderful flower. Price, 3 for 12c; 6 for 15c; 12 for 25c; 25 for 45c; 100 for \$1.50.

LARGE FLOWERED GLADIOLUS

6-Color Collection

30 Bulbs, 85c, Postpaid

5 large bulbs, varying shades of Red.

5 large bulbs, Purple, lavender or Lilac.

5 large bulbs, Pink shades.

5 large bulbs, Orange predominating.

5 large bulbs, White to White with markings.

5 large bulbs, Yellow, Cream or Buff.

We have put as much color as possible in these collections. From one to three varieties in each section. On most varieties there will be varying shades of color on the flower. They will all be the big type of flower. Each color section will be labeled and carefully packed.

Gladiolus Special No. 1984, 85c postpaid.

PRIZE WINNING GOODRICH VARIETIES

One of the most successful gladiolus breeders in the country, Mr. C. L. Goodrich sold his entire stock of bulbs to us. We planted the lot last spring and have had a good chance to observe them this past summer. There are some beauties among them.

They are all Mr. Goodrich's own origination. He has been crossing and developing new varieties for over 25 years and has been very lucky. He has also been a very enthusiastic exhibitor and has won many prizes at flower shows, both state and national.

We are offering some of them under name and some in collections.

1571—OLIVE GOODRICH. First prize at the Indiana state show. Margin of petals a light pink shading to white toward the center with faint lemon yellow in the throat. Each 20c; 3 for 55c; 6 for \$1.05; 12 for \$2.00.

1572—OPAL LONG. Old rose with the throat shading to cream. The color is different. Each 15c; 3 for 45c; 6 for 80c; 12 for \$1.50.

1573—J. ELTON CARTER. A winner of two gold medals; one by the national gladiola show and one by the Iowa show. A bright red and has a long spike. Each 10c; 3 for 45c; 6 for 80c; 12 for \$1.50.

1574—REFLECTION. Just imagine a pure white with a bright red spot of color in the throat. This variety has won first place at a number of shows. Each 20c; 3 for 55c; 6 for \$1.05; 12 for \$2.00.

1577—LUCY LORING. Lilac with a pretty crimson blotch on the lower petals. A late bloomer. Each 10c; 3 for 25c; 6 for 45c; 12 for 75c.

1933—ASSORTED VARIETIES. There are a large number of varieties in Mr. Goodrich's collection of only a few bulbs each. We could not list them under name as there are so few of each variety. We offer a bulb of each, as long as they last. Every variety is a good one, all properly labeled, all different. Price: 3 for 25c; 6 for 45c; 12 for 75c.

1575 — RUFFLED GOLD.

Won a silver medal in 1926 as the best variety introduced that year. It is unquestionably the best ruffled yellow. A small bright red spot in the throat makes a charming color combination. Each 12c; 3 for 30c; 6 for 50c; 12 for \$1.00.

1576—DR. A. C. BANSEN.

The earliest variety introduced by Mr. Goodrich. Color a shrimp pink and the throat stippled crimson. Each 10c; 3 for 25c; 6 for 45c; 12 for 75c.

RUFFLED GOLD—The best ruffled yellow

1579—KEN. In 1929 awarded blue ribbon as the best introduction in the last five years. A white, marked and mottled crimson. Blooms late. Each 20c; 3 for 55c; 6 for \$1.05; 12 for \$2.00.

1582—MRS. C. M. VOSBURG. Awarded three blue ribbons as the best pink. Color, a medium pink with a creamy yellow throat. Each 15c; 3 for 45c; 6 for 80c; 12 for \$1.50.

CONTESTS FOR EVERYBODY! 198 CASH PRIZES FOR THE WINNERS

Here Are 3 Contests Which I Hope You Will All Enjoy and Take Part In:

The Rules are simple. You can enter one, two or all three of these contests whether you order or not. Put each one on a separate piece of paper. Limit each one to 150 words or less. Put your name and address on each entry.

Employees of my company can't compete. Judges decision is final. Duplicate prizes will be awarded in case of ties.

All entries must be in our hands by April 1, 1932.

CONTEST NO. 1

What 5 Vegetables listed in this catalog do you like best and why do you like them best?

CONTEST NO. 2

What 5 Flowers listed in this catalog do you like best and why do you like them best?

CONTEST NO. 3

What 5 Shrubs listed in this catalog do you like best and why do you like them best?

These CASH PRIZES Will Be Awarded the Winners In EACH CONTEST

Each Contest Will Be Judged Separately. These Prizes Will Be Awarded to the Winners In Each of the 3 Contests

If Winners' Entries and Order for \$1.00 or More Reach Us Before March 1st, 1932

If Winners' Entries and Order for \$1.00 or More Reach Us Before April 1st, 1932

If Winners' Entry Reaches Us Before April 1st, 1932 Whether With Order or Not

The Hybrid or "Mule" Corn

Grow Just as Much Corn on One-Third to One-Fifth Less Land

"Mule" Corn is cutting production costs on hundreds of farms. You can do the same. Only 8 to 15 bu. per acre increase in yield will give you an average of 575 bushels more corn on 50 acres. If you don't need more corn—cut down the acreage 15% to 20% and put the extra land in alfalfa or sweet clover and build it up. You should have just as much corn on this smaller acreage and you are building up your farm and producing more from it.

That's two ways of cutting the cost of producing corn. One with Hybrid or Mule Corn and the other by plowing under a crop of sweet clover or alfalfa. That's the best way I know of these days to make land pay the taxes and a profit besides. It costs just as much to tend an acre of corn that yields 30 bushels as one that makes 50 or 60.

How It's Made

Yes, it's a long, hard, tedious expensive job to make Hybrid Corn. First you must inbreed and hand pollinate for 6 or 8 years or more, then cross the inbreds. Some inbreds won't cross well together and that means more experimenting. Our hybrids have been produced by the Wallace system. We have been very successful in the yield contests. Our "Mule" Corn circular will tell you more about how it is produced and also our winnings and letters from other growers all over the country.

This shows some of the boys pulling tassels from the female rows. We plant one male row to every 4 female. The tassels are removed from the female rows so it will be a pure cross free from inbreeding. We used 74 boys and men this year detasseling. It's some job to do it right. Seed is saved only from the female rows.

Here is a picture of our "Mule" Corn breeding plots. Notice the stiff stalks and the number of ears on the stalks. Nearly every stalk has a good ear, some two and a few three. Depends on the richness of your soil and how much rain you have.

The ears of "Mule" corn are similar in size and appearance to smooth Reids Yellow Dent or Krugs. The kernels are oily and feed out well. When shelling you nearly always have a large over run and it outyields them all. Our "Mule" corn is produced by the Wallace system.

Why "Mule" Corn?

Several write in and ask if "Mule" Corn is good only for mules and why we picked this name. Like the Mule, our "Mule" corn is a hybrid. We all know the mule is harder than the horse. We know that the cross-bred hog grows faster than either of the parent pure-bred. And so with "Mule" Corn—it has more vigor, yields higher, is more prolific, stands drouth better and is adapted to a wide variety of conditions. It also feeds better than most kinds of corn because it contains a lot of oil. Yes, it's a Yellow Dent and looks something like Reid's.

Ia. State Yield Contest Results

Our Hybrid or "Mule Corn" made the greatest yields we have ever had or ever heard of anyone having. In District 5 we outyielded the Farmer's Corns an average of 17½ bushel per acre—in District 10 over 21½ bushels per acre, in District 11 over 28½ bushel and in District 12 over 17¾ bushel per acre.

WINS MOST EVERYWHERE

In a County Test near Mt. Pleasant, Iowa, our Hybrid or "Mule" Corn made over 90% bushel.

In County Test near Brownstown, Indiana, "Mule" Corn made 10 bu. per acre more than Yellow Dent. Stalks stiff, many with 2 ears. (Only 3 extra bushels pays for seed).

In the County Test at Linneus, Missouri, our Hybrid or "Mule" Corn made 49 bu. per acre, the low farmers corn 31 or a difference of 18 bu. The average of other Hybrids was 43 bu. or 6 bu. less. Average of all farmers corn was 33½. (Only 3 extra bushels pays for seed).

On the Lawton farm, a County Test near Atlantic, Iowa, "Mule" Corn made 97 bu. one Reid's Yellow Dent 67. A difference of 30 bu. per acre. Average all farmers corn 76 bu. or 20 bu. less. Hybrid stalks standing stiff, very little corn on ground, had hard winds. (Only 3 extra bushels pays for seed).

In Tipton, Iowa, County test, "Mule" Corn made 65 bu. while low farmers corn went 52½ or 12½ bu. less. Stalks stiffer, more ears to stalk. (Only 3 extra bushels pays for seed).

Mahaska County, Iowa Yield Test showed our Hybrid or "Mule" Corn at the top with a yield of 70 bushels which was 26 bushels higher than the low farmers corn and outyielded all other hybrids 4 bushels per acre.

In the Randolph County, Indiana yield contest our Hybrid or "Mule" Corn made 71½ bushel per acre which was 21½ bushels more than the low farmer's corn and over 10 bushel more than the average of all corn entered. This was a special test made by the County Agent. He says the stalks were very stiff and almost none barren.

In the famous Pottawattamie County Iowa Yield Test, our Hybrid or "Mule" Corn made over 86 bushels per acre which was by far the highest yield of any kind of corn

entered. The lowest yield was 56 bushels or 30 bushels less. The average of all farmer's corn entered was less than 70 bushels or over 16 bushels less than "Mule" corn. (Only 3 bushels extra per acre pays for "Mule" corn seed).

Double Your Net Profits With "Mule" Corn

It's the extra 10 or 15 bushels per acre that makes the profits. It takes about so much to pay for labor, taxes, interest, rent, horse keep, tractor, machinery, etc. All you get above what is needed for production expense is clear profit. If your land makes only 40 bushels per acre and it takes 38 bushels to pay expenses your profit is 2 bushels. If "Mule" Corn increases the yield to 50 bushels per acre, your profit is 14 bushels or 7 times as much net profit. Ever think of it that way?

WHERE "MULE" CORN WILL MATURE AND PAY

We have three kinds of Hybrid or "Mule" Corn. One Extra Large Eared, fairly late kind, for use from here south. Then a Medium Sized kind for use in the southern half of Iowa and similar territory. Then a smaller, Earlier Kind for use as far north as Sioux City and in favorable years to the Minnesota line. If you leave it to use we will send the kind best suited to your conditions.

Lower Prices

Ungraded	\$4.50 bu.
Graded	7.00 bu.
On less than bushel lots add 15¢ per order.	

SPECIAL—7 lbs. for 1 acre enough for trial \$1.00 Postpaid

Free Circular

For more details, a larger list of contest winnings, letters from growers and a complete story of how we make "Mule" Corn. Write for the "Mule" Corn Circular.

3-Bu. Increase Pays For Seed

It costs about \$1.00 an acre for seed of the Graded "Mule" Corn if bought in bushel lots. If you get 50c a bushel for the crop a 3 bushel increase pays for the seed. If you get only a 10 bushel increase this extra corn costs you only 10¢ a bushel as \$1.00 for the seed is the only extra money you are out. If, like some, you get a 20 bushel increase the cost is only 5¢ a bushel. How can you make money easier?

Get New Seed!

Don't try to plant seed saved from a crop of Hybrid Corn. Oh yes, it will grow and produce corn but it's like cross-bred hogs, the first cross is a dandy. The second and third crosses run out, go to pieces and lose their vigor.

More About "Mule" Corn

STOOD DROUGHT BEST OF ALL

"The Hybrid corn has stood the drought better than any corn on the place. You might say there are no barren stalks, one or two ears on every stalk and while other corn was burning it kept nice and green. The ears are well filled."—Fred Jontra, Pottawattamie Co., Kansas.

"The Mule Corn made around 25 bu. to the acre and the Yellow Dent and Iowa Silvermine in two other fields with the same treatment made practically nothing."—R. N. Shaw, Washington Co., Arkansas.

BEST DRY WEATHER CORN

"My field of Mule Corn has proven the best dry weather corn I have ever seen."—Win Kirkhart, Stark Co., Ohio.

HYBRID CORN 70 BU.—OVER 40 BU.

"The Hybrid corn stood up like fence posts while my own corn lodged so bad the horses could not follow the rows when picking it and that is not all the Hybrid made 70 bu. per acre while my own made 40 bu. There were parts of the field that would have made more than 100 bu. per acre."—W. G. Reeves, Madison Co., Nebraska.

HYBRID BETTER FOR PICKER

"I have found the Hybrid corn outyielded the common kind from 10 to 15 bu. per acre. The stalks were much stiffer, was standing up better and not as many ears blown off and the picker did not knock off nearly as many as the common corn."—Rudolph Peters, Pottawattamie Co., Iowa.

Here is an article that appeared in the Malcom, Iowa, paper this November.

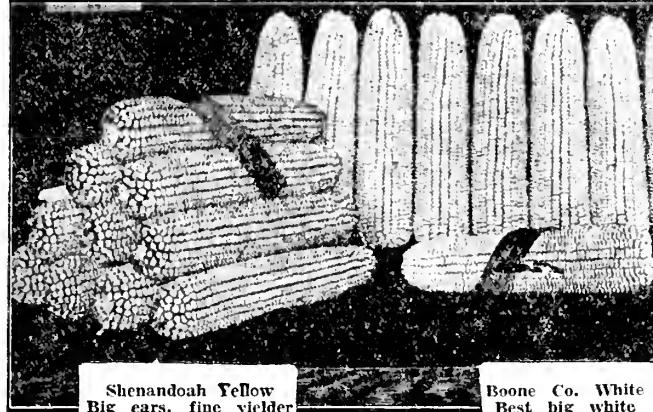

100 Bushels to Acre

B. Reed Thompson, farmer living north of Malcom is harvesting a field of corn that is yielding a fraction more than 100 bushels to the acre. The corn is of hybrid variety and is on sod ground.

85 TO 90 BU. PER ACRE

"The Mule Corn that I received from you proved to be the best corn I ever had. In fact, it was the best corn that ever came into the state of Missouri. The acre I planted yielded around 85 or 90 bushels. It is extra early and stands the drought well. Every stalk had an ear or nubbin and you know there wasn't any nubbins to speak of on that acre. I would like to tell the world about this corn."

Former price \$1.50, now \$1.00 Postpaid

The Finest SEED CORN Money Will Buy

Shenandoah has long been called the Seed Corn Center of the country. Our soil is very rich and much of it sandy which grows nice ears and matures it early. But most important of all we breed the finest seed that can be produced. If some man develops a new strain and it costs \$50.00 or even \$100.00 a bu. to get a start of it we get it. If your seed is run down and you need a fresh

start this is a good year to buy it. It has been a long time since we sold seed corn so cheap and it will probably be a long time before we sell it as cheap again. We have seed for any climate, soil or locality. If in doubt which variety to choose leave it to us to pick the kind that will mature and yield well for you. All corn is nicely graded and guaranteed to test nearly perfect.

than 1 bu.

Guaranteed to Grow

Each grade we sell is guaranteed to test to suit you or you can return the seed and get your money back. We will stand or fall on your judgment. We test and retest and check every lot very carefully. We cannot

guarantee a stand as there are too many bugs, worms and cold weather to contend with. But test it any way you please.

Golden Utility

Medium Early. Iowa Yield
Contest Winner

It is earlier than Krug's and later than Golden King. Fine for central Iowa, eastern half Nebraska, etc. In fact, does good anywhere it will mature. Has wide, meaty grain and is finest feeding corn I ever saw. This was our biggest seller last year and will probably be our best this year. Wonderful all-around corn for good yield, early maturing and feeding value. Offered in 3 grades.

Golden King for Northern Iowa

Golden King is the greatest yielder for northern Iowa same as Pfister's Krug is for southern Iowa. Try it.

Pfister's Krug

Iowa's Greatest Yield Winner

For 7 or 8 years Krug corn has led the Yield Contest in Southern Iowa for consistently high yields. The Pfister strain is best and has lead oftenest. If you want Iowa's greatest open-pollinated, main crop corn try Pfister's Krug's. See ear above. Wonderful feeding corn and, of course, yellow. We got seed direct from originator. Supply is limited. Order early.

LYMAN'S SELECTED GRIMM "THE DADDY OF THEM ALL"

A. B. Lyman is the man who really discovered and developed Grimm Alfalfa. It was his life work, and it has meant millions of dollars to farmers. A. B. Lyman was a Pioneer.

Up in Carver County, Minnesota, A. B. Lyman saw one alfalfa crop after another freeze out, year after year. The severe winters wiped out every Alfalfa variety they tried. Lyman's neighbors gave up and quit trying. But Lyman discovered that an old German settler named Wendelyn Grimm was able to keep growing alfalfa when all others in that section failed. Lyman experimented and worked with this variety. He found it was the hardest of all alfalfas.

From this old settler's seed he developed what he called

Lyman's Grimm and today everyone knows it as the Daddy of practically all Grimm.

In the alfalfa seed business they all take their hats off to A. B. Lyman and most of them trace their own Grimm right back to the foundation seed which A. B. Lyman found in Carver County.

THE STANDARD OF ALL ALFALFA

Today Lyman's Selected Grimm is the truest Grimm that can be grown. The best of them all and the kind they all trace pedigrees back to. It is the one original Grimm.

And so you can see why I am glad to tell you we have this genuine Lyman's Selected Grimm for you this year. I am a crank on Grimm, have always begged my friends to plant it whether they got it from me or from someone else, and I've done a lot of kicking about "Bootleg" Grimm, too.

LOOK OUT FOR "OUTLAW" GRIMM

Don't forget the word Grimm has been kicked around a lot. You read about "This Grimm" and "That Grimm". Some of it's good, some bad. Lots of it is flying under false colors and you want to watch out for that kind.

When I boast Grimm Alfalfa, I mean honest-to-goodness Grimm. Lyman's Selected Grimm is the Daddy of Them All. It dates right back to A. B. Lyman's Original Seed.

We've worked long and hard getting it for you and you can be sure it will give you the most satisfaction, the best results of any you could possibly get.

LOWEST PRICE IN YEARS

And here's more good news for you. We have worked on the price, too. And it is going to be the lowest it has been in years.

It is just plain, common sense to plant Lyman's Selected Grimm. You will have lower per acre seeding cost to start with. And the better, harder stand will prove the cheapest in the long run, too.

There isn't any room for argument about the high quality of Lyman's Selected Grimm. It is the Standard of Alfalfa Values. And so I want you to write for the prices. Right now I could quote you the lowest price in years. But, we are still working on it and when the Price List is ready, I am sure it will be lower even than what I could quote now.

So be sure to write for a copy of our Latest Field Seed Prices. It will be all ready by the time you get this catalog.

HENRY FIELD

SIGNATURE ON EVERY BAG

Lyman's Selected Grimm is the first and finest variety of Alfalfa. Besides dating back to A. B. Lyman's Original Grimm, it is raised under most careful plans and under rigid inspections. Every bag is from the selection of A. B. Lyman. Every bag traces back to the original Lyman Grimm of Carver County, Minnesota.

You will get the pure and the original Grimm when you order Lyman's Selected Grimm. So, don't gamble with the "outlaw" kind. There isn't any "just as good" as the Daddy of Them All.

Prices Ready Soon!

I can tell you right now that Field Seed prices are lower than they've been in years. Never had bigger, better seed values—and we are working right now on our price list of Alfalfas, Clovers, etc. Write for your copy. I'll promise you some surprises, and pleasant ones, too.

HONEST SEED AT HONEST PRICES

What we've always been telling you about alfalfa, sweet clover and all these other crops is true, every bit of it. If you get alfalfa or whatever you pay for.

Watch out for this "bargain" or "bootleg" seed. Don't let anybody fool you into a good trimming by telling you that their "cheap" or bargain seed will give you just as good a crop as quality seed like ours. Stop and think a little bit and you can figure it out yourself. You get exactly what you pay for and no more. Generally a lot less than you pay for—because, that kind of seed usually has some kind of weed in it that means you'll have a big fight on your hands several years after you plant the seed, getting rid of the weeds.

Or it may be half light, shriveled or dead seed that won't grow at all. Or your alfalfa may be part sweet clover. There's always something radically wrong with it. You must know what's in the seed you buy and how

it will grow. How good the seed is, if it's free of weeds, how much it will germinate, and where it is grown.

Every bag of our seed that is shipped out has all this information on it for you. The purity, germination and origin of the seed. Every lot is thoroughly tested by a man who really knows seed, before it is allowed to go out. We want to be proud of every bag of seed we send out, and we are proud of it.

It isn't always the cost of the seed that counts most, but it means a lot to you to lose the crop, the use of the land and a lot of wasted work.

So, whether you buy your seed from us or not, be sure and get good honest seed. You'll find it by far the cheapest in the long run. We believe that quality for quality and price for price, that we can give you the best seed at the lowest price. Send to us for the farm seed you need. When it comes, look it over, see if it isn't as good or better than you thought it would be, and if you don't say it is worth the money, it's our seed. That's the way we like to sell you farm seed.

Henry Field

ALFALFA

You know how we have always felt about Alfalfa. We've always boosted it—want every one of you to have at least one field or a few acres of it.

Still there isn't nearly enough of it planted. Will never be satisfied until we see every farm have at least a few acres of Alfalfa on it. A lot of you have some—but most of you don't have enough, and we are going to keep after you until you do have enough.

There isn't any doubt but that Alfalfa is the Queen of all legume crops—and probably the most valuable farm crop of any that you can grow on your farm. You're missing out on a lot and are getting behind the times unless you are using this wonderful crop.

Alfalfa fits in on any farm—no matter what kind of farm you have, big or little, grain farm or stock farm. And, it will help you a lot in returning a neat profit to you at the end of the year when you figure up whether you have made anything or not.

Nothing beats Alfalfa hay for quality and richness. All kinds of livestock and poultry thrive on it. It's rich in proteins and furnishes a lot of things that other hays and grains do not have. It can't be beat for cattle and hog pasture. It makes a dandy good cash crop—you can always sell Alfalfa. And to top it off, Alfalfa is one of our best soil builders. What more could you ask of any crop?

YOU CAN'T BEAT IT FOR LIVE STOCK

Hardy Nebraska Alfalfa

Righ here, we want to say a good word for Nebraska Alfalfa. It's pretty hard to beat. They grow a lot of mighty nice Alfalfa in Nebraska. It is a big Alfalfa State and they believe in raising good seed. And it's hardy, plenty hardy for most any place here in the Cornbelt. You don't need to worry about that.

A lot of you want a good hardy Alfalfa that will stay with you and produce a big tonnage of good quality hay. Ours is every bit Nebraska grown, new crop seed that is bright, plump and free of noxious weeds and other crops. Cleaned right over our own mills so you know it has a high purity test. It contains quite a lot of Grimm, Cossack and Nebraska grown Dakota No. 12 that doesn't have any papers on its so, of course it all goes for common alfalfa. Write for our latest Monthly Price List.

Grimm—Certified Blue Tag

Here is a real high quality Grimm Alfalfa which is one of the best. Tests 99%, or better pure, is high germinating, of the best of color and big plump berries. Every bag is State Sealed and Certified, and comes to you carrying the Seal and Tag of the State Inspector. Every field is thoroughly inspected from start to finish. When you buy this Certified Blue Tag Grimm, you know that you are getting nothing but Grimm, and the best there is for hardiness. It's all beautiful seed. Write for our latest Monthly Price List.

Dakota No. 12 and Montana Common

A lot of farmers pick Dakota No. 12 above all other varieties of common alfalfa. For years, we have recommended it to our friends and it has always proved a mighty good variety. A heavy producer of fine quality hay and because it is raised under the most severe winter and climatic conditions, you won't have to worry about it not going through the winter. Hardy anywhere in the Mid-west. Ours is strictly genuine Dakota No. 12 and you will find our prices low for quality seed.

Seed grown in Montana can't help but be hardy. And if you want the best in common alfalfa, something that is hard to equal for hardiness—and at a price you can afford to pay, buy our Montana alfalfa. We have a real value for you in choice Montana Seed. Write for our latest Monthly Price List.

Utah Common

For the Southern half of the Cornbelt or from Southern Iowa on South. Utah Common has always been hardy enough. Utah Common produces good heavy crops and the hay is always of fine quality. Our seed is of the best and is priced right. Write for our latest Monthly Price List.

Here's what our Hardy Nebraska Alfalfa will do for you

Sweet Clover growing next to Marquis Spring Wheat

SWEET CLOVER

The World's Greatest Soil Builder

Most of our farms are showing their age right now and just a lot of them have been drained of fertility until their productiveness is just about half what it ought to be. We are all finding out that we have absolutely got to put fertility back in or soil gets old and feeble and yields are cut right in two.

We all know that our farm land is valued in direct proportion to what it will produce. And everyone of us can name half a dozen farms that have been run down with continued crop taking and are so worn out they are almost a drug on the market.

And every farm no matter how good it is today is going to get that way unless we face the facts and get the habit of putting fertility back into the soil.

Right there you have the reason for Sweet Clover. Sweet Clover is the greatest soil building legume in the world. When you plow under a good stand of Sweet Clover you are putting the equal of 20 tons of stable manure to the acre. Most of you haven't got enough live stock to produce a tenth part of the fertilizer that is needed. Sweet Clover is the greatest of all green manures and you ought to be using it right along every 3 or 4 years.

Sweet Clover fits perfectly into crop rotation plans and while it is putting fertility back into your farm you can make it do duty as pasture and under favorable conditions, you can put up some mighty good hay off of it, to boot.

Most people sow it with a small grain crop in the early

KOREAN CLOVER OR LESPEDEZA

I don't have the time or space here to tell you the whole story about this wonderful new clover. But, I do want to make it just as emphatic as possible that every farmer in the Corn-Belt should give it a trial. You ought to have ten acres or more, but if you don't want to put out that much, you should at least try one acre. I firmly believe that it is the greatest new farm crop since the introduction of alfalfa.

The great thing about it is that it will grow and thrive where all other clovers would fail entirely. It does not need lime nor rich soil. It will grow on thin, dry, sour or old land where you couldn't even sprout red clover, alfalfa or sweet clover. It will grow anywhere except on wet or heavily shaded land. It must have sunshine, and doesn't like wet feet.

Sow in the winter or early spring right on top of the ground, in pasture, meadows or small grains. Use

10 pounds per acre at least. It comes on rapidly either in pasture or in the small grain. It makes a world of rich feed in the stubble the first year and a heavy growth for hay or pasture for next year. Seeds freely and as the seed shatters readily it reseeds itself with great certainty.

Enriches the soil like other clover, and is as rich as other clover for hay and pasture.

There should be at least a trial acre on every farm in the Corn-Belt. Send for 10 pounds and try it out. Our seed is all new crop, of high purity and germination, and is free from mixture with its "poor relation", Japanese clover, which is somewhat similar but nowhere as good.

Special trial offer 3 lbs. for \$1.00 postpaid; or 10 pounds, enough for one acre for only \$2.75 postpaid anyplace in the United States. See monthly price list for special quotations on larger amounts.

spring, cut off the grain for early hay, pasture down the growth in the stubble, and let it grow until the next spring. Then, plow it under just ahead of corn planting time.

That's the quickest and surest way to build up soil. Using it that way you don't miss any other crops and you can put the equal of 20 tons of stable manure per acre into your soil.

Just look around your neighborhood and see some of the worked-out farms. Figure how they are becoming less and less valuable year after year. If you've got a good one, keep it that way with Sweet Clover. If you've got a bad one, get Sweet Clover in there and bring it back to what it ought to be.

White Sweet Clover

We like the white sweet clover best for soil improvement. It makes an enormous root growth and punches your soil full of manure, and loosens up the subsoil, too. White Sweet Clover is really the best all 'round sweet clover for all purposes. Makes good hay and pasture as well as being best for soil building. A biennial. Write for our Latest Monthly Price List.

Yellow Sweet Clover

Lots of people like Yellow Sweet Clover best for pasture because it makes a lower, finer growth. Not so coarse as white sweet clover. It doesn't produce as much tonnage per acre because of the way it grows—but is a very good clover that is being used more every year. Is especially good in mixtures. A biennial. Write for our Latest Monthly Price List.

Grundy County Sweet Clover

Biennial. The Grundy County or Dwarf White Sweet Clover resembles yellow sweet clover very much in habit of growth. Is finer stemmed and shorter growing than the big white. A little earlier and ripens easily before frost. More leafy. Branches freely and makes an enormous yield of seed. Write for our Latest Monthly Price List.

Hubam Sweet Clover

Hubam Sweet Clover grows very much like the regular big white kind except that it makes all its growth in one season. Produces seed the first fall. Equal in all ways to White Biennial Sweet Clover.

Makes a great "bee pasture" because it is a quick producing, high quality honey plant which has a good heavy honey flow of around 40 to 45 days, under normal conditions. Its greatest advantage over the other sweet clovers is that it gives the same results as the biennial in one season instead of two. Write for our Latest Monthly Price List.

It's hard to beat Sweet Clover for cattle pasture

Marquis Spring Wheat

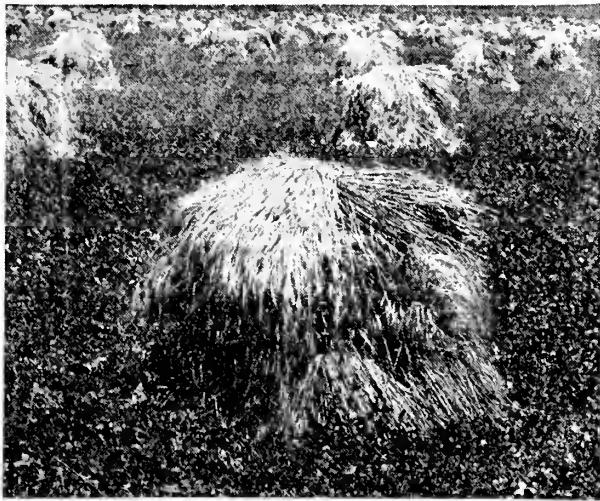

An outstanding spring wheat. It stands up well, is stiff stalked, and makes a heavy yield. So far, it is the best variety we've ever had, both for yield and quality. Common spring wheats cannot compare with it. A beardless variety. Write for our Latest Monthly Price List.

Velvet Barley

Velvet Barley, a six-rowed type, is just about the only one being used in this section anymore. It is by far the best for yield and it is so much easier to handle than common barley. The beards are smooth like oats, and if you've ever handled barley, you know how mean common varieties are to handle. Velvet will produce more grain and better grain than any of the others. Write for our Latest Monthly Price List.

Iowa 103 Oats

This is the only variety we handle. Iowa No. 103 Oats have proven to be one of the best for the Middle-west, both for yield and quality. Well adapted to a wide variety of soils. Make good yields. Stand-up well. Are medium maturing. Write for our Latest Monthly Price List.

A BEAUTIFUL STAND OF RED CLOVER SOWN WITH VELVET BARLEY

RED CLOVER

The Old Standby

Medium or Common Red Clover has always been an old stand-by here in the Corn Belt as well as lots of other good farming sections. It just can't be beat as an all around clover crop.

And—you know as well as we do that Iowa or Home-grown Red Clover is best of all for hardiness and quality. Red Clover is a great favorite for all around use for hay, pasture and soil improvement. Nobody has really found a substitute for it yet and when they try something else—generally go back sooner or later to Red Clover.

The best part of Medium Red Clover is that it answers all purposes. It fits well into any crop rotation. It makes a dandy, high quality pasture, either alone or in mixtures. All kinds of livestock like it and do well on it. And most of you know what good hay it makes. Produces well, is high in feeding value, and goes a long ways.

If you'll keep Red Clover growing on your farm every year you can stop worrying about keeping up the fertility of your farm. Plow under a good crop of Red Clover and that field will raise plenty of corn next year.

We believe that the best Red Clover seed is by far the cheapest in the long run. Ours is all new crop, thoroughly recleaned, homegrown, high testing, plump berried and free of noxious weeds. Just the kind that means a good crop that will be all clover and not weeds. Write for our Latest Monthly Price List.

MAMMOTH RED

About the only difference between Mammoth or Sapling Clover and Medium Red Clover is that the Mammoth grows taller and heavier and is later. It looks very much like Common Red Clover. Some like it best in timothy mixtures for hay because it matures with the timothy better. Write for our Latest Monthly Price List.

ALSIKE

Alsike shines on the poorer soils, thin upland and gravelly soils and on low, wet or overflow land. Alsike probably has more uses than any of the other clovers because it will make a good growth most anywhere. Makes fine stemmed, high quality hay or pasture, and should be used in all your mixtures. Write for our Latest Monthly Price List.

'PIG SALAD'-Dwarf Essex Rape

There isn't any doubt but that Dwarf Essex Rape is a great thing for growing pigs and hogs. Every hog raiser should have some, as it makes a wonderful summer hog pasture, and it is hard to believe the rapid gains it will put on. Experiments have shown that it even beats Alfalfa for putting the quickest and most economical gains on hogs. It's good for calves and sheep, too.

Rape is always cheap in price and as it takes only six to eight pounds

The Greatest Of All Annual Grasses SUDAN

No other annual crop will produce as much hay or pasture per acre as Sudan Grass. Cane and Millet both make good hay but we think Sudan is lots better. It yields more, is more palatable, finer and stock like it better. Doesn't sour and cures a lot easier and quicker.

Sudan Grass will yield two big crops of hay in one season. It is very resistant to dry, hot weather, in fact, it likes it—and will make a world of hay or pasture right through the hot, dry months when the other grasses are all dried up. Sudan will carry more livestock per acre than any other pasture crop.

Plant it after the ground is well warmed up, or anytime from two weeks after corn planting time up to July 1st. It does well on any well drained soil and is sure to catch.

We think that every farm should have at least a few acres of Sudan Grass on it—either as a regular pasture planted every year, or to be used as an emergency or catch pasture.

After you once grow it you'll never be without it and you will say it is the greatest pasture and hay crop you ever had. And, it is the cheapest crop you can seed. Send for our Free Sudan Leaflet which will tell you all about how to grow it and take care of it. Write for our Latest Monthly Price List.

CANADIAN FIELD PEAS

Canadian Field Peas are being used more and more every year here in this part of the country. They are a great crop in the North and Northwest and it will pay you to use them. They have long fine-stemmed vines and pods like common peas, only more of them.

If you want a real early spring pasture or are short of good hay, Canadian Field Peas will fill the bill best of all.

Two and one-half bushels per acre alone or one and one-half bushels each Oats and Peas planted early will give you a big yield of high quality hay. They are a legume and so make a rich feed.

And they come off the ground early enough so you can sow Sudan Grass for another hay crop or for summer pasture.

Canadian Field Peas, Oats and Rape make a perfect combination for an early pasture, too, for hogs, cattle or sheep. Write for our Latest Monthly Price List.

"Received the clover and timothy seed that I ordered from you. I never saw nicer seed than this is."—WARREN RUSE, MARSHALLTOWN, IOWA.

"The first alfalfa cutting we got 14½ large loads of hay from the 19 acres. The second cutting we got 28 loads and it looks now like there would be almost as heavy a cutting for the third crop. One thing you will notice, this field is free of weeds."—ALLEN BARLOW, WEST-BORO, MISSOURI.

of seed to the acre, you see it doesn't cost much to seed it. Sow it anytime from early in the spring until the middle of the summer.

Get your young stock on the market earlier, cut down grain and production costs, and grow better livestock for greater profits by sowing Rape for their pasture. Rape can't help but increase your livestock profits. Write for our Latest Monthly Price List.

Soy Beans A Real Annual Legume

More Soy Beans are being used every year. It won't be many years before they are our leading legume crop.

The best thing about them is that they'll grow in soil where other small grains or clovers will not grow profitably. And the crop has more uses than any other legume. Both seed and hay are rich in proteins and full of vitamins to make them a real feed either as a grain supplement feed or as a good legume hay. All livestock likes them and does well on them.

Soy Beans are one legume that makes its full growth in one season. They always work into your rotation and any corn ground will grow them.

Your farm will be a lot better off and it will be lots easier on your land if you'll put out part of your land into soy beans instead of small grains. Grow your own home-grown supplement feeds, make better profits and build up the soil all at the same time. They are especially good for a quick legume hay crop and for hogging down, either alone or in the corn.

Soy Beans are easy to handle and you'll like them. So, put out some this year. They may be new for you but our Soy Bean Leaflet will help you a lot. Send for it—it's free. Write for our Latest Monthly Price List.

Manchu

This is the best bean for all purposes and the one that is used most. Very good for hogging down, hay, silage and seed. Good for milling, too, because it is yellow seeded and good sized. Medium maturing and well adapted any place except Northern part of Corn Belt.

Virginia

Virginia Soy Beans are really the best for hay, but are also very good for silage and seed. Grow tall and are fine-stemmed. Brown seeded and medium late maturing. Best for poor soils.

Pekin

Make very good quality fine-stemmed hay. Used a lot for silage with corn as well as for a seed crop. Stand up well. Pekins are much smaller seeded than most other varieties so do not require nearly as much seed per acre. Are black seeded.

INOCULATE ALL LEGUMES—IT PAYS

Inoculation costs only a few cents an acre but it is mighty cheap crop assurance. You should use it on all the alfalfa, clover and soybean seed you sow.

Inoculation, you know helps the plant to build up the soil lots faster, and it gives the young plants just that much more chance to make you a good profitable crop, too. It's by far the cheapest and best way of building up your farm.

We've put the price right down to where you can't say you can't afford to use this. And—it's all the very best inoculation—one of the leading brands. Order it with your seed. Be sure and tell us the kind of seed you want to inoculate when ordering.

New Low Postpaid Prices

FOR ALFALFA AND CLOVER SEED

½ bu. size inoculates 30 lb. seed	\$.35
1 bu. size inoculates 60 lb. seed	.50
2½ bu. size inoculates 150 lb. seed	1.00

FOR SOYBEANS, COWPEAS, VETCH, (ALL LARGE SEED)

2 bu. size inoculates 120 lb. seed	.50
5 bu. size inoculates 300 lb. seed	1.00
Garden Packet, Peas, Beans, Lima Beans, Sweet Peas, etc.	.15

SOW MORE MIXTURES

We've always talked a lot about mixtures. And, we say that when you use a good mixture you can't help but get a good catch and a successful crop.

Mixtures have a higher feeding value than single crops. They furnish pasture straight through the whole season from early spring until late fall. They produce a world of fine hay. And a good mixture will grow on just about any soil you care to sow it on.

But be sure you get a good mixture. Some mixtures are made out of the "left-overs", screenings and that kind of seed. Ours are made right out of our regular stocks of our best seed. Write for our Latest Monthly Price List.

A GOOD MIXTURE WILL PRODUCE A WORLD OF HIGH GRADE FEED

PERMANENT HAY AND PASTURE

We have made these two mixtures to produce both high quality hay and pasture, and lots of it. They contain the best grasses and clover crops. They are permanent. Good for any kind of livestock and will grow on most any soil. You can't go wrong when you seed a mixture like this for hay or pasture.

Use 20 to 25 pounds per acre for a good, heavy seeding. Write for our Latest Monthly Price List.

LOWLAND PASTURE MIXTURE

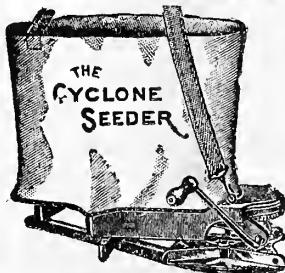

Here is a mixture made up especially for such places that other grasses and clovers do not do well. Very good for low wet acid or overflow ground or wherever you have a hard time getting a good pasture. Use 20 to 25 pounds. Write for our Latest Monthly Price List.

TIMOTHY—ALSIKE MIXTURE

Timothy-Alsike is the most used timothy and clover mixture. Makes fine hay and pasture and will grow most any place. Especially on low, wet, acid and poor ground. You'll like it. Use 15 to 20 pounds per acre. Write for our Latest Monthly Price List.

TIMOTHY—RED CLOVER MIXTURE

Timothy-Medium Red Clover mixture makes more hay per acre and is one of the old stand-by mixtures here in the Cornbelt. Our mixture contains 20% by weight Red Clover which is just about the right amount for good rich mixture. Then we have Timothy-Mammoth Red Clover Mixture, too. This matures more evenly for hay, because Mammoth Red Clover is about two weeks later than Common Red and grows larger and heavier. Write for our Latest Monthly Price List.

Cyclone Seeders

A Cyclone Seeder is the handiest little broadcast seeder you ever used. It is a good one. Roomy and big. Does a good job of sowing with an even, steady flow of seed. Sows at any rate or thickness you wish to seed and handles any kind of seed.

Guaranteed to do a satisfactory job or your money back. Only \$2.25 each, postpaid.

YOU CAN HAVE A NICE LAWN

No place looks right unless it has a pretty yard around it. And a nice, velvety, heavily sodded lawn is the one thing that makes a pretty yard. Your flowers and shrubs will look lots prettier in a nice lawn. A house can look pretty common, but have a nice green lawn with well placed flowers and shrubbery and you can make it into a very attractive home. Lots of folks think it's a big job to have a good lawn. Generally it's their own fault. All you need is good soil, use good seed and plenty of it. Get a good mixture like ours, sow plenty of seed early in the spring and you are sure of a lawn you'll be proud of. Our free lawn leaflet will help you a lot. Our lawn grass mixture is made up of the best grasses and White Dutch clover. It is only 35¢ per single pound or 30¢ per pound in ten-pound lots, postpaid in Zones 2 and 3.

FORAGE CROPS

CANE—Fodder Cane produces a world of good quality roughage per acre and will furnish just what you need when other hay is short. Good for hot dry sections and for a catch crop where spring crops have failed.

SYRUP CANE—We always have fine stocks of cane that is suitable for syrup making purposes. All raised from selected fields and as near as humanly possible to get it pure. We sell a world of it for sorghum raising.

MILLET—Millet is pretty hard to beat. It's a very heavy producer—grows on any well drained soil, stands lots of hot dry weather and can be sown with good success as late as July 1st. Makes finer hay than cane.

KAFFIR CORN AND MILO MAIZE—Produce well even under extremely hot and dry conditions. Very good forage and fodder for any kind of livestock. The grain makes a dandy poultry feed.

PETERITA—Best of all for a good poultry feed because the grain is large and soft. Requires no grinding. Good fodder crop, too. Matures earlier than most sorghum crops and so beats the driest weather.

BUCKWHEAT

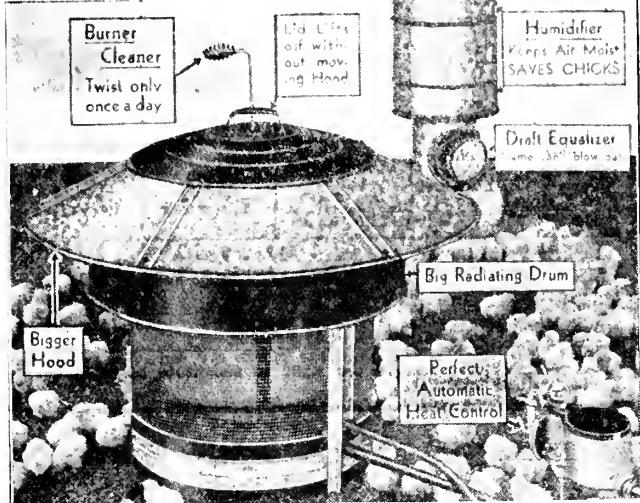

Buckwheat is probably the quickest growing of all grain crops as it matures in about 70 days. Makes a good yield on sour or poor soils that will not grow the other grain crops at a profit. Very good to be used as a catch crop where other crops fail or weather conditions make it too late to sow them. A wonderful bee pasture. Very good rehard cover crop. Use one-half to one bushel per acre. We like Japanese and Silverhill varieties best.

TIMOTHY

Timothy is one grass that isn't particular about where it grows. Any soil suits it. Some of it should be in every mixture. A dandy horse hay. Our timothy is all grown right here in one of the best timothy sections. All bright, new crop seed that you can't go wrong on.

Brooder Stoves at $\frac{1}{2}$ Price

OUR PRICE \$14.50 Regular Price \$29.00

THIS IS THE FINEST BROODER WE EVER OFFERED

GERMAN PEAT LITTER

PEAT LITTER \$2.25 BALE. Genuine Imported German Peat, finest in world. Absorbs 10 times its weight in moisture. Keeps floor warm and dry, saves chicks. This is the Big Bale. $\frac{1}{2}$ Bale \$1.35.

SAVE CHICKS

Coridene (White Hi-Tone) stops coccidioidosis (bloody droppings) and so called White Diarrhea and intestinal infection. 6 oz. bottle \$1.00. Or 1 $\frac{1}{4}$ pound pkg. Powdered Coridene \$1.00. State which. Postpaid.

STOP ROUP

Avamist sprayed over hens or chicks heads stops roup, colds, bronchitis. 16-ounce bottle \$1.00. For prevention these ailments use Neut (Red Hi-Tone) in drinking water 6-oz. bottle \$1.00. Prevents leg weakness.

DRUM BROODER. This is the first time anyone ever got Drum Brooders down so everyone could afford one. Think of it, only $\frac{1}{2}$ the regular price for one of the best Brooders ever made. This is an even finer brooder than we sold last year. It has a Humidifier that keeps air moist and saves chicks, has Bigger Hood for more radiation, a Burner Cleaner which you twist once a day and keeps burner perfectly clean, has Float in Heat Control Carburetor that regulates an even flow of oil and prevents flame running up and down, has Lid on Hood so you don't have to take off the Hood to light the burner. It burns cheap Furnace Oil (distillate) or Kerosene. Is cheaper to run than coal. Is perfectly automatic, easy to run, no getting up nights, makes more heat than coal, is safer, has much evener heat. Will heat any house up to 16x16 ft., or turn down low and heat smallest house cheaper than coal or old style oil stoves. Has regular furnace burner. No gas or fumes. Automatically ventilates brooder house. Comes complete with 8 gal. tank and oil pipe. We ship from Illinois factory or Shenandoah or you can buy at our stores. **PRICE** Hood Type, like above \$14.50 (regular price \$29.00) or with 52-in. Canopy \$16.50. **HUMIDIFIER \$1.00** Like on stove. Will fit any stove using 5 inch pipe. Moist heat saves chicks.

COD LIVER OIL Powdered Cod Liver Oil and Yeast, 2 lb. Pkg. \$1.00, postpaid. Enough for 200 lbs. starter or mash. Prevents leg weakness.

available plant food. Will not burn the soil or young plants. Specially treated and prepared. Well balanced. \$2.60 per 100 lbs., \$1.15 per 50 lb. bag. F. O. B. Shenandoah, Iowa.

BOG PASTURE MINTURE—Our Hog Pasture or Quick Action Pasture Mixture is made up of annual crops. Makes a quick growth. Especially good for early pasture for hogs and young livestock. Makes a world of high quality feed. Use 60 to 100 pounds per acre.

OTHER FARM SEEDS—These are only a few of the many farm seeds we carry. We also carry the finest of Kansas-Nebraska, Kansas, Cossack, Blackfoot, Grimm and White Tag Grimm Alfalfa, White Dutch Clover, Unhulled Sweet Clover, English Elm Grass, Bermuda Grass, Permanent Meadow and Lowland Pasture Mixtures, Winter Vetch, Hungarian, Siberian and Hot Millets, Grohoma, Rosen Rue, Winter Wheat, Phalaris or Reeds, Canary Grass, Fescues, and other grasses and mixtures, and other grades of red clover, sweet clover, alfalfa and grasses.

POTATOES

Of course, we cannot tell you much about seed potatoes yet. It is too early to tell you just what the price for good seed will be. But, we will have plenty of fine seed, Northern Grown Irish Cobbler and Early Ohio, the two best and highest yielding varieties for the Middle-west.

Be sure and get our low prices on Seed Potatoes before you buy.

Write For New Low Prices On These Farm Seeds

Guaranteed To Be Finest You Can Buy

Automatic Oil Brooder Blue-Flame Burner, automatic heat control, no leveling needed, cannot overflow. $\frac{1}{2}$ regular price. Wonderful values. **PRICE**, 32-in. canopy \$8.65, 42-in. \$11.55, 52-in. \$7.95. Order quick, supply limited.

87c Makes 100 Lbs. Chick Starter

Think of making the finest chick starter money will buy for only 87c plus a little cheap ground corn, ground wheat or bran and shorts. We have tried this Concentrate for months, like it better than any \$3.00 or \$4.00 starter we ever used, and besides it cuts your feed costs as much as 2-3. You use this both as a chick starter and a growing mash. Prof. Tom Quisenberry made this concentrate so we could save you money on feed. Contains everything needed that you don't raise on farm, milk, proteins, minerals, vitamins, cod liver oil, etc. **PRICE**, 100 lbs. Concentrate (makes 550 lbs. starter) \$4.15, 50 pounds (makes 275 pounds starter) \$2.50. If you buy 100 lbs. we'll pay $\frac{1}{2}$ of freight up to 400 miles. Feed Concentrate Circular FREE. Or we'll mix it here ready to feed for \$2.50 per 100 lbs. for Finished Starter. Also have laying Mash and growing Mash Concentrate for \$3.45 per 100 lbs. Makes 500 lbs. best Mash you can buy. Save money—mix your own mashed.

EGG-BRED CHIX

Low Prices

GREATEST PROFIT-MAKING CHICKS YOU CAN BUY ANYWHERE!

There has been

Big Money in chickens the past year. This year should be even better. Feed is cheap and lots of people will make more money from their chickens than all the rest of the farm put together. Providing they have chickens that live good, grow fast and that are **Bred to Lay**.

We have spent thousands and thousands of dollars for the finest of Canada's and England's Egg-Contest Winning chickens so we could furnish you people with the Greatest Money-making chickens you can buy anywhere. We know that if we can help you make more money you will likely spend part of that money with us and we'll all be better off.

Also are quite sure we have sons and grandsons of more World's Champion Egg-Contest winning hens than anyone in the world.

"Tom" Quisenberry and White Minorcas

This shows Prof. Tom Quisenberry inspecting one of our Flocks of White Minorcas on the Trapnest Farm. Mr. Quisenberry started the first American Egg-Contest some 20 years ago and was the father of trapnesting and modern methods of culling for egg production in America. We feel lucky to have him associated with us in charge of Trapnesting, mating of flocks and disease control.

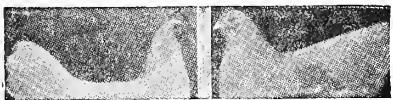

Which Grade to Buy

Farm records prove that a 200-egg hen will make 7 times as much profit as a 100-egg hen and a 300-egg hen 14 times as much profit. The Government figures show that the average hen of the middle west lays less than 100 eggs yearly. If 100 of our best grade chicks make as much profit as 500 ordinary hatchery chicks aren't the best the cheapest in the long run. Here's the difference in our grades of chicks.

Best Egg Strain—(Trapnest-Sired). Our best hens mated to 200 to 358-egg R. O. P. and

World's Champion Layers

We undoubtedly own sons and grandsons of more World's Champion Hens than anyone in America. Many of these were Imported from Canada's and England's greatest breeders. Our Matings and Trapnesting is done under the supervision of Prof. "Tom" Quisenberry, America's pioneer Egg-Contest originator.

357-Egg White Leghorn (World's Champion Leghorn) | 343-Egg Buff Orpington (World's Champion Orpington)

358-Egg Barred Rock (American Champion all breeds) | 300-Egg White Rock (A real champion)

314-Egg White Wyandotte (Official World's Champion) | 345-Egg S. C. Red (World's Record Rhode Island Red)

Egg-Contest pedigree males. Most of these males were Imported from Canada's and England's greatest breeders. This vigorous new blood, bred in the cold, blizzardy north means greater health and ruggedness and more fall and winter eggs while egg prices are high. All stock Blood-Tested and culled for disease control. These are our greatest money-makers.

Heavy Laying Strain. These are next best. Hens are mated to roosters produced from above matings.

This grade is even better than most hatcheries' Trapnest Pedigree matings and far superior to most AAA grade chicks. All Blood-Tested and carefully culled.

Standard or Regular Hatchery Grade. We sell this grade to meet the demand for "cheap chicks".

These are good, honest chicks from healthy, culled hens and about what you get from most hatcheries except ours are Blood-Tested. But we don't recommend this grade.

The difference in first cost is so small we consider either of the above grades far superior and "cheaper in the long run." Two or three extra eggs from the better grade pullets will more than pay for the best of chicks.

per 100 chicks

"Hybrid" Chix (Sex-linked Cross-Breds) Outlay everything in England. We guarantee to ship you 100% day old pullets or males. Pullets lay Big Eggs and worlds of them. Males make finest broilers, roasters and capons. Write for "Hybrid" Chix Circular. Price—Pullets \$17.00 per 100, Males \$9.00 per 100.

(Add 1c per chick if less than 100 chicks are ordered). Eggs ½ price chicks. (We reserve the right to substitute birds of equal quality in our matings).

Henry Field's Trapnest Breeding Farm

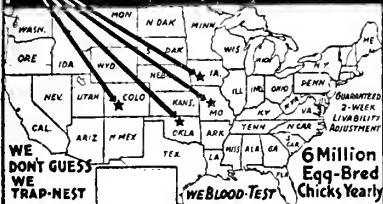

MASTER CONTROL HOUSE NO. 1

1400 Layers Under Trapnest

Over 1400 hens Trapnested at Shenandoah under supervision Professor "Tom" Quisenberry, founder of American Egg-Contests. Will have a few chicks for sale at 17c each from our WORLD'S CHAMPION MATINGS on this farm. No finer Egg-Bred Blood anywhere.

Quick Transportation
anywhere in the U.S.A.

4 Big Henry Field Hatcheries
Same High Quality from each Hatchery

We have hatcheries in Mo., Okla., and Colo., as well as Shenandoah. Can deliver chicks anywhere promptly and safely. Same fine matings and same fine quality at all places.

Replacement Guarantee

We guarantee chicks to be 100% alive when you get them. We will refill at $\frac{1}{2}$ price all that die the first week and at $\frac{1}{3}$ price all that die the second week providing you buy chicks selling for 9c or more and that losses were not due to carelessness on your part. You to be the judge and furnish an attested statement not later than three weeks after you get the chicks. We also guarantee our Best Egg Strain and Trapnest Farm chicks to lay more eggs than any chicks you can buy elsewhere regardless of cost. See chick catalog for details.

Health Certified Chix

This shows Prof. Tom Quisenberry Blood-Testing one of our hens. All our hens are Blood-Tested for E. W. D. or Pulorum Disease and Health Certified by the Quisenberry method. That means chicks that are healthier, live better and grow faster. Here's some letters from State Colleges:

ONLY WAY

"The only satisfactory way to eliminate the disease is to Blood-Test the flocks."

University of Mo.

WORTH 50% MORE

"Chicks hatched from infection-free eggs are worth 50% more than from untested birds".—University of Nehr.

BUT ONLY BLOOD-TESTED CHICKS

"A person would be financially ahead by buying tested chicks".—Iowa State Agr. College.

WORTH 5c TO 10c MORE

"It is my opinion that Blood-Tested chicks are worth 5c to 10c more than untested stock."

—Alabama Polytechnic Institute.

CHICKS LIVE BETTER

We have used Blood-Testing for years and are sure it increases livability of our chicks."

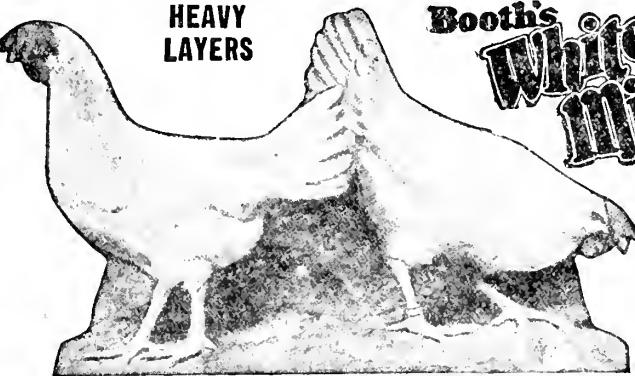

—Okla. Agr. College. **7-Times Profit!**

Here's our Choice of Chickens for Big Eggs-Big Profits

HEAVY LAYERS

Booth's **White Minorcas**

This is the strain that is fast replacing Leghorns and many other breeds. They lay the Biggest Eggs of any breed that sell for more money on the graded egg markets. And they are great layers. The highest laying flock we had last year was Booth White Minorcas. They are the Greatest Money-making breed we have found.

Which Is More Profitable?

Just ask yourself this question—which will make the most money, a 200-egg hen whose eggs weigh 26 to 30 ounces per dozen or a 200-egg hen whose eggs weigh 20 to 23 ounces per dozen? Remember it takes egg over 24-oz. to grade high on the egg markets.

Both hens cost the same to feed and raise, yet the 26 to 30 ounce eggs of the Booth White Minorcas bring the highest market prices. Over a year's time this makes a big difference in profits.

Booth's White Minorcas have won more egg laying contests than all others put together. So you can see why a flock of this strain is more profitable than an even larger flock of another breed producing 20 to 23 oz. eggs.

Why We Can Make Lower Price

By contracting with Eden C. Booth for at least $\frac{1}{2}$ his cutout on White Minorca chicks we are able to make the prices much lower than ever before. Now is the time to start while this breed is growing in demand so fast. Start a flock and build your own local business. **Big Eggs and Big Profits** will likely make them America's most popular breed. Almost 1-3 of all the chicks we are selling are Booth White Minorcas. That shows how fast they are growing in popularity. Judge Crosby says many people claim they are making more money with White Minorcas than any breed they ever raised. Judge Branch says they will likely replace Leghorns.

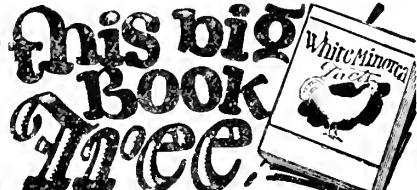

Lowest Prices Ever Made

On Genuine Booth White Minorcas Direct from Eden C. Booth.

Utility Flock Matings—\$12.00 per 100 chicks. Special Egg-Bred Mating—\$14.00 per 100 chicks.

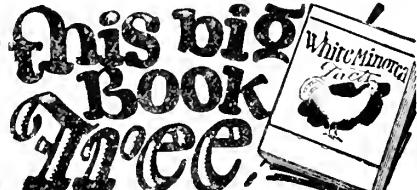

Trapnest Flock Mating—\$17.00 per 100 chicks.

Pen 5—Egg-Contest Winning Blood. \$25.00 per 100 chicks. Add 1c per chick on orders for less than 100. Eggs $\frac{1}{2}$ price of chicks, \$1.00 books any size order for chicks or eggs for later delivery. Pay balance on arrival.

Minorcas Ordinary Egg

This shows a comparison of a Booth White Minorca egg and an ordinary egg. Is it any wonder they bring more on the graded egg markets?

If you are still skeptical about the value of Booth White Minorcas write for this book which shows pictures of winners at the New York and Chicago shows and many egg contests. Also dozens of letters and pictures of people who are raising them in every part of the country. This book is FREE. Write for it.

CAN'T BEAT FOR LAYING

"I got 300 of your Trapnested White Minorca chicks March 17th and in September the pullets were laying. This makes my fourth year for the Minorcas and I say they can't be beat for looks, weight and laying and they lay the largest white eggs of any chickens."

Mrs. F. J. Herchenbach, Jr., Ia.

FINE EGGS

"We like the Booth White Minorcas fine and dandy. They lay the biggest, whitest and nicest eggs I ever saw." C. V. Agler, Nebr.

Here's Our Choice of Big Chickens

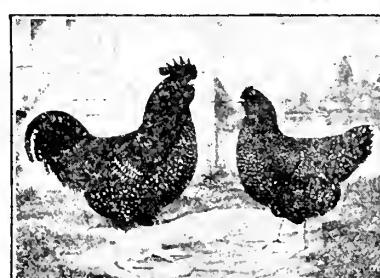

FAMOUS ENGLISH

SPECKLED SUSSEX MARKET TOPPERS—WINTER LAYERS

Here's the chicken for you people who want a big chicken that will top the markets as a meat fowl yet one that has outlaid Wyandottes, Anconas, R. C. Rhode Island Reds, Orpingtons, Buff and Brown Leghorns and others in the American Egg Contests in the fall and winter while egg prices are high. Even beat Leghorns from November to April. And it's the eggs in cold weather that makes the big profits. The Sussex are bigger than Reds or Wyandottes and about the same size as Rocks and Orpingtons. They grow fast, feather quick and make wonderful broilers, roasters and capons. We have the pure Padgett strain the best in America. (Prices on opposite page).

FREE CATALOG!

For more information about the Sussex write for our Big, new Chick Catalog or order direct from this ad. You won't find a dual purpose breed that will equal them. Sussex are the most popular chickens in England and probably the oldest, highest bred fowls in the world.

Sussex were bred long before our common American breeds were even thought of. The British Year Book on Poultry, published in London, says: "There can be no denying the fact that Sussex is a worldwide breed, known and kept in every corner of the globe. It has easily become the most popular breed. Here is a fowl which will please the eye, please the taste and turn out the eggs much better than the average breed." Prices on opposite page.

Sure, I'll Sell You A "First Line" Tire

The Same Quality That Came On Your New Car

This tire is my answer to the fellow who quotes you a low price on a 4 Ply Tire and while the price is lower than you might expect, I am not going to apologize for the quality of the tire.

As far as quality can be built into a tire with 4 Ply this Field's Famous Four Tire has it. Don't get the idea it is a skimpy, thin walled and thin treated tire. This Field's Famous Four is a good, big tire. It is oversize when compared to the average run of 4 Ply Tires. Here is the easiest way

to place the quality of our Field's Famous Four Tire: *It is the full equal of the "First Line" tires which come as regular equipment on new cars.*

FIELD'S 4 PLY TIRES **POSTPAID** In Zones 2 and 3

Size	Price
30x3 Clincher	\$2.95
30x3½ O. S. Clincher	3.53
31x4 Straight Side	5.90
32x4 Straight Side	5.99
33x4 Straight Side	6.63
32x4½ Straight Side	8.40
33x4½ Straight Side	8.12
34x4½ Straight Side	8.64

High Pressure Cords

Size	Marking	Price

28x4.75	4.75x19	\$4.78
29x4.75	4.75x20	\$4.92
30x4.75	4.75x21	\$4.98
29x5.00	5.00x19	\$5.10
30x5.00	5.00x20	\$5.23
31x5.00	5.00x21	\$5.40

It is not equal to our Super Tire, of course not. But it is so much better than anything near its price that it is a bargain and will save you several dollars if that's the quality of tire you want.

Every one of these Field's Famous Four Tires is guaranteed a "First Line" Tire, and with every one of them you will get a Signed Certificate Guarantee.

HERE'S THE GUARANTEE YOU WILL GET:

This tire is guaranteed to give you 12 FULL MONTHS of passenger service. It covers *Every Road Hazard*, including blow-outs, bruises, rim cuts and wear from wheels out of line, from underflation or from unequal brakes. *There are no exceptions.* And furthermore our First Line Tires are every one guaranteed against defects in material or workmanship *without Time or Mileage Limit*.

Now, if you want a real First Line Tire send along your order. You will get a tire equal to any First Line Tire made regardless of who made it or what it costs. You will get better tires than the "Seconds" and "Thirds" on the market, and last but not least, you will make a good substantial saving in the price.

These Tire Prices Guaranteed Only Until April 1, 1932. May be higher then.

FIELD'S Heavy Circle Molded Tubes

Other Merchandise

Yes, we sell a world of things besides our seeds and plants. Only had room in this catalog for Paint and Harness and Tires, but will be glad to send you a Merchandise Catalog and Price List if you want it. Just mention anything you are especially interested in and request our Merchandise Catalog.

The Best Tire I Ever Sold

LOWEST PRICES I EVER QUOTED

A year ago I told you we had a New Tire for you — a world beater, one that would out-last and out-run any tire we ever sold and the best tire you could buy at any price. And now I am ready to repeat that and make it even stronger than before and back it up with the word of thousands of my customers.

Field's *Super 6 Ply Tire* is a real, full-fledged *Super Tire* in every respect. Rugged and tough and big. Designed to take a world of punishment and wear. Built with such a high class of materials and expert workmanship that I guarantee them in this respect without any limit on the time or on the mileage.

40x8	12	\$54.53

I know you hear and read a lot about 6 Ply Tires. But don't for a minute think "6 Ply" means "Super" because 6 ply don't necessarily mean Super. A tire has got to have something besides 6 plies to make it a Super. A lot more. It's got to have real quality. A 6 can be just as poor as the poorest 4 unless the other qualities are there.

I have the low price for you, too. You can see that. But besides lower price I have a real, honest-to-goodness *Super 6 Ply Tire* for you, too. You can't buy a better tire no matter how much you pay. I will put it up against any tire made and challenge any of them to beat it in service on your car.

You wouldn't ever ride in a caboose if the same money would take you in a Pullman Car. And that's the same as paying for only a common Tire when even less money will put Field *Super 6 Ply Tires* on your car, real Certified Super Tires.

Look up the price of your size on our list. By all means do your own comparing. But don't let anyone talk you into thinking they have a better tire than Field's *Super 6 Ply Tire* and certainly don't let them put 1st, 2nd and 3rd line 6 Ply Tires on your car when you can save money and still have Field's Certified *Super 6 Ply Tires* which are Certified and Fully Guaranteed.

I challenge any tire to beat this Super Tire — without regard to the price of the other tire — and I just hope all of you take me up on it.

Certified Super 6 Ply Tire

With Service Guaranteed

A seal on every Field's *Super 6 Ply Tire* Certifies is to be a Real Super Tire. And with every Field's *Super 6 Ply Tire* you will receive a printed and signed certificate guaranteeing it to give you 20 FULL MONTHS of service. This guarantee comes to you in the form of a Printed and Signed *INSURANCE GUARANTEE CERTIFICATE*. It covers EVERY ROAD HAZARD, including blow-outs, cuts, bruises, rim cuts and wear from wheels out of line, from under inflation or unequal brakes. *THERE ARE NO EXCEPTIONS!* And furthermore, our certificate states plainly that every Field's *Super 6 Ply Tire* is guaranteed against defects in material or workmanship *WITHOUT TIME OR MILEAGE LIMIT*.

And in addition to that guarantee I will put this Super Tire of ours up against any tire made by anyone at any price.

These Tire Prices Guaranteed Only Until April 1, 1932. May be higher then.

Henry Field HOUSE PAINT

I Am Still Complaining About Unpainted Buildings

I am still fussing at folks to preserve their property with good paint and I don't want you to think I am an old crab because I keep after you about it. Painting is just a matter of good business and it's mighty poor business to let your place get run down and shabby for lack of paint.

Nobody likes to live in a dingy, unpainted house and you can be dead sure it hurts property values like everything when house and barn and buildings go unpainted too long. It may look expensive but if you will do some serious thinking on the subject you'll know that Paint is actually an investment, first, because good paint really increases property values more than it costs—and, second, because good paint prevents rot and saves the expense of repairs.

I never drive out in the country but what I get a shock at the way places are going to the dogs. Goodness knows I would fuss about it even if I had no paint to sell and I am just as sincere in telling you all to paint up even if you get your paint from some one else.

The important thing is to paint up and, of course, you sure want good paint, and that is the only kind I have for you. It is good, honest paint as thousands of my customers will tell you. A gallon of my paint covers 250 to 300 square feet or more two good coats. It brushes out nicely, and dries to a hard, firm, glossy surface that defies the weather in good shape.

I want you to read my guarantee word-for-word. I've written it to protect you in every way. My paint has to suit you when you put it on and after it is on.

And the price is right, too, for good paint. You'll need the 2 gallons of Pure Linseed Oil with every 5 gallons of my paint and so that figures the per gallon price down to only a net cost of \$1.68 per gallon on the House Paint. Any Color you want.

My House Paint is Extra Heavy and Thick and you will need every bit of the 2 gallons of Pure Linseed Oil I send you because my House Paint will take plenty of it and give you better results if you use it. Of course, I wouldn't send you anything but Pure Linseed Oil—the very best obtainable. You may even need more than 2 gallons with each 5 of House Paint. If you do, I will sell you more Pure Linseed Oil at actual cost. It will be around 90¢ per gallon. But I won't sell the Pure Linseed Oil to you at cost except when you order paint from me, too.

Now, it's up to you. I've got the paint. Ready to ship it to you and guarantee it fully. And I want you to send in your orders and put your place in the shape you know it ought to be in.

Greatly Reduced "ECONOMY" HARNESS

You won't recognize this "ECONOMY" Harness by the price because the price is a lot less than it was last year. "ECONOMY" is our biggest seller and one of the best values we can offer you. I figure it is about \$10.00 or \$12.00 lower in price than the same high quality leather and high rating specifications would cost you elsewhere.

ROSE BUSHES

CORRECTION: Due to an error on the inside front cover page, the titles for the Pernet Roses became switched. The yellow Rose is Souvenir De Claudius Pernet, and the pink one is Souvenir De Georges Pernet.

All vigorous, healthy, 2 year old field grown plants. The following list is selected from hundreds of varieties, for their beauty, hardiness and vigorous habit of growth. All plants come cut back ready for planting.

HYBRID TEA VARIETIES

Everblooming Roses which bloom all summer long. Plant deeply, mounding the earth up over the tops until new shoots appear, then level the earth down again. In October, hill earth about 6 inches high over the plants, and just as soon as the ground freezes, mulch with a foot of straw.

Unless otherwise specified, all Roses are priced at 40¢ each; 3 for \$1.00; or \$3.75 per dozen, postpaid.

PINK EVERBLOOMING ROSES

BETTY UPRICHARD—Semi-double to double flowers of bright salmon pink. Buds orange-carmine.

BRIARCLIFF—Deep rose pink, shading to a lighter pink on the outer petals.

DAME EDITH HELEN—Pure glowing rose pink. Blooms large, double, lasting, and intensely fragrant.

J. L. MOCK—Large blooms of bright, silvery pink.

PINK KILLARNEY—Light pink, which blooms abundantly and continuously.

YELLOW EVERBLOOMING ROSES

DUCHESS OF WELLINGEON—A free blooming, intense saffron yellow, stained with crimson.

GOLDEN EMBLEM—Large double flower of canary yellow.

LADY HILLINGDON—Fragrant, free blooming rose of deep apricot yellow.

LADY MARGARET STEWART—Very large, double flowers. Deep sunflower yellow, brushed with orange and red.

LUXEMBOURG—Rich golden yellow. Blooms freely and grows vigorously.

RED EVERBLOOMING ROSES

ETOILE DE HOLLANDE—Deep, bright velvety red flowers borne on long, strong stems. Blooms very lasting, and have the odor of Old Rose.

GRUSS AN TEPLITZ—Flowers of rich, velvety red. Freest blooming rose of all.

WHITE EVERBLOOMING ROSES

KAISERIN AUGUSTE VICTORIA—Very lasting flowers of pure snowy white. The favorite of all white Hybrid Tea Roses.

KILLARNEY WHITE—Flowers of pure white. Just like the Pink Killarney in every other respect.

SPECIAL ROSE OFFER, 4 for \$1.25

One each, our choice, red, yellow, pink and white Hybrid Tea Roses. All regular 2 year old field grown plants, and selected from the above varieties.

NEW VARIETIES OF EVERBLOOMING ROSES

Each season we select some of the best of the new and recent Rose introductions. The following varieties have met with our approval, as well as that of other rose specialists.

ANGELE PERNET—Extremely fragrant, large double flower of reddish-orange, which shades to chrome yellow. Vigorous grower and a continuous bloomer. \$1.00 each.

CUBA—Large, semi-double flower of bright cardinal red, slightly tinted with yellow. Very fragrant. \$1.00 each.

EDEL—Flowers and buds very large. Flowers pure white, shading to a faint ivory at the base. \$1.00 each.

E. G. HILL—Immense flowers of dazzling scarlet, which shades to a pure, deep red as the flower opens. Beautiful in the bud. \$1.25 each.

JOANNA HILL—Fine new yellow. Buds very large, long pointed, opening to a large flower of yellow much darker than Sunburst. \$1.00 each.

LORD CHARLEMONT—Large, perfectly shaped flower which is quite double, and a deep, dark crimson in color. \$1.00 each.

PRESIDENT HERBERT HOOVER—Contrasting color combination of crimson, orange and gold. Beautiful long pointed buds, and very free blooming. \$1.50 each.

SPECIAL OFFER OF NEW ROSES

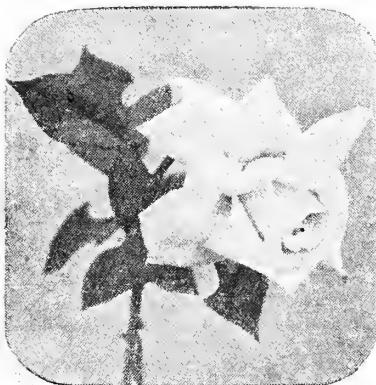

One each of the above 7 New Hybrid Tea Roses, \$6.00, postpaid.

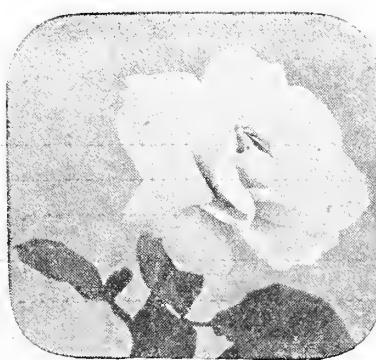

Pink Radiance

Sunburst

White Killarney

Pres. Hoover

Unless otherwise specified all Roses are 40¢ each; 3 for \$1.00 or \$3.75 per dozen, postpaid.

CLIMBING ROSES

Here are the hardiest climbing sorts, which you see growing everywhere, trained over lattices, on a trellis, arbors or gateways. The following varieties are the most suitable, and can be grown in any locality in the United States. Winter protection required in the states farthest north.

CLIMBING AMERICAN BEAUTY—Deep rose pink, having one bloom to a stem. Much used for cutting.

CRIMSON RAMBLER—Medium sized double flowers of bright crimson. Borne in large pyramidal clusters.

DOROTHY PERKINS, PINK—Vigorous growing Climber, having clusters of pink blossoms.

DOROTHY PERKINS, WHITE—Flowers white. Otherwise the same as the pink variety.

DR. HUEY—Flowers dark crimson maroon, borne in clusters of three and four to a single stem. Very striking.

DR. VAN FLEET—A very hardy, vigorous growing Climber, with pink flowers which shade to a bluish white.

GARDENIA—Best yellow Climber. Flowers double.

PAUL'S SCARLET—Flaming scarlet flowers of large size. Showiest of all the Climbing Roses.

ROSARIE—Free blooming Climber, having clusters of bright pink flowers.

SILVER MOON—Pure white, semi-double flowers of large size. Vigorous and hardy.

TAUSENDSCHOEN or THOUSAND BEAUTIES—Climber having few thorns. Flowers bloom in varying shades of pink to white.

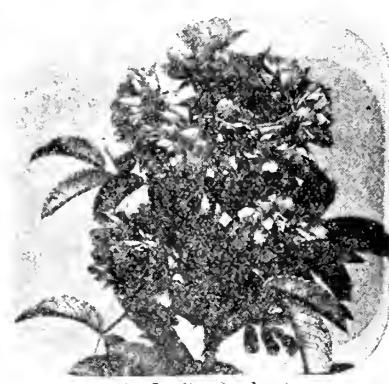

Dorothy Perkins, Pink

Frau Karl Druschki

Catherine Zeimet

F. J. Grootendorst

HARDY JUNE ROSES

These are the Hybrid Perpetuals, which bloom in June and have flowers of such large size and of such deep colors. Very hardy, requiring only ordinary care.

AMERICAN BEAUTY—Crimson flowers of large size and very double. Also very fragrant.

FRAU KARL DRUSCHKI—Most perfect white Rose. Snowy white, double flowers of large size.

GENERAL JACQUEMINOT—Flowers of large size and pure red. Very fragrant, very vigorous, and very hardy.

GEORGE AHRENDS—Delicate pink flowers, large size. Often called the pink Frau Karl Druschki.

PAUL NEYRON—Bright, rosy pink. Blooms of enormous size. Largest blooms of all known Roses.

SOLIEL D'OR—Double flowers of golden yellow, which shade to bright red. Best of the yellow June Roses.

BABY RAMBLER ROSES

Dwarf, bushy roses which bloom practically all summer, grow vigorously, and never reach a height of more than 18 to 20 inches. They are absolutely hardy, easy to grow, and especially effective if planted in beds.

CATHERINE ZEIMET—Clusters of pure, snowy white flowers.

CECILE BRUNNER—Small double flowers of bright pink. Unusually dwarf and bushy.

EDITH CAVELL—Intense crimson scarlet flowers. Best red of all Baby Ramblers.

ELLEN POULSEN—Large clusters of dark brilliant pink flowers. Fragrant.

ERNA TESCHENDORFF—Semi-double flowers of strawberry red. Blooms continuously and unusually abundant.

GEORGE ELGER (Yellow Baby Rambler)—Very double. Flowers of golden yellow.

GOLDEN SALMON—An outstanding new Baby Rambler. A vigorous, bushy Baby Rambler, having large flowers of pure orange color. \$1.00 each.

IDEAL—Velvety crimson flowers of large size. Very double and lasting.

TRIOMPHE DE ORLEANS—Blooms of bright cherry red, with a somewhat lighter center. Vigorous grower.

RUGOSA AND HARDY GARDEN ROSES

These Roses are absolutely hardy, and grow in bush form, some of them being called the Old-Fashioned Roses. Rugosas are especially suitable for hedges.

CONRAD F. MEYER—Rugosa. Pure silvery pink. Very fragrant.

F. J. GROOTENDORST—Cross of Rugosa and Baby Rambler. Flowers are a brilliant rosy pink. Practically everblooming.

GROOTENDORST PINK—Flowers of clear pink. Otherwise the same as the Grootendorst.

HANSA—Rugosa. Flowers reddish-violet and of large size. Free blooming and vigorous grower.

HARRISON'S YELLOW—Bright yellow, double flowers. An old-fashioned favorite.

HUGONIS—Single blooms of bright yellow. In bloom three weeks earlier than any other rose.

MADAM PLANTIER—Hardy white rose, having a mass of snow white blooms for Memorial Day. Very desirable for cemetery planting.

SIR THOS. LIPTON—Rugosa. Pure white, double flowers. Blooms freely.

WHITE MEMORIAL—The Wichuriana or trailing white Rose is ideal for cemetery planting. Very hardy, and in June is covered with a mass of waxy white blooms.

BIG BARGAIN ROSE COLLECTION

8 Roses Shown in Color on the Inside Front Cover Page,
Postpaid for \$2.50

To encourage the planting of new and better varieties of Hybrid Tea (Everblooming) Roses, we offer 1 each of these eight beautiful varieties in a complete collection at less than regular price. We have reserved a limited number of these collections especially for this offer. Be sure to get one.

ORNAMENTAL SHRUBS

Heavy, well rooted field grown plants, grown under ideal nursery conditions to produce root systems and well developed plants. Prices listed are for regular two year old, 18 to 24 inch plants, unless otherwise specified. When shipping, we cut the shrubs back just as they should be for transplanting with best results.

Best planting results are obtained by setting two or three inches deeper than the plants have stood in the nursery row. Mound dirt about a foot high over the plants, and leave for two weeks, to allow buds for the new growth to get started. Then rake the surplus dirt down level with the ground. Remember to supply the plants with water during the first summer.

Unless otherwise specified, all shrubs are priced at 30¢ each; 4 for \$1.00; or \$2.85 per dozen, postpaid.

ALTHEA—(Rose of Sharon). Very showy flowers in pink, purple or white. Requires some protection in northern states.

ALMOND, PINK FLOWERING—Small, double pink flowers, appearing before foliage in the spring. 45¢ each; 4 for \$1.40, postpaid.

ALMOND, WHITE FLOWERING—Same as the Pink Flowering, except for color of the flowers. 45¢ each; 4 for \$1.40, postpaid.

BARBERRY, THUNBERGI—(Japanese Barberry). Hardy shrub having glossy green foliage which changes to red in the Fall. Bright scarlet berries. A wonderful hedge plant. 25¢ each; 5 for \$1.00; 12 for \$2.00, postpaid.

BARBERRY, RED LEAFED—Foliage and twigs red throughout the entire season. Same as the Japanese Barberry in habit of growth. 45¢ each; 2 for 85¢; 4 for \$1.65, postpaid.

CALYCANTHUS—(Sweet Scented Shrub). Dwarf shrub having fragrant leaves and chocolate colored flowers.

COTONEASTER, ACUTIFOLIA—Erect spreading shrub, having dark green foliage turning to crimson in the Fall. Flowers develop conspicuous black fruit in the Fall. 40¢ each; 2 for 75¢, postpaid.

DESMODIUM, PENDULIFLORUM—Medium height shrub. Small, purplish-red flowers in late Summer. 60¢ each.

DEUTZIA, CRENATA—May flowering shrub of medium height. White flowers.

DEUTZIA, GRACILIS—Beautiful low growing shrub, having white flowers in May.

DEUTZIA, PRIDE OF ROCHESTER—The taller variety of Deutzia, growing from 6 to 8 feet. Likewise have white flowers, blooming in May.

DOGWOOD, GRAY BARKED—Finely branched red stems. White flowers are followed by white pearl-like berries. 75¢ each; 2 for \$1.25, postpaid.

DOGWOOD, RED BARKED—Planted for the bright red colored branches in the winter after the leaves fall. 5 to 6 feet tall. White flowers in May.

DOGWOOD, YELLOW BARKED—Flowers in May the same as the Red. The bark is a beautiful yellow throughout the winter.

FORSYTHIA, GOLDEN BELL—Bell-shaped golden yellow flowers in the early spring, before the leaves start.

FLOWERING QUINCE—(Japanese Quince). Shrub of medium height. Dark green leaves, which shade to a dark red. Flowers are very bright red, and are borne in great profusion in April.

ELDER, CUT-LEAF—Like the common Elderberry, except that the leaves are very finely cut.

ELDER, GOLDEN—Habit of growth like the common Elder. Foliage is of a beautiful golden yellow throughout the season.

COMMON AND BUDDED LILACS

ALPHONSE LAVELLE—French budded Lilac. Double blue flowers which shade to lilac. 85¢ each; 2 for \$1.50.

BELLE DE NANCY—Double Lilac of brilliant, satiny rose. 85¢ each; 2 for \$1.50.

CHARLES JOLY—Dark purplish-red. Flowers double. 85¢ each; 2 for \$1.50.

CHARLES X.—Single purplish-red blooms. 85¢ each; 2 for \$1.50.

CONGO—Single fine red blooms. 85¢ each; 2 for \$1.50.

LA TOUR d'AUVERGNE—Budded variety, having double purple flowers. 85¢ each; 2 for \$1.50.

MADAME ABEL CHATENAY—Snow white. Double flowers. 85¢ each; 2 for \$1.50.

HIGH BUSH CRANBERRY—Somewhat like the Snowball, except that the bloom is flat in shape, followed by clusters of berries the size and color of Cranberries. 45¢ each; 2 for 85¢, postpaid.

HONEYSUCKLE, MORROWI—Very spreading, bush Honeysuckle. Flowers are borne in May.

HONEYSUCKLE, BUSH—(Tartarian). Old-fashioned Bush Honeysuckle which blooms in May, followed by red berries, which remain on the bush throughout the summer.

HYDRANGEA, ARBORESCENS—(Hills of Snow). Shrub of medium height, covered with large, pure white flowers in July. Blooms resemble Snowball, but many times larger. Plant in semi-shade or full shade. 35¢ each; 4 for \$1.25, postpaid.

HYDRANGEA, P. G.—Just like the Arborescens, except that it blooms in August, and the flowers are cone-shaped, instead of round. Blooms turn brown in September. 35¢ each; 4 for \$1.25, postpaid.

HYDRANGEA, P. G., TREE FORM—Some as the regular P. G., except that it is trained to a single stem, and grows in tree form. \$1.25 each, postpaid.

ILEX, VERTICILLATA—(Winterberry). Small shrub producing bright red berries, which remain until mid-winter. Resembles Holly somewhat. Should be planted in groups to insure setting on of berries. 75¢ each; 2 for \$1.35, postpaid.

KERRIA, JAPONICA—An attractive medium height shrub, having bright green leaves and small double yellow flowers. 75¢ each, postpaid.

PRIVET, AMOOR RIVER—Most popular of all Privets for both hedging and ornamental use. Absolutely hardy, easy to grow, and will stand pruning and trimming to any height. For large quantities, see Hedge Plants.

PRIVET, IBOTA—Resembling the Amoor River very closely, but grows more dense, and is of somewhat more spreading type.

PRIVET, REGEI'S—Fast becoming very popular. Makes an unusually attractive untrimmed hedge. Of spreading habit of growth.

PRUNUS, NEWPORT—Purple leafed Plum. Hardy and upright. Leaves reddish-purple with red tips. Blooms somewhat larger than the Triloba or Pissardi. 55¢ each; 2 for \$1.00.

PRUNUS, TRILOBA—Dwarf Plum much used because of its blooms of double pink flowers. Commonly called Rose Tree of China. 55¢ each; 2 for \$1.00.

RHUS COTINUS—(Smoke Tree). Mist-like purple flowers. Round, light green leaves. \$1.10 each; 2 for \$2.00.

MARIE LEGRAVE—Pure white single flowers. 85¢ each; 2 for \$1.50.

PRESIDENT GREVY—Best double white. 85¢ each; 2 for \$1.50.

PERSIAN PURPLE—Somewhat smaller shrub than the common Lilac. Foliage better color, and somewhat smaller. Commence blooming when three or four years old. 45¢ each; 4 for \$1.65.

COMMON PURPLE—Old-fashioned Lilac. Blooms when 5 or 6 years old. Fine for tall hedges along boundaries.

COMMON WHITE—Same as the old-fashioned Purple, except that the flowers are pure white. 45¢ each; 2 for 85¢.

HARDY SHRUBS

RHODOTYPOS KERRIOIDES — (Jethead). Bright green foliage. Single white flowers appear in May, which are followed by shiny, jet-black seeds. 45c each; 2 for 85c.

SNOWBALL—Old-fashioned favorite. So well known a description is hardly necessary. 45c each; 2 for 85c.

SNOWBERRY—Hardy, low growing shrub, bearing large waxy white berries throughout the Fall and Winter.

SPIREA, ANTHONY WATERER—Compact, low growing shrub, with dark crimson pink clusters of flowers all summer long. 35c each; 4 for \$1.25.

SPIREA, BILLARDI—Blooms during July and August, having cone-shaped spikes of pink flowers.

SPIREA, COLLOSA ALBA—Habit of growth same as the Anthony Waterer. Flowers of pure white, instead of dark red. 35c each; 4 for \$1.25.

SPIREA, OPULIFOLIA—Clusters of white flowers during the early summer, followed by attractive dark red seed pods. Grows 5 to 6 feet high.

SPIREA, PRUNIFOLIA—The true Bridal Wreath. Shrub of medium height, having white, double flowers strung one in a place along the entire length of every branch and twig.

SPIREA, THUNBERGI—Small white flowers appearing very early in the Spring. One of the most beautiful Spireas.

SPIREA, VAN HOUTTEI—Popular shrub and hedge plant, well known by everyone. Every shrub a perfect fountain of white bloom early in the spring. 20c each; 6 for \$1.00. For larger quantities, see Hedge Plants.

SUMAC, CUT-LEAF STAGHORN—Closely related to the wild Sumac, except that the leaves are fern-like and the stems are fuzzy like a deer's horn.

SYRINGA, CORONARIUS—(Mock Orange). Hardy, well known shrub. Beautiful white flowers, resembling Orange blossoms. Grows 8 to 10 feet tall.

SYRINGA, LEMOINEI—Lower growing variety, having large, semi-double white flowers. Leaves are somewhat smaller than on other varieties.

SYRINGA, VIRGINALIS—An improved Mock Orange, practically everblooming. Flowers extremely fragrant. 45c each; 2 for 85c.

TAMARIX, AFRICANA—Hardy, rapid growing shrub. Foliage medium feathery green. Pink flowers.

TAMARIX, AMURENSIS—Same as the above, except that the foliage is a beautiful silvery gray-green. Flowers also pink.

WEIGELA, CANDIDA—Popular shrub belonging to the Honeysuckle family. Has a profusion of pure white tubular flowers during May and June. 40c each; 2 for 75c.

WEIGELA, EVA RATHKE—Resembles the above variety very closely, but the flowers are dark red. Dwarf in habit of growth. 40c each; 4 for \$1.50.

WEIGELA, ROSEA—Hardest of the Weigelas. Very free blooming. Rose colored flowers.

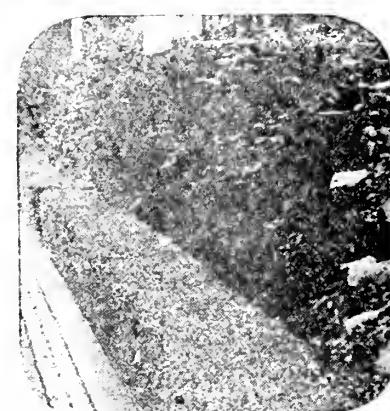

WEIGELA, VARIEGATA—Similar to the other varieties, except that the foliage is a combination of white and green stripes.

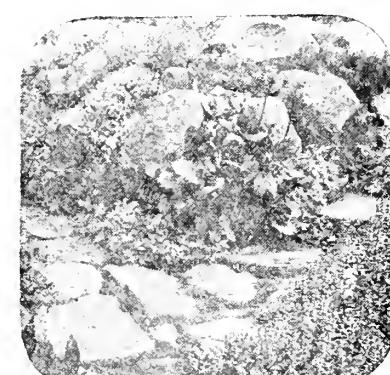

Spirea, Van Houttei

Weigela, Rosea

Trimmed Privet Hedge

Rock Garden Plants, See Perennial Pages

Unless otherwise specified all shrubs are priced at 30c each; 4 for \$1.00; or \$2.85 per dozen postpaid.

HEDGE PLANTS

Hedge plants are the regular 2 year old, 12 to 18 inch size, and much heavier than the one year old plants of that size, usually offered for hedge planting.

Write for Special Prices on Quantities of 200 or More

ONE YEAR OLD HEDGE PLANTS AT HALF PRICE

Please note that the above prices are for the two year old plants, which is a heavier size than that usually offered for hedging purposes. We can supply the lighter grade usually offered if you would rather have them. Just the same as those listed above except they are only one year old and not quite so bushy and heavy.

Figure the one year plants at one-half the above Postpaid prices.

FREE LANDSCAPE SERVICE

A setting of trees and shrubs beautifies your home and adds value to your property far in excess of the amount spent for plant material.

We maintain a Landscape Department to furnish planting plans for your home grounds. Write for our special Landscape Blank, which we will send without charge. To order a plan, fill out the blank and return it to us with a deposit of \$2.00. As the deposit will be credited on your first order for Nursery Stock amounting to \$20.00 or more, the plan really costs you nothing.

GUARANTEED PLANTS

We guarantee plants to reach you in good, live growing condition, and that all plants will be true to name. Should damage occur in transit, notify us at once on Parcel Post shipments, so that prompt replacements can be made. File claims for damages with express agent if stock is damaged in Express shipment and notify us at once.

We cannot be held responsible for plants lost through drouth, adverse weather conditions or improper planting and care.

We are members of the American Association of Nurserymen and the Iowa State Nursery Association. All stock graded to comply with official requirements and Government inspected. Iowa inspection certificate No. 159.

HARDY PERENNIALS

Our perennial plants are all field grown and thoroughly tested for hardiness. Plants are stocky one year olds from seed, divisions from clumps, or heavily rooted plants made from cuttings. Each one has been grown in the way that gives the most blooms and the strongest plants.

Variety descriptions give the colors, time of blooming, height of plants and their favorite locations. Plants especially desirable for the rock gardens are marked R. G.

PRICES POSTPAID

Unless otherwise specified, all perennial plants 25¢ each; 5 for \$1.00; or \$2.00 per dozen. All alike or assorted.

ACHILLEA, MILLEFOLIUM ROSEUM—Pink flowers resembling *Spirea Anthony Waterer*. July-August. Full sun. 18 inches.

ACHILLEA, THE PEARL—Pure white double flowers. July-August. Full sun, 10 inches.

AGROSTEMMA CORONARIUS—(Rose Campion or Mullen Pink). Silvery foliage. Flowers rosy crimson. June-July. Sun. 2 to 3 feet.

AJUGA REPTENS—Spikes of blue flowers. May-June. Sun or shade. Dwarf. R. G.

ALYSSUM SAXATILE—Gray foliage. Yellow flowers in early spring. Full sun. 9 to 12 inches. A rock plant.

ANCHUSA—(Dropmore). Spikes of blue flowers. June and intermittently all summer. Sun or shade. 3 to 4 feet.

ANCHUSA MYOSOTIDIFLORA—Blue flowers in clusters resembling Forget-Me-Nots. May-June. Sun or shade. 12 inches. R. G.

ANEMONE PULSATILLA RUBRA—Small tulip-like flowers of reddish-purple. April-May. Light shade or sun. 9 to 12 inches. R. G.

ANTHEMIS—Yellow Daisy. Blooms throughout Summer. Full sun. 18 inches.

ARABIS ALPINA—(Rock Cress). Dense masses of pure white flowers. April-May. Full sun. Dwarf rock plant.

ARMERIA—(Sea Pink). Pink flowers and bright green foliage. May-July. Full sun. 12 inches. R. G.

ARTEMISIA, PONTICA—(Old Woman). Fine cut foliage having a grayish cast. For sunny, dry spots where most plants fail. R. G.

ARTEMISIA, SILVER KING—Entire plant silvery gray. Prized for winter bouquets as it dries the same color. Sun. 2 to 3 feet. R. G.

ASTERS, HARDY—Rosy pink. Free blooming. July-August. Full sun. 2 to 3 feet.

ASTILBE—Delicate pink plumes. May-June. Semi-shade or sun. 18 inches. Can furnish the white and rose also. 50¢ each; 3 for \$1.25, postpaid. R. G.

BAPTISIA AUSTRALIS—(False Indigo). Flowers dark blue, sweet pea shaped. June. Sun. 2 feet.

BLACKBERRY LILY—Iris-like foliage. Flowers like lilies with red background thickly spotted with yellow and black. Fruit in late season resembles Blackberries. July. Full sun. 3 feet. R. G.

BLEEDING HEART, FERN-LEAFED. Heart shaped pink flowers. May to frost. Semi-shade and sun. 12 inches. R. G.

BLEEDING HEART, OLD-FASHIONED—Just as pictured. May-June. Sun or shade. 18 inches. 50¢ each; 2 for 90¢; 3 for \$1.25, postpaid. R. G.

BOLTONIA—Small daisy-like flower. Pink or white. September. Background or border. 4 to 5 feet.

BUTTERFLY BUSH—Spikes of beautiful lavender. August to frost. Full sun. 3 to 4 feet.

CAMPANULA CARPATICA—(Harebell). Light blue. June-July. Sun or semi-shade. Dwarf. Rock garden favorite.

CANTERBURY BELLS—(Cup and Saucer). Handsome blue, white and pink cup-shaped flowers. June-July. Sun or semi-shade. 24 inches.

CANDYTUFT, HARDY—(Iberis Semperfervens). Bright flowers, dark green foliage in early Spring. Semi-shade or sun. 8 to 10 inches. R. G.

CARNATION, HARDY—Hardy garden variety. We can furnish in red, pink, or white. June to frost. Full sun. 12 inches.

CERASTIUM TOMENTOSUM—(Snow In Summer). Small, snow white flowers. Silvery white foliage. Fine for rock garden. Full sun.

CHIERANTHUS ALLIONII—(Siberian Wall-flower). Fiery orange flowers. June to July. Sun or semi-shade. 12 inches high. R. G.

CHRYSANTHEMUM, LATE BLOOMING—Red and white. October. Full sun. 3 feet.

CHRYSANTHEMUM, EARLY BLOOMING—Yellow and pink. August-September. Full sun. 2 feet.

COLUMbine—Varied shades of blue, pink yellow, cream, white. May-June. Semi-shade and full sun. 2 to 3 feet. We can furnish either Long Spurred or Short Spurred. R. G.

COREOPSIS LANCEOLATA—Yellow. May to frost. For hot, dry exposures. 18 inches.

DAISY, IMPROVED EARLY SHASTA—Superior to the old Shasta Daisy. Large flowers. Blooms for Decoration Day. Full sun. 2 to 3 feet.

DELPHINIUM, BELLADONNA—Light blue. June to frost. Full sun. 3 to 5 feet.

DELPHINIUM, BELLAMOSUM—Dark blue with white throat. June to frost. Full sun. 3 to 5 feet.

DELPHINIUM, ENGLISH HYBRIDS—Very choice blooms of light blue to purple. Often double. June to frost. Full sun. 3 to 6 feet.

DELPHINIUM, VANDERBILT HYBRIDS—An extra-fine strain of Delphinium, in varying shades. The best strain in the United States. 65¢ each; 3 for \$1.85.

DIGITALIS—(Foxglove). Spikes of tubular yellow flowers. June-July. Semi-shade. 2 to 3 feet.

ERYNGIUM—(Sea Holly). Bright blue stems and burrs. Popular for winter bouquets. July-August. Full sun. 2 to 3 feet.

EUPATORIUM—(Hardy Ageratum). Bright blue flowers. Sun or semi-shade. 2 feet. R. G.

FERN, MAIDEN HAIR—Wiry black stems with finely-cut fronds. R. G.

FERN, HARDY OSTRICH PLUME—A big, hardy outdoor Fern. Full shade. Rich, moist soil. 2 to 3 feet. R. G.

FUNKIA, SUBCORDATA GRANDIFLORA—Fragrant white blossoms. August-September. Shade. 18 inches. R. G. 50¢ each; 2 for 90¢, postpaid.

FUNKIA, LANCEOLATA—Sprays of lavender bells. September-October. Shade or semi-shade. 18 inches. R. G.

GAILLARDIA—(Blanket Flower or Pin Cushion Plant). Blending of red, yellow and henna. May to frost. For hot, sunny locations. 18 inches.

GOLDEN GLOBE—New introduction. Perfect globe shaped golden yellow flowers. July-August. 3 to 5 feet. Sun or semi-shade.

GOLDEN GLOW—Golden yellow. July-September. Sun or semi-shade. 5 to 6 feet.

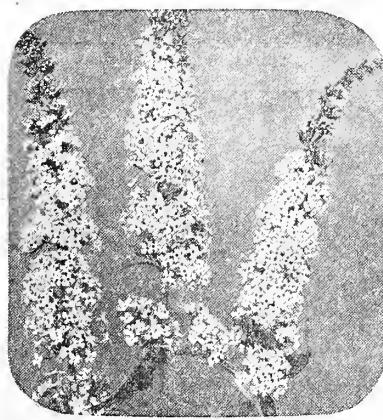

GYPSOPHILIA PANICULATA—(Baby's Breath). White, mist-like flowers to dry for winter bouquets. June-July. Full sun. 3 feet.

GYPSOPHILIA, DOUBLE—(Double Baby's Breath). Double form of the above. Pure white. June-July. Full sun. 3 feet. 60¢ each; 2 for \$1.00, postpaid.

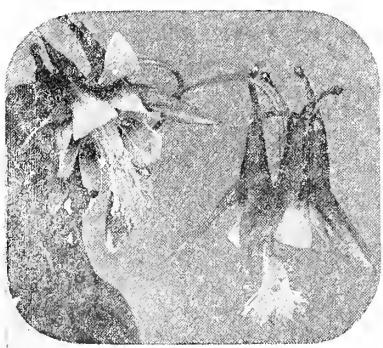

(Continued on next page)

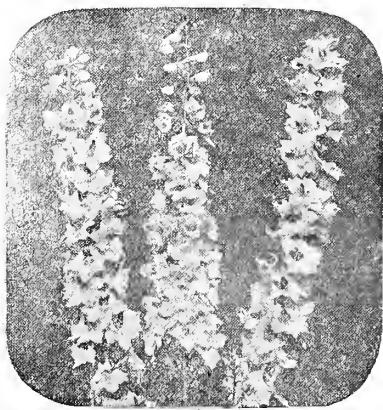

Old-Fashioned Bleeding Heart

Butterfly Bush

Columbine

English Hybrid Delphinium

Unless otherwise specified, all perennial plants 25¢ each; 5 for \$1.00; or \$2.00 per dozen. All alike or assorted.

HELIANTHEMUM—(Rock Rose). A perfect rock garden plant. Colors varying throughout the summer. Full sun. Dwarf. 6 for \$1.00; \$1.85 per dozen, postpaid.

HELIOPSIS PITCHERIANA—(Hardy Zinnia). Resembles golden yellow Zinnias. Semidouble. Blooms throughout summer. Full sun. 3 feet.

HIBISCUS—(Mallow Marvel). Red, white and pink. July-August. Sun and semi-shade. 3 to 4 feet.

HOLLYHOCKS—Mixed colors only. June to frost. Full sun. 5 to 7 feet.

HEUCHERA BRIZOIDES—(Coral Bells). Pink flowers. Heart-shaped leaves. May. Full sun. For the rock garden. 12 inches.

LINARIA—(Butter and Egg Plant). Small flowers shaped something like the Snap-dragon. July-September. Full sun or semi-shade. 6 for \$1.00; \$1.85 per dozen, postpaid.

LINUM PERENNNE—(Hardy Blue Flax). Fine cut foliage. Single blue flowers. June. Sunny locations. R. G.

LOBELIA CARDINALIS—(Cardinal Flower). Fiery red. August. Sun or semi-shade. 3 feet.

LVCHNIS, CHALCEDONICA—(Maltese Cross or Scarlet Lightning). Vivid red. June to frost. Sun or semi-shade. 2 to 3 feet.

LVTHRUM SUPERBUM—(Purple Loosestrife). Purplish lavender. Blooms all summer. Shade. 2 to 3 feet.

MERTENSIA—(Blue Bells). Drooping blue bells. April-May. Shade or semi-shade. 12 inches. R. G. 25¢ each; 6 for \$1.00; or \$1.75 per dozen, postpaid.

MONTANA CORN FLOWER—(Hardy Centaurea). Double dark blue flowers resembling Bachelor Buttons. July-September. Sun. 2 feet. R. G.

MOSOSOTIS—(Forget-Me-Not). Small blue flowers. May to frost. Shade or semi-shade. Moist location. 10 inches. R. G.

NEPETA MUSSINI—(Catmint). Blooms all spring, having beautiful lavender flowers. Sun or shade. Dwarf. 6 for \$1.00; 12 for \$1.85, postpaid. R. G.

ORNAMENTAL GRASS, PHALARIS VARIEGATA—Old Fashioned Striped Grass. 15¢ each; 12 for \$1.00, postpaid. R. G.

EULALIA JAPONICA—(Hardy Pampas Grass). Beautiful feathery plumes just before frost. 25¢ each; 5 for \$1.00.

PENTSTEMON—(Barbatus Torreyi). Sometimes called Beard Tongue. Flowers bright scarlet. June-August. Semi-shade or sun. 2 to 3 feet. 6 for \$1.00; \$1.85 per dozen, postpaid.

PENTSTEMON, LARGE FLOWEDED HYBRID—Varying shades of white, pink and red. June-July. Semi-shade or sun. 15 inches.

PINKS, DIADEM—Blooms variegated and double. June to frost. Sun. 12 inches. R. G.

PINKS, DIANTHUS DELTOIDES—(Maiden Pinks). Pink flowers. June-July. Full sun. Dwarf.

PHYSTOSTEGIA—(False Dragonhead). Varying from pink to white. July-August. Full sun. 3 to 4 feet.

PLATYCODON—(Chinese Balloon Flower). Blue and white. July-September. Sun or semi-shade. 2 to 3 feet. 25¢ each; 6 for \$1.00; \$1.85 per dozen, postpaid.

POPPY, ORIENTAL—Mrs. Perry pink, or

SEDUM FOR THE ROCK GARDEN

ACRE—(Golden Moss). Green foliage. Bright yellow flowers. Spreads rather slowly.

ALBUM—Thick waxy foliage. White flowers. Spreads faster than Acre.

AUREUM—Leaves and tips of shoots golden yellow in spring. Green in summer. Small yellow flowers.

Coccineum—reddish leaves. Small crimson flowers. Spreads rapidly.

KAMTSCHATICUM—Orange-yellow flowers with prostrate green foliage turning golden in Autumn.

KAMTSCHATICUM VARIEGATA—Orange-yellow flowers produced profusely in mid-sum-

orange-scarlet. Fine potted plants from rooted cuttings. 25¢ each; 5 for \$1.00.

POTENTILLA or **CINQUEFOIL**—Double flowers of various colors. Blooms throughout the summer. Sun or semi-shade. R. G.

PRIMULA VULGARIS—(Old English Primrose). Hardy. Pale yellow. May. Shade. 10 inches. R. G.

PYRETHRUM—(Painted Daisy). White to deep rose. Foliage fern-like. May-June. Full sun. 18 inches. 25¢ each; 6 for \$1.00; \$1.85 per dozen, postpaid. R. G.

RANUNCULUS—Trailing double yellow Buttercup. May-June. Full sun. 6 inches. R. G.

RUDBECKIA—(Black-Eyed Susan). Yellow daisy with black center. A biennial. August-September. Semi-shade or sun. 3 feet.

RUDBECKIA, HIBETA—Hardy Black-Eyed Susan. Orange with purple cone in center. Blooms throughout summer. Semi-shade or sun. 2 feet.

SALVIA AZURRA—Spikes of sky-blue flowers. August-September. Full sun. 3 to 4 feet.

SEMPERVIVIUM—(Hardy Hen and Chickens). Small green rosettes resembling Cactus. Sun or shade. 1 inch. For the rock garden.

STACHYS LANATA—(Woolly Woundwort). Foliage grayish and very fuzzy, resembling rabbit ears. July. Full sun. 12 inches. R. G.

STATICE, LATIFOLIA—(Sea Lavender). Lavender flowers resembling Baby's Breath. July-August. Full sun. 1 to 2 feet. R. G.

SUN DROPS—Dwarf form of the Primrose family. Flowers golden yellow. June-July. Full sun. 12 inches. R. G.

SWEET PEA, PERENNIAL—Hardy Sweet Pea. Mixed colors. June to frost. Prefers full sun.

SWEET WILLIAM, EVERBLOOMING RED—Its name describes it fully. Full sun. 12 inches. 25¢ each; 6 for \$1.00; \$1.85 per dozen, postpaid.

THALICTRUM ADIANTIFORME—(Meadow Rue). Flowers white. June. Sun or semi-shade. 2 to 3 feet.

TIMBER PHLOX—Wild Phlox commonly called Sweet William. Pinkish-lavender. Early spring. Full shade. 18 inches. R. G.

TRITOMA, PFTZERI—(Red Hot Poker). Spikes of orange-scarlet flowers. July to frost. Full sun or semi-shade. 2 feet.

VERBENA, HARDY—Like any other Verbena, except hardy. Pink. Blooms all summer. 1 foot. Fine for cemetery or ground covers. R. G.

VINCA MINOR—(Grave Myrtle). Hardy trailing perennial vine. Foliage dark green. Grows rapidly. Ideal for cemetery and rock garden. R. G.

VIOLA CORNUTA—(Tufted Pansy). Cross between Violets and Pansies. Hardy and everblooming. Shade or semi-shade. R. G.

VIOLA ODORATA—(Sweet Russian Violet). Flowers large, dark and very fragrant. R. G.

YUCCA, FILAMENTOSA—(Adam's Needle). Also called Spanish Bayonet or Dagger Plant. Flowers white. Full sun. 4 to 5 feet. R. G.

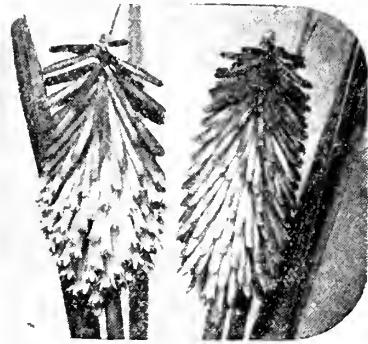

YUCCA, VARIEGATED—Resembles Filamentosa except the leaves are striped with green and white. 45¢ each; 3 for \$1.25, postpaid. R. G.

Mertensia with Hardy Ferns

Sedum Spectabilis

Tritoma Pfitzeri

Yucca

SPECIAL PERENNIAL COLLECTION

8 Plants for \$1.00 Postpaid

One each of the following varieties:
CHIERANTHUS ALLIONI—(Wallflower).
HELIANTHEMUM—(Rock Rose).
LINARIA—(Butter and Egg).
NEPETA MUSSINI—(Catmint).

HARDY PHLOX

We offer the best named varieties of Phlox in strong, field grown plants, at perennial plant prices.

Your selection of varieties, 25¢ each; 5 for \$1.00; or \$2.00 per dozen, postpaid.

BEACON—Brilliant cherry-red. Upright stems.

B. CONTE—Dark wine-red. Low growing and free blooming.

BRIDESMAID—White with fiery red center.

COMMANDER—Crimson-red with darker center.

ECLAIREUR—Tall. Purple spotted with white.

ENCHANTRESS—Bright salmon pink with dark eye. Vigorous grower.

FIRE BRAND—Orange-scarlet. Very brilliant.

JULES SANDEAU—Large blooms of water-melon-pink.

LORD RALEIGH—Spikes of lavender. Low growing.

MISS LINGARD—Pure snowy white. Very early.

MRS. JENKINS—Most popular pure white.

MRS. MILLY VON HOBOKEN—Soft pink without eye. Very large flowers on long stems.

RHEINLANDER—Salmon pink with claret eye.

RICHARD WALLACE—Pure white with violet-rose center.

RIJNSTROOM—Rose-pink with darker center.

ROSENBERG—Tall grower with showy wine purple blooms.

R. P. STRUTHERS—Carmine-pink with darker center. Our most popular variety.

THOR—Deep salmon pink overlaid with scarlet.

12 NAMED VARIETIES, \$1.75, POSTPAID

Our choice of 12 Phlox from the above list. Come labelled with variety names and the same as listed in every respect except that you save 25¢ per dozen by allowing us to select them for you.

SPECIAL MIXED PHLOX

3 for 50¢; \$1.50 per Dozen
Postpaid

If you want mixed colors and are not particular as to variety, we can furnish you with a good mixture of red, white, pink, and purple, at the above price.

PHLOX SUBULATA OR MOSS PINK

A trailing Phlox having brilliant rose-pink flowers, which entirely cover the foliage during April and May. Foliage moss-like and practically evergreen. Requires dry, sandy soil and full sun, making it especially desirable for grave covering, borders, rock gardens and bank coverings. 5 for \$1.00 or \$2.00 per dozen, postpaid.

PANSY PLANTS

Fine, healthy and vigorous Pansy plants from seed sown last summer. A large flowering hardy strain which has withstood freezing weather all winter.

As fine a lot of plants as we have ever grown, and from the best seed obtainable in the United States. Plants blooming in the field last fall measured as much as three inches across the face of the flowers.

Plant them as soon as the frost leaves the ground in early Spring. Not harmed by late freezes. 55¢ per doz., 3 doz. \$1.35, postpaid.

PLANTS FOR THE POOL

Just what you want for the pool and especially necessary if you keep fish. We recommend the hardy varieties of Water Lilies, for they can be carried over in the basement through the winter. Water plants can not be shipped until May 1st.

WATER LILIES

WHITE—A large waxy white flower resembling the wild pond Lilies, but larger. Center filled with golden-yellow stamens. Blooms continuously from the beginning of warm weather until frost. \$1.00 each.

YELLOW—A clear rich lemon color. The stamens are of a deeper golden shade, leaves marbled deep green and brown. Perhaps the freest blooming variety. \$1.50 each.

LIGHT PINK—Vigorous variety. Flowers large and of delicate flesh pink. Price, \$1.50 each.

DEEP PINK—Deep, rich pink. Similar in every other way to the light pink. Price, \$1.50 each.

RED—Glowing shade of deep cerise, or cherry red. Petals pointed with noticeable curl at edges. Flowers very large, often eight inches in diameter. \$2.00 each.

WATER PLANTS

WATER POPPY—Large yellow flowers like Poppies. Blooms almost continuously. Does best planted in pots placed in shallow water. Can be used in pools and the larger aquariums. 25¢ each; 5 for \$1.00.

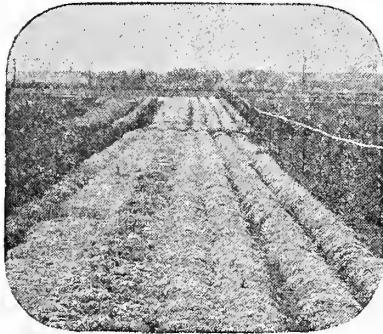

FLOATING HEART—Leaves like small green hearts. Brilliant yellow flowers. Blooms very freely. Can be potted and placed in the pool, or planted in boggy soil along the edge of the water. 25¢ each; 5 for \$1.00.

PARROT'S FEATHER—Fine, feathery green foliage which trails across the surface of the water. Can be potted and placed in shallow water in the pool, or used in water-tight hanging baskets. Excellent in the aquarium as an oxygenating plant. 25¢ each; 5 for \$1.00.

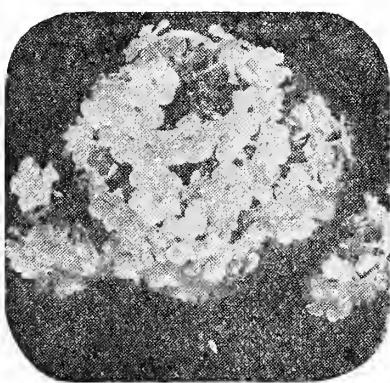

WATER HYACINTH—Shiny, dark green leaves, the stems of which are expanded into bulb-like air chambers. The lavender flowers are produced in spikes like true Hyacinths. Will not always bloom when allowed to float on the surface of the water. May be potted and grown in shallow water, but is best used as a floating plant, since the long, bushy roots are excellent places for goldfish to hide their eggs. 20¢ each; 6 for \$1.00; \$1.75 per dozen.

DUCKWEED—Appears as a series of small green polka-dots on the surface of the water. The tiny white roots, and the green leaves occasionally, are eaten by goldfish which need the green food this plant affords. A large portion, 35¢. Double portion, 50¢.

Better Plants, Better Results
From Henry Field's Nursery

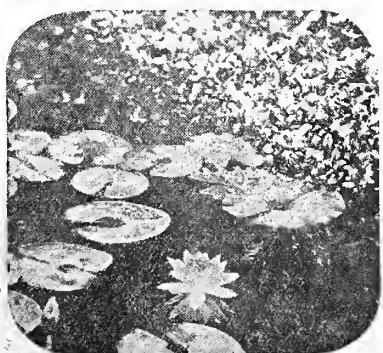

Phlox Subulata

Hardy Phlox

Our Pansies in Bloom

White Water Lily

HARDY LILIES

Plant Hardy Lilies as early as possible in the Spring for best results. Practically all varieties may also be planted in the Fall.

All Lilies require sunshine and drainage, therefore the ground should be prepared with a bottom of stones or gravel, on top of which should be placed about two feet of fibrous loam with a fair proportion of sand and leaf mold or finely chopped sod to lighten ordinary soil.

Mulch Lilies in the Fall when the ground becomes frozen, using straw applied three or four inches deep. Remove mulch in Spring when danger of frost is passed. Leaflet on Lily culture sent free on request.

AURATUM LILY—The popular and well known Gold-Banded Lily of Japan. Flowers a creamy white, with a rich gold band down the center of each petal. Petals sprinkled with reddish brown dots. Each stalk bears from three to twelve large blooms that are very fragrant. Blooms in July and August. Cannot stand lime soil. Plant ten inches deep.

2 year old bulbs, 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen postpaid. 3 year old bulbs, 50c each; 2 for 85c; 4 for \$1.50; or \$4.00 per dozen, postpaid.

OUTDOOR EASTER LILY—Blooms pure snowy white, very similar to the blooms sold at Easter time. Plant eight inches deep in any good garden soil. Stands some lime. 35c each; 2 for 60c; 4 for \$1.00, postpaid.

INDOOR EASTER LILY—The kind usually planted for indoor growing. Should be planted in pots in October and November for spring bloom. Not hardy. 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen, postpaid.

ELEGANS—Hardy Japanese Lily which grows and thrives in any soil. Orange colored flowers, on stems one and one-half to two feet high. Blooms during June and July. Plant eight inches deep. 2 year old bulbs, 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen, postpaid.

RED RUSSIAN LILY—A distinct type of Elegans, popular in the Middle West. The flowers are dark reddish orange. Blooms in May and June, clusters of six to thirty. They are all borne looking straight to the sky. Very showy, on stalks about three feet high. Plant eight inches deep, in any good garden soil. Will stand lime.

Blooming size bulbs, 50c each; 2 for 85c; 4 for \$1.50; or \$4.00 per dozen, postpaid.

REGAL LILY—The white, hardy Lily that came to the United States from Western China. Without doubt the finest of all garden Lilies, and should have a place in every garden. The flowers are of pure waxy white, shading to yellow at the base inside and to pink at the base outside, making a very pleasing effect. The flower stems are slender, flexible and as strong as steel, standing from two to four feet high. The blooms are borne in great profusion in July. Should be planted eight or nine inches deep.

Bulblets, 15 for \$1.00. 2 year old bulbs, 25c each; 5 for \$1.00; or \$2.00 per dozen, postpaid. 3 year old bulbs, 40c each; 4 for \$1.25; or \$3.00 per dozen, postpaid.

SPECIOSUM ALBUM—Pure white flowers with a faint green band down the center of each petal. Flowers in September and October, along with the Rubrum. Plant the same as Rubrum. 40c each; 4 for \$1.25; or \$3.00 per dozen, postpaid.

SPECIOSUM RUBRUM—Pinkish white flowers with petals curving backward. Literally covered with small red dots, so close together the flower sometimes appears almost red. Flowers borne in September and October, on strong, sturdy stalks three to four feet high. Should be planted eight to ten inches deep.

2 year old bulbs, 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen, postpaid. 3 year old bulbs, 50c each; 2 for 85c; 4 for \$1.50; or \$4.00 per dozen, postpaid.

TENUIFOLIUM—Called Siberian Coral because introduced from Siberia. Flowers of scarlet, having a waxy appearance. Flowers very numerous, but not large. Petals recurved, and the stems covered with narrow, grasslike foliage. Like partial shade, and will stand lime. Plant six inches deep. Blooms in June. 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen, postpaid.

TIGER LILY—This old-fashioned favorite does not need any description, except to say it is the genuine old-fashioned Tiger Lily. Plant about nine inches deep. Specify whether single or double is wanted. 15c each; 2 for 35c; 4 for 45c; or \$1.00 per dozen, postpaid.

UMBELLATUM—Deep orange flowers borne upright on stalks two to three feet high. Blooms in June and July. Plant eight inches deep in ordinary garden soil. Prefers full sun. 35c each; 2 for 60c; 4 for \$1.00; or \$2.50 per dozen, postpaid.

LILY OF THE VALLEY—Old-fashioned favorite, well known to everyone. Blooms and thrives on the north of the house, where the sun does not shine and where soil is damp and sour. Will do well in fairly sunny locations if sufficient moisture is present. Increases rapidly and bloom very freely. 4 for 15c; 40c per dozen; or 2 dozen for 75c, postpaid.

HEMEROCALLIS—Called Day Lily or Lemon Lily. Varieties very much the same, except that they come in different blooming periods throughout the spring and summer. Flowers come in various shades of yellow and orange. We can furnish the following varieties at 25c each; 5 for \$1.00; or \$2.00 per dozen, postpaid. You may order all alike or assorted.

Dumortieri—Large, golden yellow, reddish yellow markings. Blooms all through June.

Flava (Lemon Lily)—Clear lemon yellow. Blooms last of May.

Fulva—Dark brownish copper, shading to crimson. Very tall. Blooms through July.

Kwanson—Brownish copper, shading to crimson. Blooms in July.

Middendorffii—Golden yellow. Blooms larger than Flava. Blooms last of May.

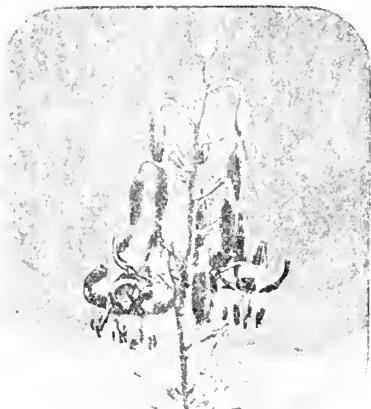

Thunbergi—Pale lemon-yellow. Blooms about the middle of August.

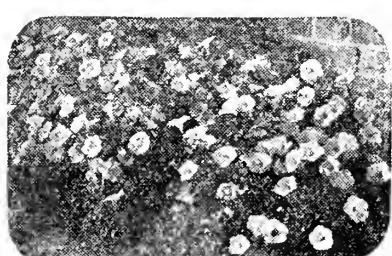

Auratum Lily

Regal Lily

Siberian Coral Lily

Bed of Petunias

BEDDING PLANTS

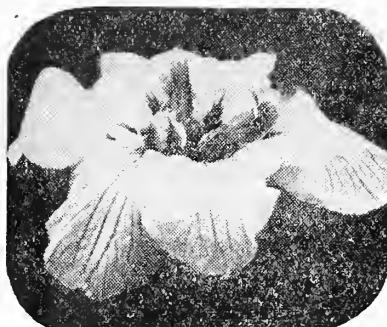

We have a wonderful lot of bedding plants growing for you in our Greenhouses here at Shenandoah. They will be ready for mailing out just as soon as danger of freezing weather is past.

PETUNIAS—Last year we didn't raise anywhere near enough Petunia plants to go more than half way around, but this year I think we will have enough to supply everybody, especially of the standard varieties, such as Rosy Morn, Balcony Blue, Balcony Rose, General Dodd and Howard's Star. The price will be 50c per dozen, or three dozen for \$1.25, by mail postpaid. You may take them all of one variety or assort them to suit yourself.

ASTERS—We can supply Aster plants in four colors, red, white, pink, or purple, or assorted colors. The price is the same as the Petunias. 50c per dozen, or three dozen for \$1.25, postpaid.

**Henry Field Guarantees
Every Nursery Order**

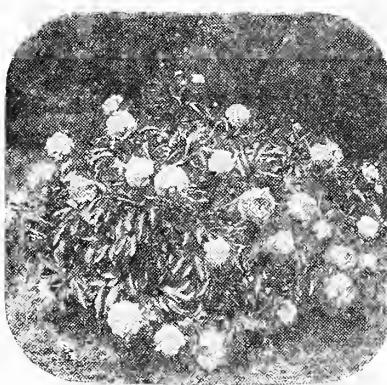

IRIS

Japanese Iris

German Iris, Lent A. Williamson

Edulis Superba

Sarah Bernhardt

Without exception the most satisfactory of perennial flowers for the average gardener.

- ALCAZAR**—Violet blue with purple falls.
- BLUE SIBERIAN**—Dark blue.
- B. Y. MORRISON**—Pale lavender, dark purple falls.
- CAPRICE**—Purple-red.
- EDITH COOK**—Purple with yellow falls.
- EDOUARD MICHEL**—Dark reddish violet.
- FLORENTINA ALBA**—White.
- GERTRUDE**—Dark violet blue.
- HER MAJESTY**—Rosy lilac.
- JAPANESE IRIS**—Blooms flat. Grows tall with narrow leaves. Prefers acid and moist soils. Mixed colors only.
- JUNIATA**—Blue with purple veined falls.
- KOCHI**—Very dark purple.
- LENT A. WILLIAMSON**—Lavender, dark falls.
- LORD OF JUNE**—Pale lavender, dark falls.
- LORELY**—Yellow with purple veined falls.
- MADAME CHEREAU**—Pure white, petals penciled with blue.
- MOTHER OF PEARL**—Lavender gray.

Your selection of above varieties, \$1.00 per dozen, postpaid. Single plants, 15¢ each.

DWARF IRIS

- PURPLE PUMILA**. Bluish purple. Dwarf. 3 for 25¢; 75¢ per doz.
- WHITE PUMILA**. Same as Purple, flowers white. 3 for 25¢; 75¢ per doz.
- YELLOW PUMILA**. Golden yellow. Low growing. 20¢ each; 3 for 50¢
- SPRING SKIES**. Pale blue. Very dwarf. 3 for 25¢; 75¢ per doz.

NEWER VARIETIES

- AMBASSADEUR**—Bluish-pink. Dark purple falls. 30¢ each.
- AUTUMN KING**—Dark blue flower with velvety purple falls. Spring and Fall blooming. 75¢ each.
- BEAU IDEAL**—White. Standards and falls bordered with violet. 25¢ each.
- GEORGE J. TRIBOLET**—Violet standards. Dark velvety purple falls. 75¢ each.

Remember when planting Iris, to set very shallow, with at least half of the bulb showing above the ground, and only the roots extending down in the soil. With the exception of the Japanese Iris, all prefer well drained locations.

PEONIES

Plant vigorous, healthy, guaranteed true-to-name Peonies of the highest quality, with the Henry Field guarantee of satisfaction. All prices postpaid.

WHITE PEONIES

- ALBATRE**—Pure show-white. Midseason. 40¢ each.
- BARONESS SCHROEDER**—Delicate blush white. Very fine. Bloom late. 75¢ each.
- COURONNE D'OR**—Snow-white, yellow stamens. Late midseason. 40¢ each.
- FESTIVA MAXIMA**—Most widely known white. Early. 40¢ each.
- MADAM CROUSSE**—Large pure white with touches of crimson. Midseason. 60¢ each.
- MADAM DE VERNEVILLE**—White with touches of carmine. Early. 40¢ each.
- MARIE LEMOINE**—Ivory white. 40¢ each.

PINK PEONIES

- ALBERT CROUSSE**—Flesh-pink. Late. 60¢ each.
- ASA GRAY**—Salmon-pink marked with deep pink. 60¢ each.

CREAM OF THE LIST

Our choice for the very best in Peonies at moderate cost is Festiva Maxima, white; Edulis Superba, pink; and Felix Crousse, red. The collection of one each, postpaid for \$1.00.

SPECIAL PEONY BARGAIN, \$1.75 Per Dozen, Postpaid

We have a limited quantity of mixed varieties, unlabelled as to color or variety. If you want a quantity of Peonies for mass planting and are not particular about varieties, you can hardly overlook these mixed Peonies at this price.

RED, WHITE AND PINK PEONIES

5 for \$1.00, Postpaid

They will come labelled as to color, but will not carry variety names. You may make your own selection of colors. Specify colors wanted, otherwise assorted colors will be sent. \$2.00 per dozen, postpaid.

PLANTING DIRECTIONS

Remember not to plant Peonies too deeply. Three inches of soil over the eyes or crowns of the plants will be sufficient. Plant in average soil but avoid sandy soils.

ORNAMENTAL VINES

AMERICAN IVY (*Virginia Creeper* or *Woodbine*)—A native American Vine, which is hardy anywhere. A beautiful vine and a fast grower. Requires some support. 30c each; 2 for 55c; 4 for \$1.00, postpaid.

BETA GRAPE—A cross between a wild grape and Concord grape, which makes a wonderful porch vine, as it climbs just about as good as wild grapes. 25c each; 5 for \$1.00. (Two year old vines).

BITTER SWEET (*Celastrus scandens*)—A hardy, native vine with yellow flowers in June, followed by orange colored pods, which split open, showing a red center. 40c each; 2 for 75c; 3 for \$1.00, postpaid.

BOSTON IVY (*Ampelopsis Veitchii*)—Beautiful climbing vine which clings tightly to any kind of wall. Especially good on brick or stucco houses. Not so very hardy north of here. 50c each; 2 for 95c; 4 for \$1.60, postpaid.

ENGELMANN'S IVY (*Ampelopsis Engelmanni*)—Larger and stronger growing than the Boston Ivy and extremely hardy, but does not cling so well. Used very extensively on account of its hardness and rapid growth. Looks some like American Ivy. 30c each; 2 for 55c; 4 for \$1.00, postpaid.

CLEMATIS JACKMANNI—The big purple Clematis. Very fine, hard to grow. We furnish very fine plants, but sell them without any guarantee as to their living. \$1.00 each; 2 for \$1.75; 4 for \$3.00, postpaid.

CLEMATIS PANICULATA (*Japanese Clematis*)—Hardy, thrifty, quick growing. Great masses of fragrant white flowers during July, August and September. 30c each; 2 for 55c; 4 for \$1.00, postpaid.

DUTCHMAN'S PIPE (*Aristolochia Siphon*)—Derives its name from the peculiar shape of its flowers, which resembles the old-fashioned

Dutch pipe. The leaves are nearly as large as dinner plates. Does best on the north side of houses where most other vines are not a success. Blooms in June. Our vines are grafted and are the true large-leaved type. 55c each; 2 for \$1.00, postpaid.

HONEYSUCKLE, HALLIANA (*Hall's Japan Honeysuckle*)—Perfectly hardy, great climber and will grow anywhere. They range from white to yellow in color of blooms. 30c each; 2 for 55c; 4 for \$1.00, postpaid.

HONEYSUCKLE, RED CORAL (*Scarlet Trumpet*)—This variety is much like the Halliana, except for the shape and color of the blossoms, which are truly called scarlet trumpet. 30c each; 2 for 55c; 4 for \$1.00, postpaid.

SILVER LACE VINE (*Polygonum Auberti*)—Shown in color on inside front cover. Fastest growing of all hardy climbing vines. Many customers report thirty feet growth the first season. Covered with masses of foamy white flowers in late summer. Seems to do equally well on any side of the building. Price 75c each, postpaid.

TRUMPET FLOWER (*Bignonia Radicans*)—A hardy, native vine, and extra strong grower, which always looks well. Glossy green leaves and large orange colored trumpet shaped flowers. 40c each; 3 for \$1.00, postpaid.

WISTERIA (*American Purple*)—A very strong growing vine with handsome, lacy foliage and beautiful, drooping trusses of purple flowers as large as bunches of grapes. Grafted from blooming wood. 75c each; 2 for \$1.40, postpaid.

WISTERIA (*Chinese White*)—About the same as above, except the color, which is pure white. Grafted vines. 75c each; 2 for \$1.40, postpaid.

FOREST TREE SEEDLINGS

These are especially recommended for wood lots, hedges, and windbreaks. Some of them are especially good for fence posts, such as the Osage Orange, Catalpa, and Russian Mulberry.

The trees listed below are all one year old seedlings, straight whips, 12 to 18 inches in height when dug, except the Willow and Poplar, which are taller.

Prices quoted are prepaid, either by parcel post or prepaid express, according to the size of the bundle. We will not sell less than 100 of a kind at these low prices.

FOREST TREE SEEDLING PRICES

ORDER EARLY

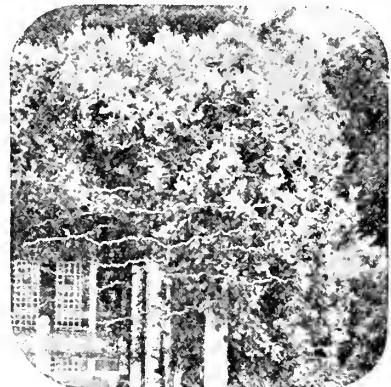

Lots of people hold off ordering Nursery Stock until the middle of the season. Whenever possible, we advise placing your order early. If you do this, we can reserve the stock for you, and ship it at the proper time for planting in your locality, and you are also sure of getting some of these varieties of plants which are usually sold out near the end of the season.

In shipping early orders, we check very carefully with Government weather reports. Of course, unexpected weather conditions cannot be avoided. If your Nursery Stock arrives in unfavorable weather, untie the package and store in a cool place in the cellar. Do not remove packing from the roots. Plants will keep in good condition in this way for several days.

SHADE TREES

Catalpa Bungei (Umbrella Tree)

Chinese Elm

Background of Poplars

Plant good shade trees to improve both farm and city homes. The following varieties give the most satisfaction and do best in the Middle West. Our trees are very fine and we guarantee them to suit you.

(Prices are not prepaid). The trees are all too large to be sent by mail, so we price them F. O. B. Shenandoah, express shipment, charges to be paid by purchaser.

ASH GREEN—A straight, rapid growing tree. Very hardy and easy to establish. Foliage dark green and very heavy. 5-6 Ft. Trees, 60c each; 4 for \$1.85; or 12 for \$4.50.

6-8 Ft. Trees, \$1.00 each; 4 for \$3.75; or 12 for \$7.50.

ASH, MOUNTAIN—Smooth barked, having beautiful dark green foliage. White blossoms in the spring, with red berries in the autumn. 5-6 Ft. Trees, 75c each; 4 for \$2.75; 12 for \$7.00.

6-8 Ft. Trees, \$1.25 each; 4 for \$5.00; or 12 for \$12.00.

BIRCH, CUT-LEAF WEEPING—White barked. Foliage of small, finely cut leaves. Branches long and drooping.

5-6 Ft. Trees, \$2.00 each; 4 for \$7.25; or 12 for \$19.00.

6-8 Ft. Trees, \$2.75 each; 4 for \$10.00; or 12 for \$25.00.

BIRCH, EUROPEAN WHITE—Strong, rapid grower of spreading type. Bark white with light green foliage. Very hardy.

5-6 Ft. Trees, \$1.35 each; 4 for \$4.25; or 12 for \$11.50.

6-8 Ft. Trees, \$1.75 each; 4 for \$6.25; or 12 for \$16.50.

CATALPA, BUNGEI—The Umbrella tree. Very hardy, and especially desirable as specimens.

5-6 Ft. Stems, \$1.35 each; 4 for \$4.25; or 12 for \$11.50.

CRAB, BECHTEL'S FLOWERING—The best Flowering Crab. Flowers of delicate pink, and very fragrant.

3-4 Ft. Trees, 90c each; 4 for \$3.00; or 12 for \$7.25.

4-5 Ft. Trees, \$1.25 each; 4 for \$5.00; or 12 for \$12.00.

ELM, WHITE—The native American Elm which grows so large and spreading. One of the best shade trees.

5-6 Ft. Trees, 60c each; 4 for \$1.85; or 12 for \$4.50.

6-8 Ft. Trees, \$1.00 each; 4 for \$3.75; or 12 for \$7.50.

MAPLE, SOFT—The common Silver Maple, having the dark green leaves, that are silvery white on the reverse side. Very hardy and a fast grower.

5-6 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.00.

6-8 Ft. Trees, 75c each; 4 for \$2.75; 12 for \$5.00.

MAPLE, HARD—Very hardy, symmetrical shaped tree. Has a heavier foliage than any other Maple. Commonly called Sugar Maple.

5-6 Ft. Trees, \$1.50 each; 4 for \$5.00; 12 for \$14.00.

6-8 Ft. Trees, \$2.00 each; 4 for \$7.25; 12 for \$19.50.

MAPLE, WIER'S CUT-LEAF—Beautiful ornamental Maple with long, drooping branches and finely cut foliage. Fine for lawn specimens.

5-6 Ft. Trees, \$1.25 each; 4 for \$4.00; 12 for \$9.50.

6-8 Ft. Trees, \$1.75 each; 4 for \$6.50; 12 for \$12.00.

RUSSIAN MULBERRY—Well known to everyone. A fast grower.

5-6 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.50.

RUSSIAN OLIVE—Foliage of silvery gray. Very hardy.

5-6 Ft. Trees, \$1.25 each; 4 for \$4.00; 12 for \$10.00.

POPLAR, BOLLEANA—Tall, column shaped tree, very much like Lombardy in appearance. Much harder and longer lived, however.

5-6 Ft. Trees, \$1.25 each; 4 for \$4.00; 12 for \$10.00.

6-8 Ft. Trees, \$1.75 each; 4 for \$6.50; 12 for \$12.00.

POPLAR, CAROLINA—Upright, pyramidal shaped tree, which grows very rapidly. Fine for windbreak or screen plantings.

5-6 Ft. Trees, 40c each; 4 for \$1.35; 12 for \$2.75.

6-8 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.50.

8-10 Ft. Trees, 75c each; 4 for \$2.75; 12 for \$5.00.

POPLAR, LOMBARDY—Grows very tall and massive. The best for landscape plantings and screen effects.

5-6 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.00.

6-8 Ft. Trees, 75c each; 4 for \$2.75; 12 for \$5.00.

8-10 Ft. Trees, \$1.00 each; 4 for \$3.75; 12 for \$8.00.

POPLAR, NORWAY—Very similar to the Carolina variety.

5-6 Ft. Trees, 40c each; 4 for \$1.35; 12 for \$2.75.

6-8 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.50.

8-10 Ft. Trees, 75c each; 4 for \$2.75; 12 for \$5.00.

RED BUD—Ornamental tree of medium size, having heart shaped leaves. Flowers of striking reddish-pink appear in early spring before foliage comes on.

4-5 Ft. Trees, \$1.25 each; 4 for \$4.00; 12 for \$10.00.

SYCAMORE—Spotted barked tree having large, deeply cut leaves. Grows rapidly, making a fine tree for street planting.

5-6 Ft. Trees, 75c each; 4 for \$2.00; 12 for \$5.00.

WILLOW, GOLDEN—Fine hardy variety having golden yellow bark.

5-6 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$3.00.

6-8 Ft. Trees, 75c each; 4 for \$2.00; 12 for \$5.00.

WILLOW, LAUREL LEAFED—Dwarfish in habit of growth. Leaves large and glossy. Very hardy.

5-6 Ft. Trees, 75c each; 4 for \$2.00; 12 for \$5.00.

WILLOW, WEEPING—Very hardy variety, having large drooping branches and yellow bark.

5-6 Ft. Trees, 75c each; 4 for \$2.00; 12 for \$5.00.

6-8 Ft. Trees, \$1.25 each; 4 for \$4.00; 12 for \$10.00.

WILLOW, PUSSY—Shrub type Willow, having the flowers, or pussies, in the early spring before the foliage appears.

2-3 Ft. Trees, 50c each; 4 for \$1.50; 12 for \$4.00.

3-4 Ft. Trees, 75c each; 4 for \$2.00; 12 for \$5.00.

The New CHINESE ELM Shade Tree

Exceptionally hardy and rapid growing. Thrives in any soil and under all conditions. Rapidly taking the place of all others as a street, park, specimen and windbreak tree. Our trees are of excellent quality, northern strain, the finest in the Middle West.

	Each	4	12
8-10 Ft. Trees	\$1.25	\$4.00	\$10.00, Not Prepaid
6-8 Ft. Trees	1.00	3.00	7.50, " "
5-6 Ft. Trees	.75	2.25	6.00, " "
3-4 Ft. Trees	.50	1.50	4.00, Postpaid

Sizes not prepaid are too large for mail shipment. Shipped by Express only.

EVERGREENS

We furnish only balled and burlapped Evergreens, insuring the best possible results in transplanting. Trees are shipped the same day they are taken from the field, so that you get only fresh stock.

Prices include cost of balling and burlapping and all boxing charges. We do not pre-pay delivery on Evergreens, but ship only by Express, charges to be paid by the purchaser.

Special Quantity Price—If you want larger quantities than these listed here, write, telling us the size, variety and number of trees desired.

AMERICAN ARBORVITAE—Commonest of all Evergreens. Very hardy and dependable. Can be kept trimmed to any form or height. Prefers moist locations.

18-24 in. 2-3 ft. 3-4 ft.
Price Each \$1.35 \$1.85 \$3.00
Price Per Pair 2.40 2.85 5.00
2 Pair 4.00 5.00 9.50

COMPACTA ARBORVITAE—Dwarf and compact grower, which is almost globe shaped. Foliage bright green. Can be trimmed.

12-15 in. 15-18 in.
Price Each \$1.25 \$1.60
Price Per Pair 2.00 2.75
2 Pair 3.75 5.00

ORIENTAL ARBORVITAE—A tall, slender growing tree having dark green foliage. Does best in open, sunny locations. Can be kept trimmed.

12-18 in. 18-24 in.
Price Each \$1.00 \$1.50
Price Per Pair 1.75 2.25
2 Pair 3.00 3.75

PYRAMIDAL ARBORVITAE—Most popular Arborvitae. Grows tall and very slender. Plant in reasonably good soil in south or east locations. Will stand severe pruning.

12-18 in. 18-24 in. 2-2½ ft. 2½-3 ft.
Price Each \$1.25 \$2.00 \$2.25 \$3.50
Price Per Pair 2.00 3.25 4.00 5.75
2 Pair 3.75 5.75 7.25 10.50

JUNIPER, EXCELSA STRICTA—Dense, slow growing tree which tapers gracefully from the ground to a sharp pointed top. Should be planted in well drained soil in open, sunny locations. Suitable for rock garden.

12-15 in. 15-18 in. 18-24 in.
Price Each \$1.75 \$2.25 \$3.50
Price Per Pair 3.00 4.00 6.00
2 Pair 5.50 7.75 10.50

IRISH JUNIPER—An upright grower of columnar form. Foliage of deep green. May be sheared. Plant in well drained soils.

12-18 in. 18-24 in. 2-2½ ft. 2½-3 ft.
Price Each \$1.50 \$2.25 \$3.00 \$4.00
Price Per Pair 2.50 4.00 5.00 7.00
2 Pair 4.50 7.00 9.25 12.00

PFITZER'S JUNIPER—Dwarf Evergreen of irregular form. Can be pruned. Thrives in any soil and in almost any situation. Dark green foliage.

15-18 in. 18-24 in. 2-2½ ft.
Price Each \$2.00 \$3.00 \$4.25
Price Per Pair 3.75 5.00 8.00
2 Pair 7.00 9.50 14.75

SABINA JUNIPER—Similar in appearance to Pfitzer's Juniper, except it is more dense. Very hardy. Adaptable to any soil and growing conditions.

	12-15 in.	15-18 in.
Price Each	\$2.25	\$2.50
Price Per Pair	3.75	4.25
2 Pair	7.00	8.00

JUNIPER VIRGINIANA (Red Cedar)—The native American Evergreen. Very hardy and can be grown anywhere.

	12-15 in.	15-21 in.	2-3 ft.	3-4 ft.
Price Each	\$1.25	\$1.75	\$2.75	\$4.00
Price Per Pair	2.00	2.50	4.25	6.50
2 Pair	3.50	4.50	7.50	12.00

MUGHO PINE—Very hardy low growing dwarf type Pine. Will grow most anywhere but prefers well drained soil.

	12-15 in.	15-18 in.	18-24 in.
Price Each	\$1.75	\$2.25	\$3.50
Price Per Pair	3.00	4.00	6.00
2 Pair	5.75	7.75	11.00

MONTEREY PINE—Large spreading Pine having long needles. Absolutely hardy and fine for either ornament or windbreak.

12-18 in. Size only—\$1.20 each; 2 for \$1.90; or 4 for \$3.50.

SCOTCH PINE—Very rapid growing Pine desirable for windbreak or specimen plantings. Foliage dark green in color, with long needles. Prefers a cool, well drained soil.

	12-15 in.	15-18 in.	18-24 in.
Price Each	\$1.00	\$1.75	\$2.50
Price Per Pair	1.50	2.40	3.75
2 Pair	2.75	4.25	6.00

BLACK HILL SPRUCE—The popular windbreak and ornamental Evergreen of the Middle West. Hardiest of all Spruces. Compact and bushy in habit of growth. Plant in well drained soil and full or partial sun.

	12-18 in.	18-24 in.	2-2½ ft.	2½-3 ft.
Price Each	\$1.15	\$1.75	\$2.60	\$3.50
Price Per Pair	1.90	2.75	4.25	6.00
2 Pair	3.50	4.75	8.00	11.25

COLORADO BLUE SPRUCE—Hardy ornamental Spruce. Foliage of rich steel blue. The best specimen Evergreen for the Middle West.

	18-24 in.	2-2½ ft.	2½-3 ft.
Price Each	\$6.00	\$8.50	\$11.00
Price Per Pair	11.00	16.00	20.00

NORWAY SPRUCE—Another widely used Evergreen for both windbreak and specimen planting. Better for Eastern Iowa and localities farther east. Prefers shallow and well drained soil. Very hardy.

	12-18 in.	18-24 in.	2-3 ft.	3-4 ft.
Price Each	\$1.00	\$1.55	\$2.15	\$3.25
Price Per Pair	1.65	2.30	3.40	5.25
2 Pair	3.10	4.25	6.25	10.00

PLANTING DIRECTIONS—Unpack the trees as soon as you receive them. Plant at once if possible but should it be necessary to delay planting be sure to keep well watered. Do not allow the roots to become dry. Loosen and cut the burlap, but do not remove it. Plant at same depth at which tree stood in nursery. Plant in well drained soil and keep well watered until fully established. Do not fertilize or mulch with fresh manure, but use only well rotted straw and manure as a mulch.

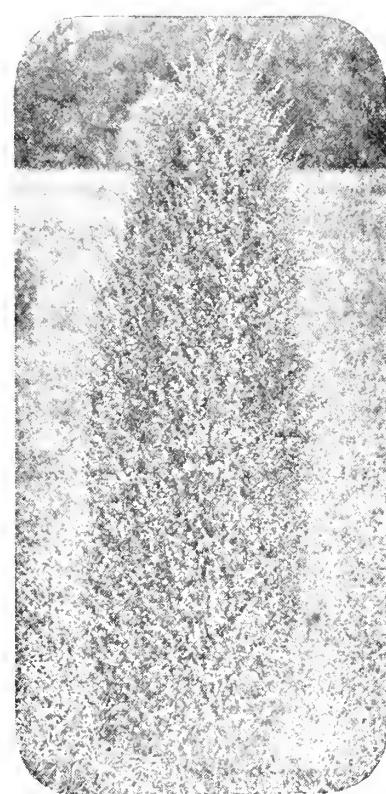

WE GUARANTEE delivery in good, live growing condition. We are not responsible however for growth of trees after planting, for successful growth of Evergreens depends upon the care they receive and upon local growing conditions. File claim with Express Company for any damage occurring in shipment.

MUGHO PINE

NORWAY SPRUCE

SHEARED RED CEDAR

RASPBERRIES

Prepare the ground well. Plant in rows five feet apart, setting the plants three feet apart in the row. When through fruiting, cut out the old wood, to give strength and vigor to new canes for producing next year's crop. Plant the Blackberries just the same as you do Raspberries. We do not advise fall planting, and ship in spring only.

CHIEF—The new red Raspberry. The Chief originated in Minnesota, and was originated by the Minnesota Experiment Station. It is unusually hardy, and apparently Mosaic proof. The berry is a rich red color, ripens ten days to two weeks earlier than Latham. Although the berries are slightly smaller than Latham, Chief yields so heavy that the average crop is 25% more for the season.

Because the flavor is so highly delicious, we believe that it is the coming Raspberry for home and commercial use. The price is \$1.50 per dozen; 25 for \$2.75; \$10.00 per 100, postpaid.

CARDINAL—The best purple variety, appearing much like the Black-cap, except that the berry is a dark cardinal color. Berries large and quality fine. One year plants, 12 for 70c; 25 for \$1.25; 100 for \$1.75, postpaid. Two year plants, 12 for \$1.50; 25 for \$1.50; 25 for \$2.75; \$9.00 per 100, postpaid.

CUTHBERT RED—The old standby of red Raspberries. Fruit sweet and richly flavored. One year old plants only, 12 for 70c; 25 for \$1.10; \$4.25 per 100, postpaid.

EARLY HARVEST—The earliest ripening variety. Vigorous and compact grower. Yields heavily. 12 for 80c; 25 for \$1.35; 100 for \$4.75, postpaid.

MERSEREAU—Largest fruit of any. Fruit sweet and very juicy. Ripens two weeks earlier than the Snyder. 12 for \$1.00; 25 for \$1.75; 100 for \$3.75, postpaid.

DEWBERRIES

LUCRETIA—Fruit is quite large and closely resembles the Blackberry. Very sweet, without a core. Vines trail on the ground. Very hardy and produces well. 12 for 75c; 25 for \$1.35, postpaid.

STRAWBERRY-RASPBERRY

Berries bright scarlet, much like red Raspberries. Bush is low growing and is hardy anywhere. Fruit borne on new growth. Fruit not of much value to eat, but chiefly a curiosity for the garden. 15c each; 5 for 50c; 15 for \$1.00, postpaid.

WASHINGTON RUST-PROOF ASPARAGUS PLANTS

Plant Asparagus in rich loam soil in a southern exposure if possible. Set plants 2 feet apart in the row, being sure that the roots are kept well spread apart. For best results, the rows should be 3 to 5 feet apart.

We have only one variety, the WASHINGTON RUST-PROOF, which is absolutely free from Asparagus Rust. May be planted either spring or fall.

One year plants are 25 for 50c; 100 for \$1.75; 200 for \$3.25, postpaid.
Two year plants are 25 for \$1.00; 100 for \$2.75; 200 for \$5.00, postpaid.
Write for special prices on larger quantities.

SAGE

MAMMOTH BROADLEAF—This is the old-fashioned Sage used for seasoning. You should have from four to a dozen plants in your garden, for the home grown product is usually of finer quality than that which is packed and sold commercially.

Heavy, field grown plants, 4 for 50c; or 12 for \$1.00, postpaid. May be planted either spring or fall.

The **MALINER KREN**, or Improved Bavarian variety, is the best variety for home use. Easy to grow from either cuttings or crowns. Crowns are top pieces of large roots, and will make hills the first year. We can furnish crowns at 3 for 25c; 12 for 75c; or 100 for \$4.50, postpaid. We can also furnish the cuttings, which are pieces of roots, at 12 for 35c; or 100 for \$1.50, postpaid.

THE YOUNGBERRY

A new fruit resulting from crossing the Dewberry and Loganberry. Resembling its parent plants in habit of growth, it is much harder and vigorous and adapts itself to a wide range of soils and climates.

The fruit is very juicy, somewhat sweet, and flavored like the red Raspberry. Excellent for table use, canning and making jelly.

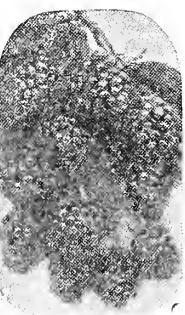

\$1.50 per dozen; 25 for \$2.75; 50 for \$5.00; \$8.00 for 100, postpaid.

Cumberland

Chief

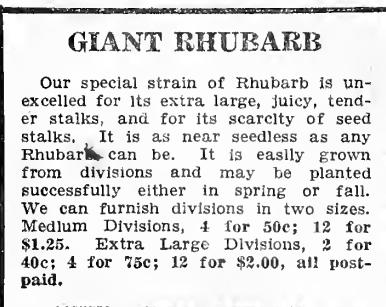

Eldorado

Washington Asparagus

Stalks of Giant Rhubarb

GIANT RHUBARB

Our special strain of Rhubarb is unexcelled for its extra large, juicy, tender stalks, and for its scarcity of seed stalks. It is as near seedless as any Rhubarb can be. It is easily grown from divisions and may be planted successfully either in spring or fall. We can furnish divisions in two sizes. Medium Divisions, 4 for 50c; 12 for \$1.25. Extra Large Divisions, 2 for 40c; 4 for 75c; 12 for \$2.00, all postpaid.

HORSERADISH

The **MALINER KREN**, or Improved Bavarian variety, is the best variety for home use. Easy to grow from either cuttings or crowns. Crowns are top pieces of large roots, and will make hills the first year. We can furnish crowns at 3 for 25c; 12 for 75c; or 100 for \$4.50, postpaid. We can also furnish the cuttings, which are pieces of roots, at 12 for 35c; or 100 for \$1.50, postpaid.

STRAWBERRY PLANTS

PLANT STRAWBERRIES NOW

There is only one time to set out strawberries. Right now, as early in the spring as possible. Get them in the ground early to get the advantage of the season's rains and to get them established before hot, dry summer weather comes.

We do not ship strawberry plants in the Fall. Each season we have hundreds of letters and orders from people who want to set out strawberries in August or September. It can't be done, at least not under ordinary conditions. If you have your own plants and can take them up with a spade full of dirt so as not to disturb the roots, you may have fair success, but to dig and ship plants in the ordinary way would be plain murder.

JUNE BEARING VARIETIES

AROMA—A great market berry in Southern Missouri and Northern Arkansas.

SENATOR DUNLAP—One of the best June bearing varieties. It has been the standard market variety for this section of the country. Heavy bearer and heavy plant maker. The fruit is large, smooth, regular in shape, very firm, of dark red color, and of a quality that makes it unexcelled for home or market use.

BLAKEMORE—The new strawberry in color on the inside back page. Originated by the United States Department of Agriculture, with special attention given to perfecting marketing qualities, and flavor of berries for commercial use. The berry is large and finely flavored, very solid, which makes it a good keeper, and the plants produce even heavier than the Senator Dunlap.

Premier—Not planted generally here in Iowa, but used extensively in Ohio, Indiana, and Illinois, and has been in great demand the last two or three seasons. Commercial growers in these states claim it is the best variety.

EVERBEARING VARIETIES

FIELD'S NEW MASTERPIECE—Called Masterpiece because we find it superior to all other everbearing varieties. Superior for its size, flavor, productiveness and keeping qualities. Berries very large, solid, dark red, and of fine texture, making it very delicious for table use. It will keep better and longer than any berry we have ever had, keeps for days after being picked, thus making it ideal also for market use. It produces a heavier crop than the Mastodon, and makes more runners and more new plants than any other everbearing variety we have.

We first offered Masterpiece last year, and sale plants were quickly exhausted. Our stock is still limited, so it will be strictly first come, first served.

THE MASTODON—The Mastodon is one of the biggest and best strawberries we have ever had. It is certainly a world beater, big, dark red, high flavored, and ideal for home use. The plants are big and husky, and produce lots of fruit all summer from June until frost. Now the most popular variety in the U. S.

THE IMPROVED PROGRESSIVE—A standard variety of everbearing strawberries. They are widely used and preferred by some people to the Mastodons, claiming that the berry is better flavored.

Strawberry Plant Prices

	25	50	100	200	500	Postpaid
Aroma	\$.40	\$.60	\$ 1.10	\$ 2.00	\$ 4.00	"

Special Prices on 1,000 or more.

GRAPE VINES

AGAWAM—One of the best of all red grapes. Quite large and very rich in flavor.

BETA—Medium sized black grape. A cross between the Concord and the common wild grape. A vigorous climber much used for ornament, and a fine one for grape juice. Hardy anywhere.

CACO—The best new grape. The fruit is very large, and of reddish-brown or amber color. Fine quality, with a rich and spicy flavor. A little higher in price, and well worth it.

CATAWBA—A large, coppery-red grape of high quality. A heavy bearing grape.

CONCORD—Black grape in color on the back cover. Grown the country over for home and market. Needs no further description.

MOORE'S EARLY—A fine one for market. Fruit is black and ripens 10 days earlier than Concord.

NIAGARA—The white grape on the back cover. Heavy yielding. Bunches large and compact. The most satisfactory standard white grape.

PORTLAND—The much talked about new white grape. Fruit very large and sweetly flavored. Comparable only to Caco for size and quality.

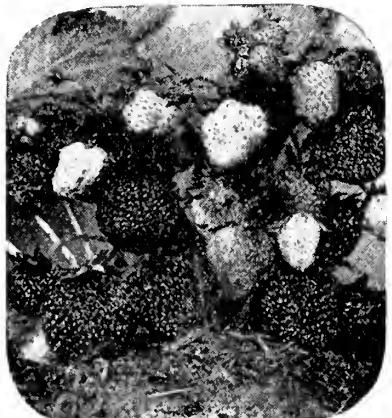

Grape Prices—All Postpaid

Quantities above 25 at the 100 rate. Write for special prices on larger amounts. We do not ship grapes in the Fall.

Planting Directions

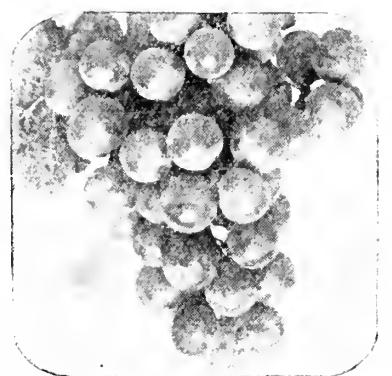

Plant grape vines 8 to 10 inches deep. Make the hole 20 inches across, so that roots are well spread out. Plant in good soil and cultivate thoroughly except when fruit is ripening.

APPLE TREES

The orchard, a wise investment, whether it be a small one for home use or a larger one handled commercially. It is doubly so when you start right by using only thrifty, vigorous young trees, graded to standard requirements.

We have the following well known varieties, which have proven themselves unexcelled for home, as well as for market use. Can furnish either one or two year old trees. One year old trees average three to four feet in height; two year old trees from four to six feet. Graded according to the official requirements of the American Association of Nurserymen, and properly pruned before shipping. All trees officially inspected.

We guarantee safe arrival in good, live growing condition. If trees are not absolutely satisfactory in every respect when you receive them, return them at our expense and we will refund the purchase price.

WINTER APPLES

FIELD'S SPECIAL YELLOW DELICIOUS.

Finest and newest of winter apples. Beautiful yellow apple of large size which brings the highest market price. Crisp and juicy, having a distinctive flavor. Heavy bearer, thrifty, vigorous grower, and a wonderful keeper. 4-8 ft. trees, \$1.00 each; 4 for \$3.75; or 10 for \$9.00, postpaid, or by prepaid express.

DELICIOUS—Brilliant, dark red. Unsurpassed for quality as an eating apple. Very hardy. Ripens in October.

GRIMES GOLDEN—Golden yellow with wonderful flavor. Keeps well, and is a good, healthy grower. Ripens in September and the first of October.

JONATHAN—Dark red. Trees bear quite young and bear well. Ripens in late September or early October.

STAYMAN'S WINESAP—Deep crimson. Stores well and is better if not used until December or January. Ripens in October.

NORTHWESTERN GREENING—Greenish-yellow. Keeps well and is a fine cooking variety. Very hardy. Ripens about the middle of October.

TOLMAN'S SWEET—Fruit yellow and red, of fine flavor. Ripens in late September and early October.

SUMMER APPLES

DUCHESS OF OLDENBURG—Yellow with red stripes. Good cooker. Ripens August to September.

MAIDEN BLUSH—Fine blushed variety, fine for home use. Ripens early fall.

RED JUNE—Medium sized yellow with red predominating. Bears well and ripens in July to August.

WEALTHY—Red. Does well anywhere. Ripens in September.

CRAB APPLES

YELLOW TRANSPARENT—Pale yellow, and bears early. Ripens in September.

RED SIBERIAN—Fruit red and rather small. Ideal for canning. Trees bear well, and are very hardy. Ripens in October.

WHITNEY NO. 20—Fruit green and red striped. Of good size and flavor. A fine quality Crab. Ripens in August or early September.

All apple trees except Special Yellow Delicious at the following prices. Your selection may be assorted if you wish.

1 year trees, postpaid. 4 for \$1.00; 10 for \$2.00; 25 for \$4.25.

2 year trees, not prepaid, shipped express only. 4 for \$1.50; 10 for \$3.50; 25 for \$7.50. Write for special prices on larger quantities.

APRICOT TREES

Apricots are not generally successful through the Middle Western States this far north, but our demand for Apricots is quite large, so we list this one variety. It is, in our estimation, the most suitable for this country.

SUPERB—Very hardy variety, which originated in Kansas. Probably the best flavored and most productive hardy Apricot yet produced. Medium size, and light salmon in color.

One year trees, 40c each; 4 for \$1.50; 10 for \$3.25, postpaid.

Two year trees, 60c each; 4 for \$2.25; 10 for \$5.00, not prepaid.

PEACH TREES

Fine young peach trees, carefully graded, expertly handled and guaranteed true to name. We furnish the following varieties in either one or two year old trees.

CHAMPION—Freestone. Fruit large, delicious and sweet. White meated, with creamy white skin and red cheeks. Ripens in August.

CRAWFORD'S EARLY—Freestone. Fruit yellow with a showing of red cheeks. Flesh yellow and sweet. Ripens in August.

HEATH CLING—The only clingstone variety we list. White peach, very large and of fine quality. Ripens in October.

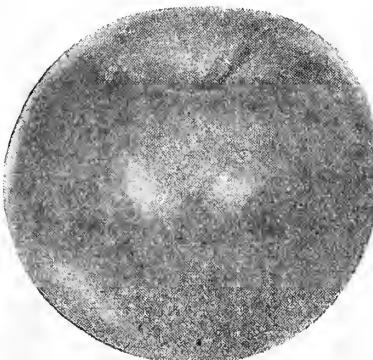

ELBERTA—Freestone. The variety more widely grown than any others. The fruit is yellow with red cheek, having firm yellow flesh of fine quality. The trees are quite hardy and unusually productive. Ripens early.

J. H. HALE—Somewhat larger than the Elberta. Rich, golden yellow blushed with carmine. Flesh is dark yellow. Very firm. Ripens just a little later than the early Elberta.

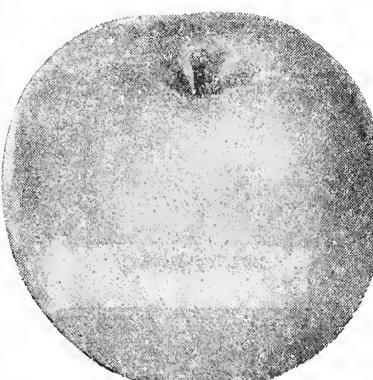

All peach trees at the following prices: Your selection may be assorted if you wish.

One year old trees are from 2 to 4 feet high, and are shipped prepaid at the following prices: 4 for \$1.00; 10 for \$2.00; 25 for \$4.00.

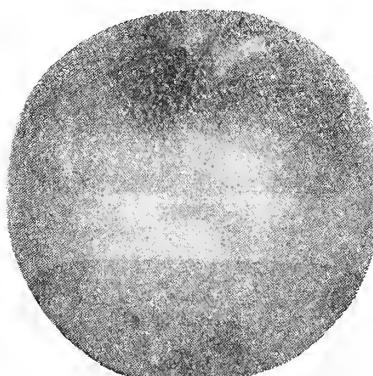

Two year old trees average 4 to 6 feet. Too large for mail shipment. Shipped express only. Not prepaid. 4 for \$1.40; 10 for \$3.00; 25 for \$7.00.

CHERRY TREES

The Cherry is the ideal fruit for the home owner, for it provides the first fruit of the summer. Perfectly hardy, heavy bearing and producing fruit in a few years after planting. Sour varieties are all especially suited to the Middle West.

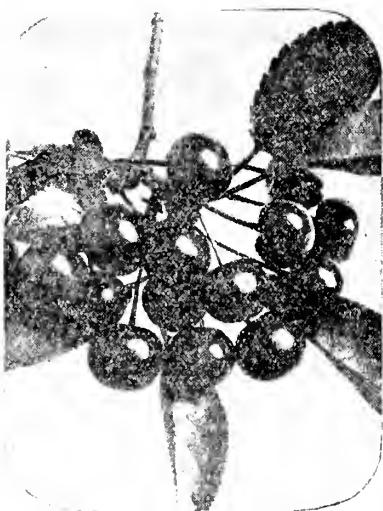

Our trees are pruned, sprayed and thoroughly cultivated in the Nursery row, so that you receive well matured and well developed young trees.

EARLY RICHMOND—Bright red in color. Very well known, and very hardy. Yields well. Used extensively for canning. Fruit is of good quality and good size. Ripens in June.

ENGLISH MORELLO—Very dark red, almost black. Fruit is juicy, tender, and of

good quality. Very fine fruit for late canning. Ripens in late June.

LARGE MONTMORENCY—Large, red Cherries, very rich and contain very little acid. The trees are very hardy and bear constantly. Especially recommended for the Middle Western States. Ripens about ten days later than the Early Richmond.

English Morello Cherry

All Cherry trees at the following prices. Alike or assorted.

One year old trees, 3 to 4 feet, 4 for \$1.40; 10 for \$3.00; 25 for \$6.25, postpaid.

Two year old trees, 4 to 6 ft., 4 for \$2.00; 10 for \$4.50; 25 for \$10.00, not prepaid. This size too large for mailing. Shipped express. Can supply at lower prices in larger quantities.

SWEET CHERRIES

Sweet Cherries are not so very satisfactory grown in the Middle West, but we have seen an increasing call for them that we list the following variety, which, in our estimation, is best for the Middle Western States:

BLACK TARTARIAN—The genuine, old-fashioned Sweet Cherry. The fruit is very

large, and very sweet, and almost black in color. Ripens in late June or early July.

One year old trees, 3 to 4 ft., 60c each, prepaid by mail or express.

Two year old trees, 4 to 5 ft., 75c each. These are too large for shipment by mail and must go by express, at your expense.

PEAR TREES

BARTLETT—Yellow Pear with red cheek when fully ripened. Fruit very well flavored and popular both as an eating and canning Pear. Ripens in late August or early September.

KIEFFER—Golden yellow. Of large size and a good keeper and shipper. Ripens in October.

SECKEL—Smaller than the Bartlett or

Kleffer. Fruit sweet and of fine texture. Ripens late September or early October.

1 year trees, 3 to 4 ft., 4 for \$1.60; 10 for \$3.25; 25 for \$7.00, postpaid.

2 year trees, 4 to 6 ft., 4 for \$2.40; 10 for \$5.00; 25 for \$11.00, not prepaid. Shipped express only. Write for prices on larger quantities.

Bartlett Pear

PLUM TREES

COMPASS CHERRY—Colored about the same as the Early Richmond Cherry. Good quality fruit of fine flavor. Excellent for canning. Ripens in July.

HANSKA—Hansen Hybrid. Crimson blushed fruit of large size, red in color. Trees very hardy. Ripens in August.

BURBANK—Fruit cherry red, and large. Trees are very hardy. Produces well. Ripens about the middle of August.

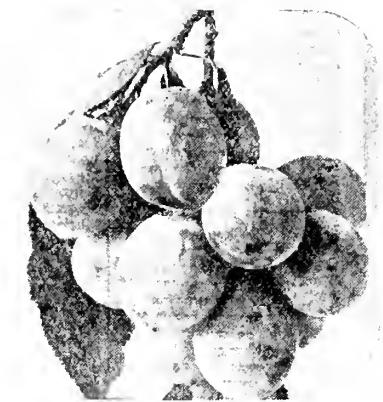

OPATA—Another Hansen Hybrid. Purple fruit with green flesh. Sweet flavor. Ripens about the middle of July.

SAPA—Another Hansen Plum. Bears extremely early, and grows vigorously. Fruit is almost black with flesh of a deep, reddish-purple. Ripens late in July.

TERRY—Native Plum. Fruit red and quite large. Ripens well and keeps well. Flesh is yellow. Ripens in August.

UNDERWOOD—Large, round fruit of greenish-yellow. Fruit of excellent quality and keeps well. Matures about the middle of August.

WANETA—Dark red Plum of unusual quality and size. Very good eating Plum. Matures by early August.

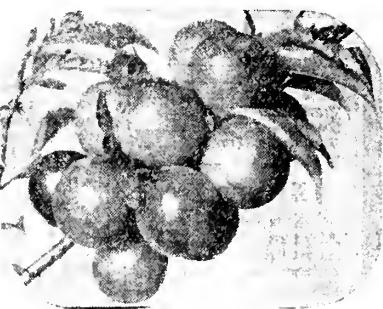

Waneta Plum

All Plum trees at the following prices. Your selection may be assorted.

1 year trees, 3 to 4 ft., 4 for \$1.60; 10 for \$3.25; 25 for \$7.00, postpaid.

2 year trees, 4 to 6 ft., 4 for \$2.40; 10 for \$5.00; 25 for \$11.00, not prepaid. Shipped express only.

Write for prices on larger quantities.

A BIG ASSORTMENT OF HOME FRUITS

Postpaid for \$5.00

10 Fruit Trees, including:

2 Winter Apples, 1 yr.

2 Summer Apples, 1 yr.

2 Sour Cherries, 1 yr.

2 Peach, 1 early and 1 late, 1 yr.

1 Pear, 1 yr.

1 Plum, 1 yr.

50 Mastodon Everbearing Strawberries

50 Senator Dunlap, Spring Bearing

12 Cumberland Black Raspberry, 1 yr.

4 Concord Grape Vines, 1 yr.

All trees and plants of the regular grades listed in the catalog. Stock is specially reserved so we cannot make any changes in the above collection.

\$25 In Prizes for Pictures

Pictures sent to us by customers are always enjoyed by all of us and we want a lot of them this year.

To show our appreciation and make it interesting for you I am going to send \$5.00 to the one sending the best picture to us this year and besides that I am going to send a Dollar Bill to 20 others of the best we receive.

There's only one rule and that's an easy one. The pictures must have something in them which was raised from my seeds or plants.

Send as many pictures as you want to. Size won't have anything to do with it and you don't have to be a professional, either.

A basket of strawberries, a water-

melon, picture of your garden, a handful of radishes, a vine or a bush or your rock garden. There are a few ideas for you and you can think of a hundred more.

I'd like to see some of the family in the picture, too, because I'm always glad to get pictures of my customers. But whether you get some folks in the picture or not send along your snapshots and see if you can't win a cash prize along with the fun.

And to prove I'm serious in wanting the pictures and that we like them, I will send a package of flower seed to all of you who send me a picture this year of things raised from my seeds or plants.
